FÁILTE AN UACHTARÁIN PRESIDENT'S WELCOME

Mar Uachtarán Ollscoil Mhá Nuad tá ríméad orm go bhfuil sé ar intinn agat teacht anseo chun staidéar a dhéanamh linn.

Tá oideachas sármhaith i réimse leathan ábhar ar fáil in Ollscoil Mhá Nuad. Is deis foghlama eisceachtúil é oideachas ollscoile óir bíonn tú in ann snas a chur ar do chuid smaointeoireachta, agus forbairt mar dhuine. Cuireann sé an bunús don saol gairmiúil a bheidh agat amach anseo agus an bunús do thodhchaí shaibhir amach anseo ar fáil duit.

I Má Nuad, creidimid sa chumhacht a bhaineann le hoideachas chun todhchaí níos fearr do chách a shamhlú agus a chruthú. Táimid tiomanta ag an gcreideamh seo i ngach aon rud a dhéanaimid agus múnlaíonn sé an t-eispéireas aonaránach a chuirimid ar fáil dár mic léinn.

An rud a sheasann amach fúinne ná cé chomh tiomanta is atáimid don dínit, meas agus aire a thugaimid dá chéile agus don mhuintearas eadrainn. Comhoibríonn ár bhfoireann go fíor-mhaith lena chéile, tá comhionannas agus ceartas sóisialta fíor-thábhachtach dúinn agus is é an cultúr atá againn ná barr feabhais a bhaint amach i gcónaí.

Táimid ag iarraidh go mbainfidh tú an méid is mó as oideachas ollscoile agus is féidir. Chomh maith leis an smaointeoireacht is déanaí san ábhar atá roghnaithe agat, beidh an deis agat scileanna criticiúla don todhchaí agus do na dúshláin atá romhainn sa tsochaí – sonraíocht, inniúlacht dhigiteach agus inbhuanaitheacht ina measc – a fhoghlaim.

Cabhróimid leat leis na scileanna intleachtúla a theastaíonn uait chun dul i mbun smaointeoireachta go criticiúil, chun anailís a dhéanamh ar chúrsaí casta, chun do chuid smaointe a chur in iúl go soiléir agus chun dul i mbun oibre le daoine eile go héifeachtach. Bíonn an deis tugtha do mhic léinn chomh maith modúil a dhéanamh taobh amuigh de do phríomhábhair, chun dul i mbun staidéir thar sáile agus chun taithí oibre phraiticiúil a bhaint amach duit féin. Tá saineolas ag athrú de shíor ach mairfidh na scileanna agus eispéiris bhunúsacha seo go deireadh an tsaoil.

Beidh tú i do bhall denár gcampas bríomhar chomh maith. Tá réimse éagsúil clubanna agus cumann ar fáil a thabharfaidh a lán deiseanna duit chun taitneamh a bhaint as spéiseanna taobh amuigh den churaclam, chun aithne a chur ar do chomhscoláirí agus chun caidrimh ar feadh an tsaoil a fhorbairt.

Má tá ollscoil uait a chuirfidh dúshlán romhat, a thabharfaidh inspioráid duit agus a chumhachtóidh thú, is í Ollscoil Mhá Nuad an áit duitse.

As President of Maynooth University, I'm delighted that you are considering studying with us.

Maynooth University offers an outstanding education in a wide range of subjects. A university education is an extraordinary opportunity to learn, refine your thinking, acquire skills, and develop as a person. It provides the foundation for your career and a fulfilling future.

At Maynooth, we believe in the power of education to imagine and create a better future for all. This belief drives everything we do and shapes the unique experience we offer our students.

What sets us apart is our deep commitment to dignity, respect, and care for each other, and our strong sense of community. You'll find collegiality among our staff, a dedication to equity and social justice, and a culture of continuous improvement.

We want you to get the most from your university education. As well as the latest thinking in your chosen subject, you'll learn essential skills in data, digital literacy, and sustainability - skills that will be critical to the future of work and the societal challenges we face.

We'll help you develop the intellectual skills to think critically, analyze complex issues, make good decisions, communicate your ideas clearly, and work well with others. We also offer opportunities to broaden your interests through modules outside your core subjects, studying abroad, and gaining practical work experience. Knowledge is always changing, but these foundational skills and experiences will last a lifetime.

You will also be part of our vibrant campus. Our diverse range of clubs and societies offers you many opportunities to enjoy extracurricular interests, engage with fellow students, and develop lifelong friendships.

If you are looking for a university that will challenge you, inspire you and empower you, Maynooth University is the place for you.

Professor Eeva Leinonen

President, Maynooth University

An tOllamh Eeva Leinonen

Uachtarán, Ollscoil Mhá Nuad

FIND YOUR DEGREE BY AREA OF INTEREST

OUR TWO BROAD-BASED DEGREES: BACHELOR OF ARTS MH101 & BACHELOR OF SCIENCE MH201

THE MAYNOOTH BACHELOR OF ARTS DEGREE MH101		SECTION 1
MH101 OVERVIEW	26	
BACHELOR OF ARTS SUBJECTS:		
Accounting	31	German 47
Also available in specialised degrees - see section 3		Also available in BBA Business and Languages MH409 p. 87 & BCL (Law and Languages) MH503 p. 131
Anthropology	32	History 48
Also available in the BBS/BBA Business and Global Cultures MH404 BGC/IGC/MGC - see section 3		International Development 49
Business (International)	33	Law 50
Also available in specialised degrees - see section 3		Also available in specialised degrees - see section 8
Business (Management)	34	Mathematical Physics 51
Also available in specialised degrees - see section 3		Also available in specialised degrees - see section 2 and section 9
Business (Marketing)	35	Mathematical Studies 52
Also available in specialised degrees - see section 3		Mathematics (Pure) 53
Chinese Studies	36	Also available in the Bachelor of Science degree - see section 2 and section 9
Also available in BBA Business and Languages MH409 p. 87 & BCL (Law and Languages) MH503 p.131		Media, Film & Cultural Studies 54
Classical Studies	37	Also available in specialised degree - see section 7
Computer Science	38	Medieval Celtic Studies 55
Also available in specialised degrees - see section 4		Music 56
Also available in the Bachelor of Science degree - see section 2		Also available in specialised degree - see section 7
Criminology	39	Music Technology 57
Also available in specialised degrees - see section 8		Philosophy 58
Economics	40	Also available in specialised degree MH603 - see section 4
Also available in specialised degree MH415 BSc Economics and MH416 BA International Economics - see section 3		Politics 59
English	41	Psychological Studies 60
Also available in specialised degree BA Creative Writing and English - see section 7		Psychology available in specialised degrees - see section 7 and section 9
Finance	42	Sociology 61
Also available in new BBS/BBA Finance MH410 p. 88		Also available in specialised degree MH107 - see section 7
French	43	Spanish 62
Also available in BBA Business and Languages MH409 p. 87 & BCL (Law and Languages) MH503 p. 131		Also available in BBA Business and Languages MH409 p. 87 & BCL (Law and Languages) MH503 p. 131
Gaeilge Nua-Ghaeilge (Modern Irish)	44	Statistics 63
Also available in BCL (Law and Languages) degree MH503 p. 131		Also available in the Bachelor of Science degree - see section 2 Also available in specialised degrees: MH207 BSc Data Science p. 141 and MH402 BSc Quantitative Finance p. 80
Geography	46	
Also available in BSc Biological and Geographical Sciences - see section 9		
THE MAYNOOTH BACHELOR OF SCIENCE DEGREE MH201		SECTION 2
MH201 OVERVIEW	64	Engineering Science 72
BACHELOR OF SCIENCE SUBJECTS:		Also available in specialised degrees - see section 6
Biology	68	Experimental Physics 73
Also available in specialised degrees - see section 9		Also available in specialised degrees - see section 9
Chemistry	69	Mathematical Physics 74
Also available in specialised degrees - see section 9		Also available in specialised degrees - see section 9
Computer Science	70	Mathematics 75
Also available in specialised degrees - see section 4		Also available in specialised degrees - see section 9
Also available in the Bachelor of Arts degree - see section 1		Mathematics (Pure) and Mathematical Studies available in the Bachelor of Arts degree - see section 1
Data Science	71	Statistics 76
Also available in specialised degrees: MH207 BSc Data Science p. 141 and MH402 BSc Quantitative Finance p. 80		Also available in the Bachelor of Arts degree - see section 1 Also available in specialised degrees: MH207 BSc Data Science p. 141 and MH402 BSc Quantitative Finance p. 80

OPC (Open choice to any degree stream):

You can choose OPC on your CAO application and decide on your preferred degree stream following admission. You must meet the minimum entry requirements for your preferred stream. Available in these degrees:

MH212	MH502	MH602
MH404	MH601	

OUR SPECIALISED DEGREES: SECTION 3 TO SECTION 10

BUSINESS, ECONOMICS, FINANCE AND ACCOUNTING		SECTION 3
Overview		78
BSc Quantitative Finance	MH402	80
BA Accounting and Finance	MH403	81
BBS/BBA Business and Management	MH404 BMA	82
BBS/BBA International Business	MH404 INB	83
BBS/BBA Marketing	MH404 MKT	84
BBS/BBA Business and Global Cultures	MH404 BGC/IGC/MGC	85
BBS/BBA Business and Accounting	MH407	86
BBA Business and Languages	MH409	87
BBS/BBA Finance (NEW)	MH410	88
BBS/BBA Entrepreneurship	MH411	89
BSc/BBA Business with Sport Science	MH412	90
BSc Economics	MH415	91
BA International Economics	MH416	92
BCL (Law and Accounting)	MH502 LWA	93
BCL (Law and Business)	MH502 LWB	94
Accounting, Business (International), Business (Management), Business (Marketing), Economics and Law also available as subjects in the Bachelor of Arts degree - see section 1		

COMPUTER SCIENCE		SECTION 4
Overview		96
BSc Computer Science and Software Engineering (through Arts)	MH601 CSA	98
BSc Multimedia, Mobile and Web Development (through Arts)	MH601 MWA	99
BSc Computer Science and Software Engineering (through Science)	MH602 CSS	100
BSc Multimedia, Mobile and Web Development (through Science)	MH602 MWS	101
BSc Computational Thinking	MH603	102
Computer Science also available in the Bachelor of Arts degree - see section 1 and in the Bachelor of Science degree - see section 2		

EDUCATION		SECTION 5
Overview		104
BEd Bachelor of Education - Froebel Primary Teaching	MH001	106
BEd Bachelor of Education - Froebel Primary Teaching (Gaeltacht Applicants)	MH002	106
BA Early Childhood - Teaching and Learning (full-time)	MH003	107
BA Early Childhood - Teaching and Learning (flexible)	MH004	108
BSc Science (with Education)	MH212 SED	109
BSc Mathematics and Computer Science (with Education)	MH212 MCS	109
BSc Mathematics (with Education)	MH212 MED	109

ELECTRONIC ENGINEERING		SECTION 6
Overview		110
BE Bachelor of Electronic Engineering	MH304	112
BSc Robotics and Intelligent Devices	MH306	113
Engineering Science available in the Bachelor of Science degree - see section 2		

HUMANITIES AND SOCIAL SCIENCES		SECTION 7
Overview		114
BMus Bachelor of Music	MH103	116
Music & Music Technology also available in the Bachelor of Arts degree - see section 1		
BA Psychology	MH106	117
Also available as a specialised Bachelor of Science degree MH209 - see section 9		
Psychological Studies available in the Bachelor of Arts degree - see section 1		
BSocSc Bachelor of Social Science	MH107	118
BA Media Studies	MH109	119
Media, Film & Cultural Studies also available in the Bachelor of Arts degree - see section 1		
BA Creative Writing and English	MH111	120
BSocSc Community and Youth Work (full-time)	MH116	121
BSc Product Design and Innovation	MH305	122
BA part-time, flexible learning (mature only) (NEW)	MH804	123
BA Theology & Arts*	MU001	
*This is a joint degree provided by St Patrick's Pontifical University (SPPU) and Maynooth University. Further information about this degree is available from SPPU. See www.maynoothcollege.ie		

LAW AND CRIMINOLOGY		SECTION 8
Overview		124
LLB (Law)	MH501	126
BCL (Law and Accounting)	MH502 LWA	127
BCL (Law and Business)	MH502 LWB	128
BCL (Law and Criminology)	MH502 LWC	129
BCL (Law and Arts)	MH502 LWD	130
BCL (Law and Languages)	MH503	131
BA Criminology	MH504	132
Accounting, Business (International), Business (Management), Business (Marketing), Criminology, French, German, Law and Spanish also available as subjects in the Bachelor of Arts degree - see section 1		

SCIENCE		SECTION 9
Overview		134
BSc Biotechnology	MH202	136
BSc Biological and Geographical Sciences	MH203	137
BSc Physics with Astrophysics	MH204	138
BSc Biomedical Science (NEW)	MH205	139
BSc Theoretical Physics and Mathematics	MH206	140
BSc Data Science	MH207	141
BSc Psychology (through Science)	MH209	142
Psychology also available as a specialised Bachelor of Arts degree MH106 - see section 7		
Psychological Studies available in the Bachelor of Arts degree - see section 1		
BSc Pharmaceutical and Biomedical Chemistry	MH210	143
BSc Science (with Education)	MH212 SED	144
BSc Mathematics and Computer Science (with Education)	MH212 MCS	144
BSc Mathematics (with Education)	MH212 MED	144
BSc Sport Science and Health	MH221	145
BSc Food Science and Human Nutrition	MH222	146
BSc/BBA Business with Sport Science	MH412	147

NURSING		SECTION 10
Overview		148
BSc General Nursing	MH701	150

MH004 ^{^^}		BA Early Childhood - Teaching and Learning (flexible)	^^						
MH804		BA part-time, flexible learning (mature only) (NEW)	Y						

a Recommended grade (not required)	^	MH002 is another application route for students who reside in officially designated Gaeltacht Language Planning areas and who use Irish as the normal language of the home (applicants must include their Eircode when applying to MH002). Applicant details will be forwarded to the Department of Education to determine eligibility for this route. Minimum entry requirements for MH002: as MH001 apart from the LC points requirement and the H3 Irish requirement.	‡	A pass in Leaving Certificate Technology can be substituted for a science subject
b No beginner stream in this subject – Leaving Certificate H4 or equivalent required			◊	Applicants under 23 years of age must have at least 350 points
c H2 Leaving Certificate Mathematics or equivalent required	M	A pass in Leaving Certificate Applied Mathematics is acceptable as a science subject	#	Restricted-application course. Selection for restricted-application courses is on the basis of one or a combination of a portfolio/test/audition as well as meeting any matriculation requirements.
d Leaving Certificate H5 in Music or equivalent required	P	Pass required: O6 or H7. Foundation level Mathematics is accepted for matriculation (i.e. can be counted as one of the six subjects required - grade F6 or higher), but does not meet the requirement for degrees where Mathematics is a special programme requirement. Foundation level Irish is not accepted for matriculation. Points are not awarded for either subject.	*	Random Selection - not all applicants on these points were offered places
g A pass in Leaving Certificate Geography is acceptable as a science subject	S	O6 or H7 Science subject (one of Agricultural Science, Biology, Chemistry, Computer Science, Physics, or Physics with Chemistry)	^^	Applications to MH004 BA Early Childhood - Teaching and Learning (flexible) are made on the Advanced Entry portal on the CAO website. Minimum QQI level 6 in Early Childhood Education & Care required. MH004 will run subject to sufficient numbers in 2026. A decision on September 2026 intake will be made in May 2026. For more details please contact the Department.
~ Requirements can only be accumulated over a maximum of 2 Leaving Certificate sittings.	S ^L	O6 or H7 Laboratory Science subject (one of Agricultural Science, Biology, Chemistry, Physics, or Physics with Chemistry)	Y	Mature entry only (21 on January 1st of the year of entry)
		(Open choice to any degree stream): You may choose OPC on your CAO application and decide on your preferred degree stream following admission. You must meet the minimum entry requirements for your preferred stream.	N/C	New Course

GENERAL NOTES RE: MATRICULATION

- Minimum entry requirements for all degrees (apart from MH001/ MH002): applicants must present a minimum of 6 subjects in their Leaving Certificate, with minimum grades 2 Higher Level H5 and 4 Ordinary or Higher Level O6/H7, including Irish and English.
- The minimum requirements for MH001 and MH002 are 3 Higher Level H5, and 3 Ordinary Level O6 or Higher Level H7. The minimum subject requirements are H4 Irish (H3 minimum required for MH002), O4/H7 English and O4/H7 Maths.
- Foundation level Mathematics is accepted for matriculation (i.e. can be counted as one of the six subjects required - grade F6 or higher), but does not meet the requirement for degrees where Mathematics is a special programme requirement. Points are not awarded for this subject.
- Foundation level Irish is not accepted for matriculation. Points are not awarded for this subject.
- Leaving Certificate Vocational Programme (LCVP) Link Modules **Points are awarded as follows:**
 - > Distinction 66
 - > Merit 46
 - > Pass 28
- Applicants can use their points allocation for the Link Modules as one of their best six subjects for the purpose of calculating points, but the Link Modules do not qualify as a subject for minimum entry requirement purposes.
- NUI Exemption: If you have or are seeking an exemption from minimum entry requirements such as Irish (ROI applicants only) or a third language you must ensure this is an official NUI Exemption. Contact the NUI (www.nui.ie) for details.

www.mu.ie/level8

MAYNOOTH UNIVERSITY

SCHOLARSHIPS

We offer our students a range of academic and sport scholarships

Pictured are four of 70+ MU Entrance Scholars 2024, each photographed at the awards ceremony with MU President Professor Eeva Leinonen

ENTRANCE SCHOLARSHIP

The €1,000 Entrance Scholarship is automatically awarded to incoming first-year students who apply through the Central Applications Office (CAO) and achieve 575 CAO points or higher in their school-leaving examinations. For students presenting the Irish Leaving Certificate, points must be obtained from six subjects in a single sitting; however, the sitting does not need to be in the same year as entry to the University.

For students presenting GCE A Levels, the award is based on achieving the required points from three or four A-Level subjects.

The CAO processes applications for undergraduate courses at Irish Higher Education Institutions, including Maynooth University. All EU, EEA, and UK applicants for first-year undergraduate degree programmes at Maynooth University must apply through the CAO.

Entrance Scholars have the option of residing on campus (normal charges apply). Entrance scholars who have not already booked their campus accommodation, will be offered campus accommodation during CAO Round 1 offers. Unfortunately, the University is not in a position to offer accommodation places in Round 2 or subsequently to Entrance Scholars, as they are fully booked in Round 1 annually.

ENTRANCE SCHOLARSHIP FOR MH103 BACHELOR OF MUSIC

The Entrance Scholarship for MH103 Bachelor of Music is for one entrant to the degree commencing in September 2026. The top scoring applicant, based on the MH103 remote assessment, will be offered the scholarship of €1,000. The successful applicant is informed following registration.

ENGINEERING SCHOLARSHIP

W.A. BARRETT SCHOLARSHIP IN ENGINEERING

The W.A. Barrett Scholarship in Engineering at Maynooth University was established in 2023 through the generosity of Earthridge International and the Barrett family to commemorate the late William Anthony (Tony) Barrett.

The scholarship provides €3,000 to eligible first year students taking a level 8 degree course that is accredited by Engineers Ireland at Maynooth University. Two scholarships are available for MH304/MH306 Engineering students.

www.maynoothuniversity.ie/scholarships

MUSIC SCHOLARSHIP

The Head of the Maynooth University Department of Music awards one undergraduate Music Scholarship each year. This scholarship is for current Music students and is based on their end of first year results.

SOCIO-ECONOMICALLY DISADVANTAGED STUDENTS AND STUDENTS WITH DISABILITIES

A number of scholarships and bursaries are available for students who might not normally be in a position to attend third level education due to serious socio-economic disadvantage or disability.

www.maynoothuniversity.ie/access-office

SPORT SCHOLARSHIPS

We offer sport scholarship programmes in GAA, rugby, golf, snooker and soccer. Other recognised sports may be considered under the scholarship programme for participants competing at a very high level e.g. carded athletes. See page 9 for more about Sport Scholarships.

UNIVERSITY OF SANCTUARY SCHOLARSHIP

The Sanctuary Award is an initiative of University of Sanctuary Ireland (UoSI) to encourage and celebrate the good practice of universities, colleges and institutes welcoming refugees, asylum seekers and other migrants into their university communities and fostering a culture of inclusion for all those seeking sanctuary. The Award aims to spread this culture of welcome across the institutions of higher education all over the island.

sanctuary@mu.ie

MAYNOOTH UNIVERSITY

SPORT SCHOLARSHIPS

GAA, Golf, Rugby,
Soccer, Snooker

APPLY ONLINE BEFORE APRIL 1ST

We offer Sport Scholarship programmes in GAA, golf, rugby, snooker and soccer. Other recognised sports may be considered for a CAO points concession for participants competing at a very high level, e.g. carded athletes. Scholarships are awarded to students for a period of one year, but can be renewed subject to a satisfactory level of academic and sporting progression being maintained.

BENEFITS OF OUR SPORT SCHOLARSHIP PROGRAMME INCLUDE

- > Concession of up to 60 CAO points if required – scholars must meet minimum entry requirements for their chosen degree. For MH001/ MH002 Education - Froebel Primary Teaching, a limited number of places are available for the 60 points concession. No limit on places applies to other degrees however. See website for details.
- > Access to top level coaching and playing facilities
- > Sports psychology, medical and physiotherapy support
- > Health and nutrition advice
- > Fitness and performance testing and analysis
- > Financial bursary
- > Ongoing academic support
- > Strength and conditioning support
- > Free gym membership

REQUIREMENTS FOR SPORT SCHOLARS INCLUDE

- > Maintain academic progress and remain in good standing with the University
- > Maintain an impressive record of sporting achievement
- > Take an active role in the University club(s) associated with the scholarship sport
- > Compete on behalf of MU at inter-varsity competitions
- > Represent the University at open days/at school visits

Both undergraduate and postgraduate students may be awarded scholarships for the duration of their studies.

SOCCER SCHOLARSHIPS

Benefits include:

- > Access to the highest standard third level soccer competition - Colleges & Universities Football League Premier Division (Men & Women), Irish Universities Football Union, Collingwood Cup, Harding Cup & Crowley Cup (Men's), Women's Soccer Colleges Association of Ireland, Intervarsity Kelly Cup.

Requirements include:

- > Scholarships are intended for student athletes with proven or perceived potential to perform at international, interprovincial, national league, and senior schools level.
- > Application is open to all regardless of which club or school you currently attend.

Contact

Barry Prenderville, Soccer Development Manager

GAA SCHOLARSHIPS

The aim of our scholarship programme is to offer talented GAA athletes the opportunity to develop their sporting potential through the use of top-class facilities, performance programmes and expertise combined with an excellent academic career.

Categories of sport scholarship within GAA:

- > Men's Gaelic Football (Sigerson & Fresher Division One)
- > Hurling (Fitzgibbon & Fresher Division One)
- > Ladies Football (Division One)
- > Camogie (Division One)

Requirements include:

- > Minimum criteria to apply for MUGAA Scholarship is to represent your county at minor grade upwards e.g. U20 & Senior
- > Eligibility is based on an applicant's ability to continuously demonstrate a high level of performance at county level
- > To be eligible to play under Higher Education rules, please see www.gaa.ie/highereducation

Contact

Jenny Duffy, GAA Development Officer

GOLF SCHOLARSHIPS

Categories of Golf Scholarship

- > Platinum (High Performance Squad)
- > Gold (Scholarship Squad)
- > Silver (Observation Squad)

Requirements include:

- > Hold an excellent profile of performances at national & international events at U18 level or beyond
- > Hold a ranking on WAGR
- > Have a desire to reach the pinnacle of the amateur game

Contact

Barry Fennelly, Golf Manager

RUGBY SCHOLARSHIPS

Categories of Rugby Scholarship

- > Full Scholarship and Development Scholarship

Requirements include

- > A strong foundation in strength and conditioning
- > Outstanding achievement and references in school or club rugby
- > Exclusive commitment to the University's Club, MU Barnhall RFC, for duration of studies
- > Provide footage and details of playing schedule (where applicable)

Desired:

Provincial honours
National honours

Contact

Tom McKeown, Rugby Development Officer

SNOOKER SCHOLARSHIPS

Snooker Scholarships are supported by Snooker and Billiards Ireland.

Contact

Paul Davis, Sports Officer

OTHER SPORTS

High performance athletes with proven ability to compete at an international level can apply for our CAO points concession (up to 60 points) in recognition of their ongoing commitment to sport and potential to represent Ireland and the University at international level.

IRELAND'S FIRST UNIVERSITY TOWN

Maynooth University is located in the heart of Ireland's first university town. At just 25 kilometres from the city of Dublin, Maynooth was voted Ireland's Tidiest Town in recent years. Surrounded by the rich heritage and beauty of Kildare, our students enjoy the conveniences of a busy town, a growing university campus, and close proximity to Dublin.

WELCOME

PROFESSOR TIM THOMPSON

VICE-PRESIDENT

(STUDENTS & LEARNING)

Baineann sceitimíní áthais leis an tréimhse seo i bhur saolta agus sibh ag dul chun na hOllscoile den chéad uair, ach is údar imní é chomh maith ag amantaí agus is dócha go bhfuil fuílleach ceisteanna agaibh anois agus sibh ag teacht anseo go cinnte.

Tá roinnt mhaith le bheith ag smaoineamh air, bhur gcúrsaí staidéir, ag socrú isteach agus ag déanamh cairde nua san áireamh, agus ag bogadh ón mbaile den chéad uair chomh maith b'fhéidir. Ach níor cheart bheith buartha, mar mothaíonn gach mac léinn nua díreach mar an gcéanna agus tuigimid anseo in Ollscoil Mhá Nuad go huile is go hiomlán. Mar a tharlaíonn sé, tá foireann iomlán againn réidh chun cabhrú libh socrú isteach agus tús a chur le bhur n-aistear agus chun tacú libh le bhur bhforbairt phearsanta, acadúil agus ghairmiúil Táimid ag iarraidh go n-éireoidh go geal libh – agus cabhróimid cibé bealach gur féidir linn!

Bunaíodh Oifig na Mac Léinn agus na Foghlama le cinntiú go mbeadh eispéireas thar na bearta ag ár mic léinn agus iad i mbun staidéir linn anseo. Tá foirneacha againn i Seirbhísí na Mac Léinn, Scileanna agus Rath na Mac Léinn, Scileanna Criticiúla, Lárionad an Teagaisc agus na Foghlama agus inár dtairiscintí Spóirt. Bímid ag obair go dlúth le hAontas na Mac Léinn, Clubanna agus Cumainn, an Oifig Idirnáisiúnta agus ár Ranna agus Dámha acadúla chun go mbeadh fiúntas le bhur gcuid ama linn anseo.

Tá a fhios againn go rí-mhaith go bhfuil saolta gnóthacha agaibh agus roinnt mhaith ar bun agaibh ag an am céanna. Déanaimid ár ndícheall chun freastal oraibh agus chun réimse leathan de ghníomhaíochtaí corraitheacha, tairbheacha agus pléisiúrtha a chur ar fáil daoibh.

Ar na leathanaigh seo a leanas, beidh tú in ann tuilleadh a léamh faoin méid atá ar fáil in Ollscoil Mhá Nuad agus faoin mbealach gur féidir linn cabhrú go mbeadh rath oraibh anseo.

Táimid ag súil le sibh a fheiscint go luath,

Tim.

Coming to university is an exciting time, but it can also be a bit nerve-racking. You've probably got a load of questions. There is a lot for you to think about – not just in terms of what course you are interested in, but also deciding on a university where you feel comfortable.

We here at Maynooth University understand that, and have a whole team ready to support you in your personal, academic and professional development. We want to see you succeed – and will do all we can to help!

The Office for Students & Learning was set up to ensure that our students have a great experience while studying with us. We have teams in Student Services, Student Skills and Success, Critical Skills, the Centre for Teaching and Learning and in our Sports offerings. We work closely with our Maynooth Students' Union, Clubs and Societies and International Office to give you a fulfilling time here with us.

We know that you have busy lives and may be juggling a lot of different things. We will meet you where you are, and have a wide range of exciting, rewarding and fun activities for you to get involved in on your own terms.

Over the next few pages you'll be able to read more about what is on offer at Maynooth and how we can help you succeed.

We look forward to seeing you soon.

Tim.

YOUR MU EXPERIENCE

PERSONAL, ACADEMIC AND PROFESSIONAL GROWTH

AT MAYNOOTH UNIVERSITY, WE ARE COMMITTED TO EMPOWERING YOU TO FULFIL YOUR POTENTIAL.

The Maynooth University Student Success Strategy outlines our commitment:

Our vision is to develop and embed a university-wide, integrated, and holistic approach to student success so that each student is empowered to recognise and fulfil their potential academically, personally, and professionally.

We deliver this vision through a programme of supports from pre-arrival to graduation.

STARTING OUT

Our **online and in-person orientation** programme supports you from the time of offer and throughout your first year at Maynooth University. Explore your 'First Steps' with our online orientation and start to become familiar with the Maynooth experience before you arrive on campus. Once here, our in-person orientation will give you the chance to meet with current students, tour the campus, learn about all the supports available and be welcomed to your subjects, and start to connect with others in your course or who share similar interests.

YOUR JOURNEY, OUR SUPPORT - EVERY STEP OF THE WAY

We take pride in providing welcoming, supportive, non-judgmental, and person-centred support. We encourage students to engage with the resources that will help them manage their journey and support them throughout their time at Maynooth.

We offer a Circle of Support to guide and support you throughout your student journey.

www.maynoothuniversity.ie/student-services

ACHIEVING YOUR ACADEMIC GOALS

At Maynooth University, you will have access to a wide range of academic supports whenever you require them. Whether you'd like help with your course, tips on academic writing, or someone to talk to about your subjects or prepare for your exams, we're here to guide you every step of the way.

This support will be available through various methods, including personal appointments, peer learning, workshops, virtual tools, and more, allowing you to access them in a way that works for you.

We also equip you with the tools to succeed. As a Maynooth University Student, you get free access to Microsoft Office 365, including Word, Excel, PowerPoint, and more.

For more details log on to www.maynoothuniversity.ie/student-success

LEARNING EXPERIENCE AT MU

YOUR MAYNOOTH EDUCATION

A Maynooth Education offers you many opportunities to personalise your degree programme; our flexible programme pathways include a dedicated Critical Skills subject, the opportunity to take an elective, and real world learning opportunities to enrich your degree.

FIRST YEAR CRITICAL SKILLS COURSES

At third level it is expected that students will develop skills that will not only enable them to successfully negotiate their university experience but which will also help them in other areas of their lives.

Our 15 credit Critical Skills courses are designed to develop these skills early in our students' university experience. These optional courses are designed to help first year students to learn, experience, practice and develop various essential skills that will support their ongoing studies.

In Critical Skills, students will strengthen professional research and writing skills, quantitative reasoning, data visualization, and teamwork skills. They'll also understand the connection between learning and civic engagement, cultivate curiosity and persistence, and develop critical digital literacies for diverse audiences, composing complex digital texts like podcasts.

Expect small classes and active learning. We want to build student confidence by providing a learning environment that is both supportive and academically challenging.

SECOND YEAR FOR SCIENCE STUDENTS

Critical Skills courses are available in second year for science students in a select number of degrees.

See the degree pages that follow for details regarding availability of our 15 credit Critical Skills courses.

For more details log on to www.maynoothuniversity.ie/critical-skills

FLEXIBLE DEGREE STRUCTURE

At the start of second year, some students will have the option to avail of the University's flexible pathways structure. See the degree pages of this prospectus for details on the pathways available.

The Programme Advisory Office is available to assist and advise undergraduate students, including incoming first year students, with programme related decisions.

www.maynoothuniversity.ie/programme-advisory-office

REAL WORLD LEARNING

Maynooth students get the opportunity to experience more from their degree programme with an enhanced range of high-impact learning experiences, connecting classroom content with real-world experience, where students learn by doing and reflecting on this experience. These include opportunities in undergraduate research, work and professional development, student leadership, study abroad and community engagement, empowering Maynooth students to develop their skills and competencies for work, life and citizenship.

For more details log on to

www.maynoothuniversity.ie/careers/students

SECOND YEAR ELECTIVE STREAMS

Elective streams allow you to make more of your university education, and to take better advantage of the world-class lecturers and interesting subject material that Maynooth University has to offer. They may help to broaden your perspective, allow you to interact with students from other disciplines, or help you develop transferable skills for the future in a way that complements your main disciplinary studies. An elective stream can amount to one-sixth of the total course work for the year. Registration for electives is subject to enrolment limitations, and also must be compatible with the timetabling and other requirements of your main subjects. Some combinations of electives and subjects are excluded.

SAMPLE ELECTIVES:

- > Accounting in Society
- > Ancient Mythology – Epic and Tragic Tales
- > Beginning Chinese/French/German/Spanish
- > Catalan Language and Culture
- > Continuing Chinese/French/German/Nua-Ghaeilge/Spanish
- > Creative Technologies and Digital Prototyping
- > EDEN Entrepreneurship Design and Innovation
- > Education Engagement and Equality
- > Film and Screen Studies
- > Foundations in Science Writing and Communication
- > Gender and Sexuality in Society and Culture
- > Global Environmental Change
- > Good and Evil
- > Great Books
- > Influential Ideas in Economics
- > Introduction to Philosophy in the Digital Age
- > Irish Cultural Heritage
- > Portuguese Language and Culture
- > Prioritising People and Planet
- > Service Innovation
- > Skills for Success: Professional Development
- > The Growth and Development of the Irish Equine Industry
- > Wondrous People and Places: An Introduction to Celtic Literature

Visit www.maynoothuniversity.ie/electives for the full list of currently available Elective Streams.

CAREERS AND EMPLOYABILITY BECOMING FUTURE READY

The MU Careers and Employability Service is dedicated to enabling you to develop the future focused skills you need to excel professionally, whether that means exploring future career paths, upskilling, securing a placement, or networking with potential employers.

We are dedicated to empowering students to make informed decisions, develop future-focused skills and competencies, insights and awareness needed to excel personally, professionally and transition to work or further study. Crucially our work is supported by our academic faculty, wide network of employers and active alumni.

Our service comprises a wide range of career enhancing activities and personal and professional skills development opportunities. So whatever your stage of study or clarity of thinking regarding your career development, from first year through to final year and as a recent graduate we are here to support you. Whether you are looking for a job, wondering what career would suit you, or want to improve your transferable skills, the Careers and Employability Service can help.

CAREER GUIDANCE AND ADVICE

Our Careers Guidance professionals are available to provide 1 to 1 guidance appointments. Starting out on your career journey can be exciting, a little confusing and sometimes overwhelming. We're here to help you – whether you'd like help in generating some career ideas, exploring your interests, skills and motivations or just finding out what we do and how we can help – it is never too early to talk to us.

UPSKILL PROGRAMMES

Why not embark on activities that will help you gain future focused skills, enhance your personal awareness, professional focus and gain University recognition for these experiences. Our Upskill team offer a range of learning opportunities that do just that including; Student Experience Award (MUSE), Alumni Mentoring Programme, Micro Internships and the Summer Programme for Undergraduate Research (SPUR).

ACCREDITED PLACEMENT

Embedded within the Maynooth University Accredited Work Placement Programme is an invaluable opportunity for students to immerse themselves in a real-world work environment, as an integral part of the degree progression. This immersive placement fosters the development of competencies imperative for sustained career growth. Our Placement team coordinates and manages the seamless integration of our students into professional work environments, aligning with the accredited requirements of their degree programmes. This integral process is cultivated through the collaborative engagement of Students, Faculty, and Employers.

MAYNOOTH STUDENTS' UNION (MSU)

WELCOME TO MSU – YOUR MAYNOOTH STUDENTS' UNION!

Whether you're joining Maynooth University (MU) or St Patrick's Pontifical University (SPPU) you're already part of MSU! That's right, from the moment you register, you've got an entire student-led organisation backing you.

We're here to represent you, support you, and help you get the most out of your university experience from day one to graduation!

MSU REPRESENTATION

MSU is led by students, for students. Our team of elected Executive Officers (Full-Time and Part-Time) works to:

- > Represent your voice on campus and nationally
- > Advocate for your rights
- > Run exciting events and impactful campaigns
- > Deliver services that matter to you

Want to learn more or get involved? Visit: www.msu.ie

STUDENT OPPORTUNITIES

Getting involved with MSU is a great way to meet people, gain skills, and make a difference. There's something for everyone!

- > Work part-time with MSU (we're a Living Wage employer!)
- > Run for student leadership roles – Exec, Senate, or Class Rep
- > Join or support local and national campaigns
- > Get involved in fundraising and volunteering
- > Attend social events and get stuck into student life
- > And so much more!

THE MSU STUDENT CENTRE

Located just inside the North Campus entrance (first building on the left), the MSU Student Centre is your go-to place for:

- > Socialising, relaxing, or grabbing food with friends
- > Events, gigs, and student activities
- > Support and services

At the heart of it is the MSU Info Centre.

This is your one-stop shop for:

- > Leap Cards, travel info
- > Printing, binding, laminating
- > Help with any questions, big or small

OTHER MSU SERVICES JUST FOR YOU:

- > MSU Club (Bar & Venue) – Located in the Student Centre. Food all day, live entertainment into the night.
- > MSU Londis Shop – Located in the John Hume Building. Student-friendly prices, run by students.

GET IN TOUCH WITH MSU!

We're based in the MSU Student Centre, and we're always happy to help.

Your Executive Team:

MSU President – Maeve Farrell

- > president@msu.ie | (01) 708 6436 / (087) 908 3602

VP Academic Affairs – Charli Middleton

- > education@msu.ie | (01) 708 4712 / (087) 278 5204

VP Welfare & Equality – Ty Layberry-Ling

AN INTERNATIONAL UNIVERSITY

Erasmus and Study
Abroad Opportunities

Maynooth University
National University
of Ireland Maynooth

A member of the
arQus
European University Alliance

Maynooth University is a proud member of the Arqus European University Alliance, which offers a wide range of international opportunities for students, from applying for scholarships and joining virtual language cafés to taking part in semester-long, year-long, or short-term Erasmus exchange programmes with our Arqus partners across Europe.

Maynooth University works with almost 200 prestigious international higher education institutions to welcome students, researchers and academics from all over the world, and to facilitate Maynooth University students to study abroad as part of their degree.

We collaborate with university partners in Europe, Asia, Australia and North and South America on student and staff Exchange Programmes, joint research projects and publications.

We encourage students to study abroad either within Europe (Erasmus programme) or beyond. Studying abroad helps students expand their intellectual horizons. It is an exciting way to accelerate personal growth, and offers unique opportunities to experience a new country and culture, with support every step of the way.

Studying abroad also enhances future employment prospects in an increasingly global market, indicating transferable skills such as foreign language knowledge, independence, adaptability and communication skills.

We partner with universities in a range of non-EU countries including Japan, Uruguay, Australia, USA and with many EU countries including Italy, Sweden, France and many more. Visit the International Office webpages for more details.

IRISH IN THE UNIVERSITY

TÁ POBAL GAEILGE BEOMHAR AGUS BRÍOMHAR ANSEO IN OLLSCOIL MHÁ NUAD.

Cuirimid imeachtaí iontach ar siúl ar an gcampas go rialta do chainteoirí Gaeilge agus do dhaoine a bhfuil spéis acu sa teanga agus sa chultúr agus sna healaíona a bhaineann léi. Bíonn an-tóir ag mic léinn ar ár dtionscadail éagsúla, na ranganna Gaeilge um thráthnóna agus an Scéim Chónaithe lonnaithe ar an gcampas thuaidh ina measc. Tá Cuallacht Cholmcille, cumann Gaelach na hOllscoile, ar cheann de na cumainn is mó agus is rathúla ar an gcampas agus ar an gcumann Gaelach ollscoile is sine sa tír, óir tá oidhreacht iontach saibhir againn anseo i Má Nuad ó thaobh na Gaeilge de.

OIFIG NA GAEILGE ✉ oifig.nagaeilge@mu.ie

Cuireann Oifig na Gaeilge an Ghaeilge agus an cultúr agus na healaíona a bhaineann léi chun cinn i measc na foirne agus na mac léinn. Má tá spéis agat sna séirbhísí agus sna himeachtaí, bí linn agus tapaigh na deiseanna atá ar fáil anseo! Lean Oifig na Gaeilge ar na meáin shóisialta le teacht ar an nuacht agus ar na himeachtaí is déanaí:

THERE IS A VIBRANT AND ENGAGING IRISH LANGUAGE COMMUNITY HERE IN MAYNOOTH UNIVERSITY.

We hold wonderful events on campus regularly for those who speak Irish and for those who are interested in the language and its associated Arts and culture. Many of our projects have proven very popular, including our Irish classes in the evening and our Irish Language Residence Scheme on the North Campus. Cuallacht Cholmcille, the University's Irish language society, is one of the largest and most successful societies on campus, as well as the oldest Irish-language university society in the country, which serves as a testament to our extremely rich heritage in Maynooth regarding the Irish language.

IRISH LANGUAGE OFFICE ✉ oifig.nagaeilge@mu.ie

The Irish Language Office promotes the Irish language and its associated Arts and culture amongst staff and students. If you have an interest in the events and services of Oifig na Gaeilge, join us and make the most of the opportunities available here! Follow the Irish Language Office on social media for the latest news and events:

NEW €19 MILLION SPORT SCIENCE CENTRE

The University is planning a three-storey extension to the Phoenix Sports and Restaurant Building. The new extension will include:

- > a state-of-the-art student gym
- > a sports / multi-purpose hall
- > changing facilities

MU hopes that the provision of these extensive modern gym facilities will encourage students to visit the gym regularly, improving their physical fitness, reducing stress levels and promoting mental wellbeing.

The new centre will also provide students and staff with enhanced educational opportunities in a purpose-built facility with a modern and comfortable teaching environment. The new Sport Science Department and the Sports Office will both be located in the complex, fostering collaboration and mutual support between the two.

MAYNOOTH UNIVERSITY

CAMPUS FACILITIES

The campus spans extensive grounds with the older complex of fine nineteenth century buildings on the South Campus and a modern complex of teaching, research, accommodation and support facilities on the North Campus. Some of our campus facilities are outlined here.

STUDENT ACCOMMODATION

FIRST YEAR STUDENTS

Approximately 1,200 students live on campus. The main campus accommodation is situated just a short walk to all lecture, sports and recreational facilities on the North Campus.

Currently 50% of all campus accommodation is reserved for new first year students. The average annual cost for a room in Student Residences on campus runs from between €5,500 to €7,000 depending on choice of room and facilities.

Full details of how to book a room are updated each year on the Student Residences Office webpages. A booking fee is payable to confirm a booking.

Entrance Scholars (over 575 points) have a guaranteed option of residing on campus (normal charges apply). See page 8 for more details.

www.maynoothuniversity.ie/student-residences

 on webchat

IRISH LANGUAGE ACCOMMODATION / SCÉIM CHÓNAITHE

We reserve rooms on campus in the Scéim Chónaithe where students have the opportunity to use the Irish Language as their day-to-day language and can get involved in Irish cultural events and activities.

OFF-CAMPUS ACCOMMODATION

MaynoothStudentpad.ie is a self-service, online off-campus accommodation listing service for registered Maynooth University students. There are different accommodation options to choose from in Maynooth and the surrounding towns and villages, such as rooms to rent in owner occupied homes (the traditional 'digs' style accommodation), as well as private rented apartments and houses.

For more information please visit:

MaynoothStudentpad.ie

SHORT-STAY OR OCCASIONAL ACCOMMODATION

Maynooth Campus offers short-stay or occasional accommodation in standard and en-suite rooms. The South Campus rooms are ideal for frequent/repeat short stays, e.g. students who need a room every Tuesday and Wednesday night during timetable weeks. Also a good option for ad hoc stays, e.g. if studying late or avoiding the commute now and again. Special rates apply for frequent, multiple-night stays. Once students know their schedule for the semester, they simply fill out the frequent stay form (link available via the website below) with the required dates and, subject to availability, Maynooth Campus will confirm. They offer a reasonable cancellation policy, flexible ways to book, long opening hours and special student rates.

www.maynoothcampus.com

SPORTS FACILITIES INCLUDE:

- > Sports halls
- > Fitness centre
- > Fully equipped gym
- > Weights room
- > Changing rooms
- > Outdoor fitness area featuring 60m sprint track and calisthenics equipment
- > Floodlit natural turf playing fields
- > Floodlit all-weather playing pitch

The sports halls host activities including basketball, fencing, karate and archery. Weekly aerobics and circuit training sessions also take place in the sports halls.

The outdoor playing fields cater for Gaelic football, hurling, soccer, camogie and rugby. The nearby River Liffey plays host to MUCK – the canoe and kayak club. Walking, golf or horse riding are options at the nearby Carton Estate.

www.maynoothuniversity.ie/campus-life/sports

STUDENT STUDY & SOCIAL SPACES INCLUDE:

- > Study and social pods next to the Arts Building, adding over 90 seats to the Arts social and study zone;
- > The Arts Building Reading Room provides a quiet study space, with power plugs and wi-fi for all seats;
- > Study pods in the Iontas Building;
- > The Library has six bookable group study rooms;
- > The Student Common Room in the Arts Building has microwave and hot water access, along with additional seating for 230 students;
- > The renovated Amphitheatre at the rear of the Arts Building is a great place for students to meet and brings the Common Room into the outdoors;
- > Outdoor tent in the garden to the rear of the TSI building;
- > Clubs and Societies space over three floors of the Rye Building with activities room, meeting rooms in addition to kitchen facilities.

LIBRARY

The Library offers a wide range of study and social facilities including a café, laptop lending and WiFi. It is an eco-friendly building with a seeded roof and a range of technologies that minimise its impact on the environment.

With access to over **850,000 ebooks, 95,000 ejournals, 300 databases and over 460,000 print publications**, the Library help you to make the most of your time in MU. It has a range of study areas, laptops, PCs and group study rooms fully equipped with AV facilities.

The Library also has lots of spaces to relax including a Café, an Exhibition space and landscaped atrium. There are three energy pods to relax and recharge in as well as a sensory regulation pod, Cubbie. For more ways to unwind, they also have a Short Story Dispenser!

Library staff are here to help you find, use and manage information. Library Information Skills tutorials are on the website, and dedicated staff can help you at any time during the day in-person, via Library Chat, on social media, by email or phone.

www.maynoothuniversity.ie/library

CAFÉS AND DINING ON CAMPUS

- > Nourish – Arts Building
- > Phoenix Food Court – Phoenix Building
- > Griolladh – John Hume Building
- > Starbucks – The Library
- > 53.3 Degrees – TSI Building
- > Students' Union Bar – North Campus
- > Pugin Hall – St. Patrick's House on the South Campus

*Venue names and product offerings can change.

MU'S MOST POPULAR LEVEL 8 DEGREE

The Maynooth Bachelor of Arts Degree MH101 has been among the most popular MU degrees for a number of years, attracting thousands of applications annually.

WORK PLACEMENT

48+ MU undergraduate and postgraduate courses include an accredited placement internship period.

UNIQUE FLEXIBLE CURRICULUM

Many of our students enjoy flexibility and choice in their degree programme pathway.

“My career so far has been an exciting journey of growth. After completing my undergraduate studies at Maynooth University, I pursued a Professional Masters of Education, deepening my passion for English, History, and teaching.

I started my teaching career as a Special Education Teacher (SET) for one year, where I gained invaluable experience supporting diverse student needs. Now in my second year as an English and History teacher, I continue to develop my skills, fostering a love of learning in my students, while applying the knowledge and experiences I’ve gained throughout my educational journey.

Directing the school musical during the 2023/2024 academic year was a transformative experience for me as a teacher. It allowed me to connect with students in a creative and collaborative way, encouraging them to step outside their comfort zones and shaped me into a more patient, adaptable, and empathetic educator while also reinforcing the power of creativity and teamwork in learning.

My time as an undergraduate student at MU offered me endless ways to grow and challenge myself. It’s a place where I always felt, and always will feel, at home. The student-centred environment fostered a sense of belonging and allowed me to thrive both academically and personally. Getting the opportunity to study in Graz, Austria, was a highlight of my university experience, offering a fresh perspective and the chance to connect with people from around the world. Immersing in a new culture and education system pushed me to grow, making my academic journey unforgettable and shaping my outlook in lasting ways.”

Niamh Lynch

Secondary School Teacher, Kildare Wicklow Education Training Board

THE MAYNOOTH BACHELOR OF ARTS DEGREE

Section 1

CAO Code: MH101

Points 2025: 300

Subjects available in the BA degree:

Accounting	31
Anthropology	32
Business (International)	33
Business (Management)	34
Business (Marketing)	35
Chinese Studies	36
Classical Studies	37
Computer Science	38
Criminology	39
Economics	40
English	41
Finance	42
French	43
Gaeilge Nua-Ghaeilge (Modern Irish)	44
Geography	46
German	47
History	48
International Development	49
Law	50
Mathematical Physics	51
Mathematical Studies	52
Mathematics (Pure)	53
Media, Film & Cultural Studies	54
Medieval Celtic Studies	55
Music	56
Music Technology	57
Philosophy	58
Politics	59
Psychological Studies	60
Sociology	61
Spanish	62
Statistics	63

The Maynooth Bachelor of Arts Degree

CAO Code: **MH101** | CAO Points 2025: **300**

Places: 1,750**Duration:** 3 years (4 if taking Erasmus/Study Abroad option)**Erasmus/Study Abroad Option:** Yes**Mature Applicants:** See p. 156**UK, EU & International Applicants:** See p. 159**QQI Link:** See p. 156**Leaving Certificate:** 2H5 & 4O6/H7, Irish, English & 3rd language

(Minimum grade H5 in two subjects and a minimum of grade O6/H7 in the remaining four subjects. Minimum O6/H7 in Irish, English and a third language)

These BA subjects have extra Leaving Certificate minimum entry requirements:

- > Mathematics (Pure): **H2 Mathematics**
- > Music: **H5 Music**
- > Nua-Ghaeilge: **H4 Irish**

For these BA subjects we recommend that students have achieved the following grades as a minimum in their Leaving Certificate:

- > Accounting, Business (International), Business (Management), Business (Marketing), Economics, Finance: **O4/H7 Mathematics**
- > Computer Science, Mathematical Physics, Mathematical Studies, Music Technology, Statistics: **O3/H7 Mathematics**
- > Chinese Studies, French, German, Spanish: While there is no minimum entry requirement to study these languages at non-beginner level, we generally recommend H4 Leaving Certificate level.
- All other BA subjects - no prior knowledge required.

1st year: 60 credits

- > Choose 2, 3 or 4 subjects - one per group - see table on p. 29 (each subject is 15 credits)
- > Double subjects have a 30 credit option in 1st year. You can take 2 double subjects in 1st year, but only one subject from each timetable group. You should only take 2 double subjects if you are really sure of your subject choices
- > Optional Critical Skills is available with all subject combinations (1st year subject only). See p. 14 for details

Your options - summary

4 subjects (4 x 15 credits)	This allows you to study the greatest range of subjects and decide which you prefer
3 subjects and Critical Skills (4 x 15 credits)	This allows you to take a range of subjects and also take the Critical Skills course
A double subject and two others (1 x 30 credits and 2 x 15 credits)	This allows you to take three subjects, but to devote half of your time to one subject
A double subject, one other subject and Critical Skills (1 x 30 credits and 2 x 15 credits)	In this option you take two subjects along with the Critical Skills first year course
Two double subjects (2 x 30 credits)	In this option you take only two subjects in first year

2nd year and Final year: 60 credits per year

- > In most cases students progress with two subjects, choosing between:
 - Double Major (30:30)
 - Major with Minor (40:20)
- > In some cases a Single Major (normally 60 credits) option is possible. See MH101 subject pages for details
- > After 1st year there may be an option to transfer into the 2nd year of a specialised degree, depending on the subjects you chose in 1st year and your results

These are the possible transfer options having successfully completed the first year of the MH101 degree:

BSc Quantitative Finance	MH402
BA Accounting and Finance	MH403
Single Major BBS or BBA (Business and Management / International Business / Marketing / Business and Global Cultures)	MH404
BBS/BBA Business and Accounting	MH407
BBA Business and Languages	MH409
BBS/BBA Finance (NEW)	MH410
BSc Economics	MH415
BA International Economics	MH416
LLB Single Major	MH501
BCL Double Major (Law and Arts / Law and Accounting / Law and Business / Law and Criminology)	MH502
BA Criminology	MH504
BSc Computer Science and Software Engineering / BSc Multimedia, Mobile and Web Development (through Arts)	MH601

Update Feb 2026:
New transfer pathway into MH111 BA Creative Writing and English

- > Electives: in 2nd year, you will have the opportunity to take an optional Elective. Not all Electives are compatible with all subjects in MH101. See p. 14 for details.
- > Erasmus or Study Abroad: BA students have the option of studying at one of Maynooth's almost 200 partner universities after second year. Students taking this option graduate with a BA International degree after four years.

The Maynooth Bachelor of Arts Degree (continued)

Subject groups - choose 1 subject per group, up to a maximum of 4 subjects in the MH101 degree

Group 1

- Geography ○
- German ○
- Law ○
- Mathematics (Pure) (Groups 1+3) □
- Philosophy
- Critical Skills

Group 2

- Business (International) ○
- Business (Management) ○
- Business (Marketing) ○
- Criminology
- History ○
- Music[^](extra 15)
- Critical Skills

Group 3

- English ○
 - International Development ○
 - Mathematical Studies
 - Mathematics (Pure) (Groups 1+3) □
 - Critical Skills
- Nua-Ghaeilge new 15 credit option in group 3 - only available when choosing Nua-Ghaeilge in group 4 (30 credit double Nua-Ghaeilge)

Group 4

- Anthropology ○
- Economics
- Finance
- Music Technology
- Nua-Ghaeilge
- Critical Skills

Update Feb 2026: Nua-Ghaeilge now available as a double subject in 1st year

Group 5

- Computer Science ○
- Music ○
- Sociology
- Spanish ○
- Critical Skills

Group 6

- Accounting ○
- Chinese Studies ○
- Classical Studies
- French ○
- Geography ○ *
- Mathematical Physics
- Media, Film & Cultural Studies
- Medieval Celtic Studies
- Politics
- Psychological Studies
- Statistics#
- Business (extra 15)
- English (extra 15)
- Critical Skills

Group 7 (subjects in group 7 are only available if taking the 30 credit option in these subjects)

- Anthropology (extra 15)
- Chinese Studies (extra 15)
- Computer Science (extra 15)
- French (extra 15)
- German (extra 15)
- History (extra 15)
- International Development (extra 15)
- Law (extra 15)
- Spanish (extra 15)
- Language and Culture (this subject is available for non-beginners)

Key

- This subject can be taken as a double (30 credits)
- 30 credits required for beginners in this language
- (extra 15) This indicates the timetable group of the extra 15 credits if taking 30 credits of the subject
- * If choosing Geography in Group 6, the only subject you can choose in Group 1 is Geography (this is due to timetabling of subjects in 2nd year)
- 30 credits must be taken in this subject
- [^] Music in group 2 is only available when choosing Music in group 5 (30 credit double Music)
- # If you are taking Statistics in 1st year you must also take Mathematical Studies or Mathematics (Pure)

Note

1. Each subject is 15 credits and students take 60 credits in each year of their degree. Subjects available as optional 'double subjects' (30 credits) are marked with ○. These subjects need extra class times, normally scheduled in Groups 6 or 7.
2. Chinese Studies, French, German and Spanish require a 30 credit first year for beginners in the language (marked with ○). If you have studied one of these languages before (to Leaving Certificate level; H4 standard or better is recommended), you take the 15 credit option.
3. 15 credits of optional Critical Skills is available with all subject combinations, but is a 1st year subject only. See p. 14 for more about Critical Skills.
4. For the following subjects, we **require** specific minimum Leaving Certificate grades at registration in September:
 - > Mathematics (Pure): **H2**
 - > Music: **H5**
 - > Nua-Ghaeilge: **H4**
5. If choosing from among the following subjects, we **recommend** students achieve these minimum Leaving Certificate grades:
 - > Accounting, Business (International), Business (Management), Business (Marketing), Economics, Finance: we **recommend** that students have achieved Leaving Certificate **O4/H7 Mathematics** to study these subjects.
 - > Computer Science, Mathematical Physics, Mathematical Studies, Music Technology, Statistics: we **recommend** that students have achieved Leaving Certificate **O3/H7 Mathematics** to study these subjects.
 - > Chinese Studies, French, German, Spanish: while there is no minimum entry requirement to study these languages at non-beginner level, we generally **recommend H4 Leaving Certificate** level.

The Maynooth Bachelor of Arts Degree (continued)

MH101 students enjoy a wide and flexible Bachelor of Arts degree, which includes over 30 subjects, allowing for personalised and interdisciplinary study paths.

“Since graduating with a BA degree in Music Technology, I’ve built a dynamic career in audio-visual production. I began as an Audio Post Production Engineer at Telegael, followed by roles as a Radio Producer and Presenter of Good Morning Dublin at Dublin City FM.

While freelancing as an audio engineer, I saw a gap in the market for an engineer with both audio and visual skills. This led me to accepting a full-time role with Creative Technology where I was able to learn and develop into an Audio Visual engineer. From there, I became an AV Coordinator in the Aviva Stadium before moving on to a similar role in the Royal College Of Surgeons.

I then joined Facebook as an AV/Streaming Engineer, producing high-profile events featuring leaders such as Mark Zuckerberg and Nicola Mendelsohn. For the past three years, I’ve been a Senior Broadcast Engineer at Salesforce, delivering global broadcasts with senior executives such as Marc Benioff, Bret Taylor and Arundhati Bhattacharya.

The assignments at Maynooth nurtured my passion for music; blending creativity and technicality. A highlight was producing an album for my final project, collaborating with friends on various instruments. The University was an incredible place to build lifelong friendships across different fields of study, while also providing the technical and co-ordination skills that have been the foundation of my career.”

Keri Shaughnessy
BA Music Technology Graduate

After graduation

- > As an arts graduate you will have versatility on your side. Some seek graduate employment while others opt for postgraduate specialisation.
- > Over the course of your three or four year degree you are given the opportunity to gain valuable skills including the hugely important ability to think critically and analytically. Our Arts students are encouraged to become flexible thinkers who are ready for the challenges of the modern workplace in the years following graduation. For more about postgraduate study see page 163.

Some of the areas in which Maynooth BA graduates develop their careers include:

- > Arts and culture
- > Civil service
- > Computing and IT
- > Finance
- > Human resources & training
- > Law
- > Librarianship
- > Management consultancy
- > Marketing and advertising
- > Media and communications
- > Medicine (graduate entry programmes)
- > Psychology
- > Public relations
- > Publishing and information
- > Social policy
- > Teaching – primary and second level
- > Translation

Accounting (group 6 subject)

MH101 Points 2025: 300

Minimum entry requirements for Accounting in MH101: recommended minimum O4/H7 Leaving Certificate Mathematics.

For full details about entry requirements see page 28.

Subject Overview

- > Accounting is the language of business. You can choose to study Accounting in the BA degree or to transfer into one of our designated accounting programmes having completed first year in the BA degree. Designated degrees (BA Accounting and Finance, BBS Business and Accounting, BBA Business and Languages, and BCL Law and Accounting) have full CAP 1 exemptions.
- > Our expert, engaging and supportive faculty teach accounting from first principles, so no prior knowledge is required.
- > Become a highly sought-after graduate possessing the technical accounting and transferable skills required of future business leaders which allows students to pursue rewarding career opportunities in business and education.
- > Choosing this degree also enables students to pursue a career in teaching.

After Graduation

- > Our accounting programmes prepare students for a variety of careers in both the private and public sectors, and in many industries.
- > Graduates of specialised degrees MH403, MH407, MH409 and MH502 LWA are particularly well placed to pursue a professional accountancy qualification.
- > Typical career options include accountant in practice/industry, finance director, managing director, management consultant, liquidator/receiver, financial analyst, stockbroker, tax consultant, treasury consultant and teacher.
- > The School of Business offers a range of postgraduate courses in Accounting and related areas.

MH101 Course Structure

1st year

Accounting in MH101 Bachelor of Arts degree.

- > Students are introduced to the fundamentals of accounting in year 1
- > There is an option to take Accounting as a double subject where students take additional accounting/finance related modules. 22.5 of the credits occur in Group 6 (7.5 credits in semester 1, and 15 in semester 2)
- > The other 7.5 credits in semester 1 is a choice between a Business Management Module (MN157 - Professional and Learning Skills) in Group 2, or a Universal Critical Skills SK1057 course which is available in every group (as part of our Critical Skills)
- > Choose 2 or 3 other subjects, which may include Critical Skills, from the available groups (maximum 1 subject per group)

2nd year and Final year

- > Take Accounting and one other subject to degree level (as a Double Major)

Erasmus/Study Abroad option after 2nd year

Or

- > Apply to transfer into one of our specialised degrees in Accounting having achieved 60% or more in 30 credits of 1st year Accounting (MH403/MH407/MH409/MH502 LWA – subject to conditions being met. See Course Finder for details)

Erasmus/Study Abroad option after 2nd year

For MH101 subject groups table go to page 29

Sample Modules

1st year

- > Introduction to Accounting
- > Financial Accounting
- > Fundamentals of Finance and Accounting
- > Professional and Learning Skills

2nd year

- > Financial Accounting
- > Management and Cost Accounting
- > Taxation

Final year

- > Advanced Management Accounting
- > Advanced Financial Accounting
- > Ethics and Corporate Governance
- > Advanced Financial Reporting
- > Advanced Finance for Accountants

Anthropology (group 4 subject)

MH101 Points 2025: 300

Minimum entry requirements: For full details about entry requirements see page 28.

Subject Overview

- > Anthropologists study all aspects of human behaviour and society. By closely observing and analysing different ways of life around the world, from tribal villages to corporate offices, anthropologists create new knowledge about human nature and what it means to be human today.
- > Whatever you are most passionate about, from understanding human cultures to identity politics, environmentalism, or global business, anthropology can give you the tools to enrich your interests in a deep and sophisticated way. Anthropology is well-suited to students curious about many inter-connected topics, and it fosters creativity and imagination by helping us to think beyond our own pre-conceived world views.
- > Maynooth University anthropologists bring the world into the classroom, helping students understand local problems in a global context. We actively engage with many pressing concerns, including aging populations, nationalism, citizenship, racial discrimination, security and surveillance, religion, international migration, drug use, health problems such as epidemics or mental health, consumer culture and sustainability, as well as rapid technological change.
- > You can also study forensic anthropology, which applies skeletal analysis and archaeological techniques to solve criminal cases. You will engage in practical, experiential learning, including ethnographic fieldwork projects, and there is an option to go on an archaeological dig during your studies.

After Graduation

- > Maynooth Anthropology graduates have gone on to work in the public, private, and non-government sectors. They have established successful careers in areas as diverse as healthcare, user experience and design, international aid and development, advertising and human insights research, culture and arts, heritage and conservation, security, community research and education, advocacy and activism, journalism, management and business, human resources, and public administration.
- > The Department of Anthropology offers a range of postgraduate study options at Diploma, Masters, and Doctoral levels.

- > Heritage and Museums
- > Anti-Racism

Final year

You will continue to develop your knowledge with options such as:

- > Globalisation, Science, Technology & Society
- > Sustainability & Ethnographies of Water
- > Race, Gender, & Sexuality
- > Forensic Anthropology
- > Ethnographic Filmmaking & Photography
- > User Experience and Service Innovation

Business (International) (group 2 subject)

MH101 Points 2025: 300

Minimum entry requirements for Business (International) in MH101: recommended minimum O4/H7 Leaving Certificate Mathematics.

For full details about entry requirements see page 28.

Subject Overview

- > To effectively compete in an international business landscape, organisations must offer goods and services across nations, regions, and continents outside of their home market and must also manage increasingly diverse workforces as nations, cultures, and markets converge.
- > Business (International) provides our graduates with the strategies, insights and skills to respond to these challenges, enabling organisations to manage diverse people and operations and to compete for customers across the world.
- > International Business students at Maynooth are offered a wide variety of choice. We offer modules that will develop both core business management knowledge as well as modules that provide a more specialist understanding of the international aspects of business.

- > The degree also provides valuable insights for those wishing to take their natural talents for building or running a business to the next level. With business being ever more global, completing this degree could literally take you anywhere in the world! The School of Business also offers a range of postgraduate programmes for International Business graduates.

After Graduation

- > Ireland is home to the EMEA (Europe, Middle East and Asia) headquarters of many large multinational corporations, providing excellent employment opportunities for students of International Business. This degree provides an excellent foundation for a wide variety of careers in business, including entering employment in the Irish operation of a major multinational, working with Irish companies that supply to international customers, consulting and helping organisations to internationalise and grow, and managing a diverse workforce.
- > Opportunities are also available at a policy level working for national organisations to promote Ireland as a destination for inward investment and for internationalising Irish business.

1st year

- > Global Business and Marketing
- > Organisational Behaviour and Management

2nd year

- > International Business
- > International Management
- > Introduction to Management Information Systems

Final year

- > Managing Multinational Corporations
- > Strategic Management
- > Strategy Simulation
- > Sustainable Business and Responsible Management

Business (Management) (group 2 subject)

MH101 Points 2025: 300

Minimum entry requirements for Business (Management) in MH101: recommended minimum O4/H7 Leaving Certificate Mathematics.

For full details about entry requirements see page 28.

Subject Overview

- > **Management is about taking ideas and converting them into action: designing, making, and delivering products and services that customers and citizens want or need. Essentially, it is about organising to get things done. As such, managers are generalists and organisers; they need to know the fundamentals of all major aspects of business, from thinking about the business as a whole and its strategic direction, to organising the workforce, managing the effective use of information technology, managing supply chains locally and globally, and effectively managing costs and revenues.**
- > **Our faculty are a blend of international and local experts who bring profound insights into the practicality and complexity of Management. Business (Management) at Maynooth offers students insights into all of the major functions of business, as well as the flexibility to undertake specialist options in the subjects you enjoy so that you can shape your degree based on your own strengths and interests.**
- > **Transfer from the MH101 degree into the 2nd year of the MH404 degree is possible. See the course structure below for details.**

After Graduation

- > Typically Business graduates enter employment as general management graduate trainees in service or manufacturing organisations; work as functional specialists in areas such as marketing, sales, operations, management information systems, or human resource management; or undertake specialist masters in one of these disciplines. Careers in consulting, public service, and not-for-profit organisations are also popular.
- > If you are interested in a career as a second level teacher of business, Business (Management) is the subject to choose from the three business subjects available in MH101.
- > Many of our graduates choose to specialise further with a postgraduate degree; the School of Business also offers a range of postgraduate programmes for Business graduates.

Business (Marketing) (group 2 subject)

MH101 Points 2025: 300

Minimum entry requirements for Business (Marketing) in MH101: recommended minimum O4/H7 Leaving Certificate Mathematics.

For full details about entry requirements see page 28.

Subject Overview

- > **Marketing is a wide and varied discipline, connecting a firm to its customers in the marketplace. It is fast-paced and dynamic, interlinking with every other area of business to understand how value is created and captured for the company and its customers. Marketers must understand customers' needs, how they behave and why they buy, so that businesses can build long term relationships with them. Using both traditional and digital tools, marketers deliver value through creating innovative products and services to meet marketplace needs.**
- > **Our approach to Marketing provides students with a deep understanding of the marketing function, as well as wider management and business processes so you can deliver value to customers and your organisation. Options are available which allow you to specialise your degree according to your strengths and interests in the topic areas you enjoy most.**
- > **Creating and managing customers are central themes to what we teach and research at the Maynooth University School of Business. Our faculty bring a rich and diverse expertise from both local and international markets across a broad range of topic areas, including digital marketing, online retailing, branding, communications and consumer behaviour. Together we offer students deep insights into the practicalities and applications of marketing, from what makes customers tick to how to make the best of market opportunities.**

After Graduation

- > Business graduates are consistently among the most employable in the Irish education system. Marketing careers include roles in advertising, brand management, digital marketing, international marketing, customer account management, public relations, sales, and social media marketing.
- > Typically, marketing graduates enter employment in a marketing role in either a private, public or not-for-profit organisation; enter employment in an organisation in a business role; or continue their education with a postgraduate degree.
- > The School of Business also offers a range of postgraduate programmes for Marketing graduates.

Chinese Studies (group 6 subject)

MH101 Points 2025: 300

Minimum entry requirements: While there is no minimum entry requirement to study non-beginner Chinese, we generally recommend H4 Leaving Certificate Mandarin Chinese.

Beginners: no minimum requirement in Chinese.

For full details about entry requirements see page 28. If taking up Chinese Studies as a beginner, it is advisable to attend all lectures from the first week of term.

Subject Overview

- > **Chinese Studies is offered at two levels, one for absolute beginners and one for those who already have some prior knowledge of the language. A wide range of subjects including Chinese language, culture, society and history are covered in this course.**
- > **In third year you will have the exciting opportunity to study in one of Maynooth University's partner universities in China. This will improve your language ability, foster intercultural competence and help you to acquire the skills and confidence that you need in today's job market. Throughout your year abroad Maynooth University's International Office and Beijing office staff will be there to support you.**
- > **Learning Chinese connects you to over 1.3 billion speakers of Mandarin Chinese worldwide. As Ireland rapidly expands its trade in goods and services with China, there is a growing demand for graduates with strong Chinese language skills and an understanding of Chinese society and culture.**
- > **The introduction of Mandarin Chinese as a curricular subject for the Leaving Certificate examination means that there is an emerging need for teachers of Chinese at post-primary level.**

After Graduation

- > As a Maynooth graduate of Chinese Studies you are in a prime position to take advantage of the existing links between Ireland and China. Your language skills and knowledge of Chinese culture will open doors for you in international trade and commerce, education, international relations and diplomacy, business, politics, or the media.
- > If further study is an option for you then you may continue with the MA, MLitt or PhD programmes in Chinese Studies currently offered by Maynooth University.

MH101 Course Structure

1st year

BA Bachelor of Arts – Chinese Studies – Double Major or as a Minor

- > Either 15 credits of Chinese Studies (if you studied Mandarin Chinese in school to the recommended H4 Leaving Certificate or you have an equivalent level) or 30 credits of Chinese Studies (if you are a beginner)
- > Non-beginners are strongly recommended to take Language and Culture as a subject in 1st year and to select the modules on Chinese Language and Culture. This is especially important if you intend to take the language on to degree level
- > Choose your other subjects, which may include Critical Skills, from the available groups (maximum 1 subject per group – see groups table p. 29)

2nd year and Final year

- > Chinese Studies is taken with another subject in 2nd and 3rd year as part of a Double Major or as a Minor
- > Transfer option in 2nd year - into the Business and Languages degree MH409 - for students who have completed the first year of the BA degree (MH101) taking at least 15 credits of a Business subject and passing 30 credits of beginners/15 credits of non-beginners Chinese Studies
- > Optional 10 credit Elective in 2nd year (see p. 14 for details)

Study Abroad option after 2nd year

For MH101 subject groups table go to page 29

1st year	2nd year	3rd year	Final year
> Chinese Language > Introduction to Chinese Culture	> Chinese Language > Television, Film and New Media > Gender, Class and Society in China > Chinese Social Theories > Comparing China and the West	> In year three, students have the option to study in one of Maynooth University's partner universities in China	> Chinese Language > Readings in Contemporary Chinese Culture and Current Affairs (Translation of current affairs publications Chinese – English, English – Chinese) > Project-based Learning

Classical Studies (group 6 subject)

MH101 Points 2025: 300

For full details of MH101 minimum entry requirements see page 28.

Subject Overview

- > **Classical Studies involves study of the history, literature, art, philosophy, and mythology of the ancient world; a survey that focusses on, but is not limited to, ancient Greece and Rome. The modern world's engagement with the Classical legacy, our reception of the past, is a key interest too.**
- > **As the original interdisciplinary subject, Classical Studies spans an immense range of human experience over some 1,700 years, from the mythic age of the Greek heroes through to the “fall” of the Roman Empire. The subject offers an all-round education that complements many other courses, laying the foundation for success in many careers and walks of life.**
- > **The complexities and diversity of ancient cultures are studied from many perspectives. Themes explored in individual modules include mythology and the gods; war and heroism; civilization and the ‘barbarian’; ideologies of power and empire; people and elites; gender and sexuality; ideas of justice, law, happiness, and the holy.**
- > **In Maynooth University, our smaller class sizes and friendly staff allow students to get individual attention and feel at home. No previous knowledge of the subject is required or expected, and all material is studied in English translation. However, beyond first year, there are optional modules in Ancient Greek and Latin, should the languages be of interest to students.**

After Graduation

- > In our fast-changing world, many employers look for graduates who are flexible, creative, and open-minded, who can handle a variety of material and perspectives, conduct independent research, write, and communicate effectively. All these qualities and transferable skills are developed throughout the degree in Classical Studies.

- > Its interdisciplinary nature is therefore highly valued as an ideal preparation for careers in education, the civil service, law, business, consultancy, journalism, librarianship, publishing, and cultural and heritage organisations.
- > Our graduates in Classical Studies have gone on to careers across the public and private sectors, in teaching and academia, business and finance, publishing and the media.

BA Bachelor of Arts – Classical Studies – Double Major, Major/Minor, or as a Minor. Classical Studies and another subject to degree level.

- > 15 credits of Classical Studies
- > Choose 2 or 3 other subjects, which may include Critical Skills, from the available groups (maximum 1 subject per group – see groups table p. 29)

2nd year and Final year

Classical Studies as a Double Major, a Major/Minor, or as a Minor from 2nd year

- > Continue with 1 of your 1st year subjects
- > Optional modules in both Ancient Greek and Latin are also available
- > Optional Study Tour module available
- > Optional 10 credit Elective in 2nd year (see p. 14 for details)

Erasmus/Study Abroad option after 2nd year

For MH101 subject groups table go to page 29

Sample Modules

1st year

First year offers students an introduction to the ancient world across two semesters:

- > “Gods and Heroes” introduces the world of ancient Greece – its mythology, literature, and history. It starts with the epic world of Homer’s Odyssey before turning to the cultural history of Athens. The story of that city’s rivalry with Sparta, and their wars against the Persian Empire, is one for the ages.
- > “Making Rome” considers the making and unmaking of the Roman Republic. Its fortunes were shaped by such figures as Pompey, Cleopatra, Cicero, and Caesar. This module explores their lives and those led by ordinary Romans: men and women, children and adults, senators, and slaves.

2nd year and Final year

A sample of modules available beyond first year:

- > Tragic Tales from Classical Greece
- > Gender & Sexuality in the Ancient World
- > Love, War and Power in Roman Epic
- > Alexander the Great: Fire from Heaven
- > A World Full of Gods
- > Classical World in Modern Media
- > Human Nature and the Environment
- > Study Tour

Computer Science (group 5 subject)

MH101 Points 2025: 300

Computer Science in MH101: recommended minimum O3/H7 Leaving Certificate Mathematics

For full details about entry requirements see page 28.

Subject Overview

- > **Computer Science at Maynooth University is the study of the principles and use of computers and software.**
- > **Advanced topics such as computer vision, theoretical computer science, robotics, cryptography and artificial intelligence may be studied, depending on the pathway students take.**
- > **Students enjoy the huge benefit of studying other Arts subjects with Computer Science in first year. This lends graduates a wider frame of reference. There is a wide variety of options after first year.**
- > **The Department of Computer Science at Maynooth University was founded in 1987 and is located in the Eolas Building, a €20M state-of-the-art ICT hub. Our laboratories and equipment provide excellent facilities for practical work and all our courses include a mix of lectures and lab work.**
- > **We provide a supportive learning environment with extensive supports available during practical work, and a dedicated Computer Science Centre to support all students to flourish.**

After Graduation

- > Some of the areas that you could expect to work in after graduation include graphical interface design, medical imaging, video-based information systems, multimedia/web development, electronic publishing, computer assisted translation, e-learning systems development, games development, software development.

- > Non-computing industries: financial services, business and administration, health services, and the automobile and aeronautics sectors.
- > The Department of Computer Science offers a range of postgraduate study options.

Criminology (group 2 subject)

MH101 Points 2025: 300

For full details of MH101 minimum entry requirements see page 28.

Subject Overview

- > **Criminology is the study of crime, criminal behaviour and the criminal justice system. It is sometimes referred to as the study of the making of laws, the breaking of laws and of society's reaction to the breaking of laws, signalling the three main branches that make up the subject.**
- > **Maynooth University is the only University in the Republic of Ireland offering the opportunity to study Criminology as part of an Arts programme. In the MH101 degree you can choose Criminology in combination with other Arts subjects (including Law, Psychological Studies etc.) in first year, and then choose to continue with Criminology in second and third year.**
- > **MH101 students who successfully pass first year, taking Criminology as one of their subjects, may transfer into second year of the BA Criminology degree MH504.**
- > **MH101 students who successfully pass first year, taking at least 15 credits of Law and 15 credits of Criminology, have the option to transfer into second year of the BCL (Law and Criminology) degree.**
- > **Unique interdisciplinary programme with perspectives from sociology, psychology and anthropology as well as law.**
- > **Flexibility and choice, including options to transfer degree.**

- > The skills you will gain from studying criminology are also highly transferable to other areas, including: law, journalism, social research, social work, counselling, community work, policy analysis and public administration.
- > The School of Law and Criminology also offers a range of postgraduate study options in related fields.

1st year

- > Exploring Criminology: What is crime? What is theory and why is it important? Spotlights on key crime categories such as homicide and terrorism. Key skills to study criminology at university level
- > Introduction to different models of criminal justice and the key personnel (police, judiciary, prison officers) involved in the criminal justice system

2nd year

- > Core modules such as Policing, Research Methods, Criminological Theory and Crime and the Media
- > A range of optional modules including perspectives from anthropology (Ethnographies of Crime and Policing), sociology (Society and State) and Criminology (Mental Health and the Criminal Justice System; Gender, Crime and Criminal Justice; Ethnicity, Crime and Punishment)

Final year

- > One core module on Punishment, Penal Policies and Prisons
- > A range of optional modules such as: Criminal Psychology; Victimology; the Psychology of Terrorism; the Politics of Mass Incarceration; Crime, Death and Forensic Anthropology

Economics (group 4 subject)

MH101 Points 2025: 300

For full details about entry requirements page 28.

You do NOT need have taken Leaving Certificate Economics to study this subject at Maynooth University but we recommend O4/H7 in Leaving Certificate Mathematics.

Subject Overview

- > Economics is a social science that helps us to understand the behaviour of decision makers such as consumers, firms, workers, governments, investors, central banks and regulators.
- > Economics is not all about money and profits. Economics tackles problems such as: how to reduce gender inequality and racial discrimination; how to encourage international cooperation to address climate change; how to break the poverty trap in less-developed countries; how to solve the housing crisis.
- > Economics provides a framework for understanding these societal problems and using that understanding to make evidence-based policy recommendations.
- > Economists often use statistical techniques to understand markets and how people respond to incentives.
- > Economists also use game theory to analyse strategic interactions between firms, or other market participants.
- > An Economics education provides students with outstanding analytical and problem-solving abilities, including numerical and computing ability, as well as enhanced communication and presentation skills. These skills are highly valued by employers in all sectors from government to financial services.

After Graduation

- > Our alumni are in a wide variety of private and public sector jobs such as banking, financial services, management consultancy, economic consultancy, journalism, teaching, politics. You can also pursue further study.
- > The Economics Department at MU is made up of a vibrant group of academics with an international reputation for excellence in research and have strong links with business and the wider economics community including the Central Bank, the ESRI and several financial services companies. Postgraduate study options are available.

English (group 3 subject)

MH101 Points 2025: 300

For full details of MH101 minimum entry requirements see page 28.

Subject Overview

- > **Beginning with words on a page, English is a world-facing subject: it takes you across historical periods, cultures, locations and genres, from poetry and drama to the novel, film, and creative writing too.**
- > **English at Maynooth University provides an exciting and rewarding student experience. Throughout your degree, you will be encouraged to engage in critical debate about the meaning and value of literature through lectures, tutorials, and seminars.**
- > **As a student of English, you will learn about:**
 - Different literary forms from poetry and drama to the novel and film, as well as creative writing.
 - The conditions that shape literature from history and geography to questions of gender, race, and class.
 - How literary texts enable us to understand our own complex world.
 - Different approaches to and theories of literature.
 - How different schools of critical thought or areas have shaped and reshaped the subject of English literary studies.

After Graduation

- > Engaging in critical debate about the meaning and value of literature will help you to foster your critical and creative abilities, develop awareness of the multi-dimensional nature of human situations, approach problems with an open and enquiring mind and gain analytical, finely-honed writing and critical thinking skills - all of which appeal greatly to employers.
- > Previous English graduates have been employed in a wide range of occupations, including journalism, the civil service, creative writing, the diplomatic service, business and management, marketing, advertising, librarianship, the arts and teaching.
- > Maynooth University Department of English boasts notable expertise in a wide range of literature from the early modern to the present day, and from Irish literature to American, African, Arab and global literatures. There is also the option of further study, and we offer a range of postgraduate courses.

Writing and English

MH101 Course Structure

1st year

**BA Bachelor of Arts – English – Single Major,
Double Major, Major/Minor or as a Minor**

English & 1 other subject to degree level.

- > Take either 15 or 30 credits of English
- > Choose 2 or 3 other subjects, which may include Critical Skills, from the available groups (maximum 1 subject per group – see groups table p. 29)

2nd year and Final year

- > English
- > Continue with 1 of your 1st year subjects
- > Optional 10 credit Elective in 2nd year (see p. 14 for details)

All students have the opportunity to take English as a Single Major, Major/Minor or Minor in 2nd year
Students with an average mark of over 50% in 1st year English can take English as a Single Major from 2nd year

Erasmus/Study Abroad option after 2nd year

For MH101 subject groups table go to page 29

Sample Modules

1st year

You will engage with a variety of texts, including political speeches, climate fiction, and plays and poetry from the US, Ireland, Britain, and the Caribbean. Your experience of literature will be enhanced through close reading, active discussion and writing exercises designed to develop your critical thinking and expression.

2nd year

You will be introduced to a broad thematic study of English literature via a wide range of historical periods and geographical locations – from the Early Modern to the present, from Ireland and Britain to Africa and America. You will begin to make your own choices about which areas of English you study. Your critical and creative skills will be developed through debate and discussion as well as through the drafting and editing of your written work, guided by experts in these fields.

Final year

You will explore literature in English at an advanced level and investigate some new areas of the discipline. You will have the opportunity to choose which areas you would like to explore to deepen your knowledge of more specialised areas of English. With advice and supervision from lecturers, you will plan and write essays based on some of your own interests in literature and on your own independent research and writing.

Finance (group 4 subject)

MH101 points 2025: 300

Minimum entry requirements for Finance in MH101: recommended minimum O4/H7 Leaving Certificate Mathematics.

For full details about entry requirements see page 28.

Subject Overview

- > Finance is the study of investment risk and reward. It examines the role of government and international organisations in the management and regulation of financial markets.
- > You do not need to have any previous knowledge of Finance, only an interest in how the financial sector and the economy works and a desire to know more.
- > The School of Business is made up of an accomplished group of academics with an international reputation for excellence in research and teaching.

After Graduation

- > Finance graduates have strong numeracy skills, coupled with an ability to think critically and analytically – invaluable assets in a wide range of professions. Graduates will also be proficient in market-leading financial applications such as Bloomberg.
- > Graduates can be found in the banking and financial services industry, economic consultancy, finance units of public and private sector organisations, financial research, journalism, and teaching in Dublin, London, New York, and around the globe.
- > Many of our students continue to further postgraduate study in Finance at Maynooth University.

French (group 6 subject)

MH101 Points 2025: 300

Minimum entry requirements: While there is no minimum entry requirement to study non-beginner French, we generally recommend H4 Leaving Certificate French.

Beginners: no minimum French requirement. For full details about entry requirements see page 28.

If taking up French as a beginner, it is advisable to attend all lectures from the first week of term.

Subject Overview

- > French has been studied at Maynooth since the foundation of the college in 1795. Maynooth University students enjoy studying French in a friendly, supportive environment at non-beginner level (Leaving Certificate H4 in French or equivalent recommended), or at beginner level (no minimum requirement).
- > If you would like to attain a high level of competency in a modern European and world language, spoken by 300 million people on several continents and in French territories overseas, studying French as part of our degree programme is the path for you.
- > Over the course of your degree programme, you will receive an excellent grounding in all aspects of French language through core modules in French Grammar, Writing in French, Oral Expression, and Listening Skills. In second year and final year, you may choose from a range of optional modules in French and Francophone culture, such as Politics and Ideas, Literature and Society, Women's Writing, Linguistics, Translation and Cinema (depending on availability).
- > What distinguishes French at Maynooth is a strong tradition of teaching the French language, literature and culture, with much teaching taking place through the medium of French (for those taking the non-beginner stream).
- > Maynooth has a network of exchanges with universities in countries where French is spoken. As part of this programme, you may spend a year studying at a French-speaking university or working as a language teacher in France (subject to availability). Students who successfully complete a year abroad as part of their programme are conferred with a 4-year BA International.

- > Students interested in teaching French should note that the Teaching Council of Ireland requires all registered teachers of French to have spent some time living in a French-speaking country. The Maynooth University School of Modern Languages, Literatures and Cultures advises at least a three-month residency.

After Graduation

- > Language skills are increasingly essential in the modern world and a degree in French offers students enhanced employability in a wide range of careers including the diplomatic service, development work with NGOs, education, publishing, working with EU institutions, translation and interpreting, banking and business, international trade, communications, or tourism.
- > Multinational companies, many of whom have bases in Ireland, often stress the importance of finding graduates who are not only fluent in languages but who have the intercultural competence to deal with colleagues and customers in an increasingly globalised world.
- > Our graduates have pursued careers in teaching, translating and interpreting, public service, banking and business, law, journalism and media, and a number of them have established their own businesses in French-speaking countries. Some graduates decide they would like to proceed into postgraduate study, and our students have been successful in securing funding to study at MA, M.Litt., MSc and PhD levels.

MH101 Course Structure

1st year

BA Bachelor of Arts – French – Double Major or as a Minor
You will engage with a wide range of texts, learning to recognise and analyse key features.

- > Either 15 credits of French (if you studied French in school to the recommended H4 Leaving Certificate or equivalent level) or 30 credits of French (if you are a beginner)
- > Non-beginners are strongly recommended to take Language and Culture as a subject in 1st year and to select the modules on French Language and Culture. This is especially important if you are hoping to take French on to degree level
- > Choose 2 or 3 other subjects, which may include Critical Skills, from the available groups (maximum 1 subject per group – see groups table on p. 29)

2nd year and Final year

- > French is taken with another subject in 2nd and 3rd year as part of a Double Major or as a Minor
- > Optional 10 credit Elective in 2nd year (see p. 14 for details)
- > Transfer option in 2nd year - into the Business and Languages degree MH409 - for students who have completed the first year of the BA degree (MH101) taking at least 15 credits of a Business subject and passing 30 credits of beginners/15 credits of non-beginner French

Erasmus/Study Abroad option after 2nd year

- All students of French Studies have the opportunity to spend the third year of their degree programme in a French-speaking country. This might involve:
- > Studying at a university in France (Erasmus programme)
 - > Assisting with English classes at a French school (ELA programme - subject to availability)
 - > Erasmus internship/placement (subject to availability)
- Students who avail of the Year Abroad can have this year recognised as part of their studies and thus convert their degree programme into a 4-year BA International.

For MH101 subject groups table go to page 29

Sample Modules

1st year

- > Written and spoken skills in French
- > Topics in French and Francophone culture and society

2nd year

- > Written and spoken skills
- > Modules on politics, culture, cinema, literature, linguistics and Francophone cultures

Final year

- > Recommended year abroad – Erasmus or language assistant
- > In final year (4th year if Erasmus or language assistantship option taken) you will choose from modules on literature, politics and culture in France and Francophone countries, linguistics, translation and other options

Gaeilge | Nua-Ghaeilge (ábhar ó ghrúpa 4)

Íosriachtanais iontrála: H4, ar a laghad, sa Ghaeilge ag leibhéal na hArdteistiméireachta (nó a chomhionann) riachtanach le staidéar a dhéanamh ar an Nua-Ghaeilge. Níl sruth do thosaítheoirí ar fáil sa Nua-Ghaeilge. Tá na sonraí go léir ar fáil ar leathanach 28.

Forléargas ar an ábhar

- > Déanann mic léinn na Nua-Ghaeilge staidéar ar an teanga (labhartha agus scríofa) agus ar ghnéithe den litríocht agus den chultúr.
- > Foghlaimíonn ár mic léinn faoin ilghnéitheacht agus faoin oidhreacht shaibhir atá ag an nGaeilge, chomh maith le scileanna a bheidh úsáideach dóibh le linn a saoil, is cuma cén ghairm a roghnóidh siad. Baineann siad an méid sin amach i Roinn atá cairdiúil agus oscailte agus atá tiomanta don Ghaeilge agus don fhoghlaim.
- > Tá ról lárnach ag an nGaeilge scríofa agus labhartha inár gcúrsa agus tugtar gach spreagadh do mhic léinn a scileanna labhartha agus scríofa a fheabhsú. Chuige sin, caitheann mic léinn tréimhse chónaithe sa Ghaeltacht de ghnáth.
- > Tugtar modúil ar an litríocht chomhaimseartha ionas gur féidir le mic léinn eolas grinn a chur ar fhilíocht, ar phrós agus ar dhrámaíocht na Gaeilge. Cuirtear modúil ar fáil fosta ar an litríocht a bhaineann le tréimhsí níos luaithe, ina measc sin, filíocht na mBard, an Fhiannaíocht, filíocht an 18ú haois agus an 19ú haois. Tá modúil roghnacha ar fáil ar Ghaeilge na hAlban, ar thraidisiún na hamhránaíochta, agus ar an ainmeolaíocht. Mar aon le ceardlanna praiticiúla agus ranganna teagaisc ar an nGaeilge scríofa agus labhartha, cuirimid modúil ar shochtheangeolaíocht na Gaeilge agus ar chanúineolaíocht na nuatheanga ar fáil.
- > Trí mheán na Gaeilge a bhíonn na léachtaí, na ranganna teagaisc, na ranganna oidis, agus na ceardlanna ar fad, agus déantar gach cumarsáid leis an Roinn trí mheán na Gaeilge. Cé go gcuireann cúrsa na chéad bhliana béim shuntasach ar an teanga scríofa (i.e. gramadach), ní theastaíonn réamheolas ar an ngramadach uait.
- > Tá ionad tacaíochta Gaeilge, An Droichead, ar fáil a chuireann cabhair ar fáil do mhic léinn, mic léinn na chéad bhliana go háirithe, atá ag streachailt leis an teanga. Piartheagasc atá i gceist, agus mic léinn na dara agus na tríú bliana i mbun grúpaí beaga a stiúradh. Ní bhíonn níos mó ná cúigear mac léinn i ngach grúpa agus bíonn deis ag mic léinn ceisteanna a chur, cleachtadh a dhéanamh ar struchtúir, srl.
- > Tá traidisiún Gaeilge i Má Nuad a théann i bhfad siar. Bunaíodh an Ollúnacht le Gaeilge in 1795, díreach tar éis do Choláiste Phádraig teacht ar an bhfód. Dá bhrí sin, tá an Ghaeilge á múineadh ar an gcampas le breis is dhá chéad bliain.
- > Is iomaí gné de léann na Gaeilge a ndéantar taighde uirthi sa Roinn, idir theanga agus litríocht, idir shean agus nua, chomh maith le réimsí léinn atá gaolmhar don teanga. Orthu sin tá, mar shampla, an Teangeolaíocht, an Béaloideas, An Chritic Liteartha, Gaeilge na hAlban, an Nua-Ghaeilge Mhoch agus Traidisiún na hAmhránaíochta.

Pléitear leis an nGaeilge mar theanga bheo agus mar chuid luachmhar d'oidhreacht chultúrtha na hÉireann agus na hEorpa.

Tar éis na céime

- > Tá scileanna teanga, scileanna taighde, anailíse agus cur i láthair fite fuaite sa chéim agus bíonn ardmheas orthu i ngairmeacha éagsúla.
- > Éiríonn lenár gcéimithe poist a bhaint amach i réimsí lena n-áirítear na meáin, aistriúchán, ateangaireacht, múinteoireacht ag an mbunleibhéal agus ag an dara leibhéal, an státseirbhís, i réimsí na ríomheolaíochta agus sa Roinn Gnóthaí Eachtracha.
- > Tá na cláir iarchéime seo a leanas á dtairiscint ag an Roinn faoi láthair: M.Litt sa Nua-Ghaeilge (mórthráchtas), MA sa Nua-Ghaeilge (miontráchtas, obair chúrsa agus scrúduithe), agus PhD sa Nua-Ghaeilge. D'éirigh le mic léinn dár gcuid maoiniú a bhaint amach thar na blianta le staidéar a dhéanamh ag na leibhéil seo a leanas: MA, M.Litt., MSc agus PhD.

Tá Nua-Ghaeilge ar fáil mar chuid de na cúrsaí seo chomh maith

Gaeilge | Nua-Ghaeilge (Modern Irish) (group 4 subject)

MH101 Points 2025: 300

Minimum entry requirements: Leaving Certificate H4 in Irish (or equivalent) required to study Nua-Ghaeilge.

No beginner stream in Nua-Ghaeilge. For full details about entry requirements see page 28.

Subject Overview

- > Students of the Modern Irish course study the language (spoken and written) and aspects of literature and culture, learning about the diversity and rich heritage of the Irish language. They will accomplish this in a friendly, open Department that has a strong commitment to Irish and to learning. All lectures, tutorials and workshops are through the medium of the Irish language and the Irish language support centre, An Droichead, provides assistance to students, first year students in particular, who are struggling with the language. This works on a peer-tutoring basis.
- > Spoken and written Irish are central to our course and students are given every encouragement and support. Students normally spend a period of residence in the Gaeltacht to develop these skills.
- > Our modules allow students to gain a deep appreciation of contemporary Irish literature – poetry, prose and drama. Modules are also offered on earlier periods of Irish literature, including Bardic Poetry, the Fenian Cycle and poetry of the 17th, 18th and 19th centuries. There are also optional modules on Scottish Gaelic, on the sean-nós singing tradition, and on Irish-language oral traditions and onomastics. In addition to practical workshops and tutorials on written and spoken Irish, we also offer modules on the sociolinguistics of Irish and on the phonology and dialectology of the modern language.
- > Maynooth has a long-standing tradition of Irish. The Professorship of Irish was established in 1795, immediately after St Patrick's College was founded. As such, Irish has been taught on the campus for over two hundred years.

- > Many aspects of Irish studies are researched in the Department, both language and literature, old and new, as well as other related areas of study. Irish is studied both as a living language and as a valuable part of Irish and European cultural heritage.

After Graduation

- > Advanced language and analytical skills, researching, and presentation skills are all embedded into the degree and are highly valued in various professions.
- > Our graduates have secured jobs in areas including the media, translation, interpretation, teaching at primary and secondary level, in the civil service, in areas of computer science and in the Department of Foreign Affairs.
- > A range of postgraduate programmes are offered by the Department.

Geography (available in groups 1 & 6)

MH101 Points 2025: 300

For full details of MH101 minimum entry requirements see page 28.

Subject Overview

- > **Are you curious about how we can: solve the global climate and ecological crises; build economies that work for people and not the other way around; spread development and lift people out of poverty, create welcoming places and become a good neighbour to the world? Do you want to build your capacity to use some of the most advanced and sought after GIS and Remote Sensing technologies? Our degrees will strengthen your capacity of learn and apply geographical analytics in the search for solutions to the big challenges of the twenty first century.**
- > **Our students develop a valuable way of thinking ‘spatially’, with space, place, time and nature-society relations at the forefront of their analysis. We ask questions such as: How much climate change and land-use change are we causing, and how quickly?**
- > **Geography paves the way for active citizenship, diverse exciting careers including research, and provides a foundation for lifelong learning.**
- > **Geography at Maynooth includes field trips, both in Ireland and overseas, and work placement modules (subject to availability).**

After Graduation

- > Geography students learn to think critically, analysing how and why our world changes. Geographers are flexible thinkers and learn a wide range of globally relevant career skills which appeal to employers in a fast-changing workplace. Such skills are attractive to employers throughout the public, private and voluntary sectors.
- > Graduate careers include research, urban planning, community development, teaching, overseas aid and development, environmental monitoring and mapping, ICT, retail and marketing analysis, data analysis, environmental consultancy, business management, economic and industrial development agencies, public administration, environmental management and conservation agencies, to name but a few.

MH101 Course Structure

1st year

BA Bachelor of Arts – Geography – Single Major, Double Major, Major/Minor or as a Minor

Geography and 1 other subject to degree level.

- > Choose 15 or 30 credits of Geography from group 1 and/or 6 plus up to 3 other subjects, which may include Critical Skills, from the available groups (maximum 1 subject per group). If choosing Geography in Group 6, the only subject you may choose in Group 1 is Geography (this is due to timetabling of subjects in 2nd year)

2nd year and Final year options

- > Geography
- > Continue with Geography and 1 of your 1st year subjects as a Major/Minor, Double Major or Minor
- OR
- > Single Major Geography from 2nd year: at least 50 credits of Geography in each of 2nd and final year
- > All combinations (Major/Minor, Double Major, Single Major, Minor) provide students with future-focused practical skills education, e.g. spatial data mapping is core across 2nd and final year, with a wide range of fundamental and emerging subject strengths offered as options, and exciting field courses in Ireland and overseas offering opportunities to apply this knowledge in the real world.
- > Optional 10 credit Elective in 2nd year (see p. 14 for details)
- > Erasmus/Study Abroad option after 2nd year

For MH101 subject groups table go to page 29

Sample Modules

1st year

Students can choose 15 or 30 credits of Geography in first year. The two separate 15 credit Geography options are:

Living Landscapes – in group 1 (15 credits)

This introduces students to the diversity of human and physical landscapes across the modern world, how we have come to know a little about them, and the processes shaping them, past and present.

Global Environments – in group 6 (15 credits)

This introduces students to the issues involved in modern global development within a highly modified, rapidly changing natural environment.

2nd year

2nd year fundamental topics may include:

- > Biogeography
- > Climate Action and Sustainability
- > Climatology
- > Urban Geography
- > Social and Cultural Geography
- > Geomorphology

Final year

In 3rd year you can continue with more specialist topics, for example:

- > Global Ecosystems Pressures and Sustainability
- > Climate Change
- > Geographical Information Systems (GIS)
- > Medical Geography

You may also opt to apply for a work placement (subject to availability).

German (group 1 subject)

MH101 Points 2025: 300

Minimum entry requirements: While there is no minimum entry requirement to study non-beginner German, we generally recommend H4 Leaving Certificate German. For full details about entry requirements see page 28.

If taking up German as a beginner, it is advisable to attend all lectures from the first week of term.

Subject Overview

- > As the native language to almost 100 million people around the world, German is a critical language for business, science and culture.
- > You can study German at non-beginner level (Leaving Certificate H4 in German or equivalent recommended), or at beginner level (as a double subject; no minimum requirement).
- > Studying German at Maynooth University equips you with excellent language, communication, research, intercultural, analytical and critical thinking skills. Our students have opportunities to focus on film, literature, linguistics, translation, and business cultures connected to German, alongside the language itself.
- > Small classes taught by experts: Our language, linguistics and culture modules are generally taught in small class groups - an environment in which students thrive. Our staff are keen researchers, and this is integrated into our teaching and approach.
- > Every student will have the opportunity to spend a year in a German-speaking country as an Erasmus student, Language Assistant or Erasmus intern (subject to availability). We have links with over 20 universities in cities and towns in Germany and Austria such as Hamburg, Munich, Vienna, Tübingen, Potsdam, Leipzig and Bonn. Students who successfully complete a year abroad as part of their programme are conferred with a 4-year BA International degree.
- > If you are interested in teaching German, the Teaching Council of Ireland require all registered teachers of German

to have spent some time living in a German-speaking country. The Maynooth University School of Modern Languages, Literatures and Cultures advises at least a three-month residency.

After Graduation

- > **Highly sought-after skills:** Many of the world's largest firms with major operations in Ireland regularly recruit language graduates to work in all sectors of their operations.
- > **Jobs across sectors:** Graduates with strong language skills are sought after in areas such as the diplomatic service, development work with Non-Governmental Organisations (NGOs), education, publishing, the EU institutions, translation and interpretation, international trade, communications, and tourism. Many of our graduates have pursued careers in teaching, translating and interpreting, public service, journalism and the media.
- > **Study further:** Some graduates opt to go on to postgraduate study, and our students have been successful in securing funding to study at Masters and/or PhD level across a range of areas.

1st year

BA Bachelor of Arts – German – Double Major or as a Minor

- > Either 15 credits of German (if you studied German in school to the recommended H4 Leaving Certificate or equivalent level) or 30 credits of German (if you are a beginner)
- > Non-beginners are strongly recommended to take Language and Culture as a subject in 1st year and to select the modules on German Language and Culture
- > Choose 2 or 3 other subjects, which may include Critical Skills, from the available groups (maximum 1 subject per group – see groups table p. 29)

2nd year and Final year

- > German as a Double Major or as a Minor
- > Continue with 1 of your 1st year subjects
- > Optional 10 credit Elective in 2nd year (see p. 14 for details)
- > Transfer option in 2nd year - into the Business and Languages degree MH409 - for students who have completed the first year of the BA degree (MH101) taking at least 15 credits of a Business subject and passing 30 credits of beginners/15 credits of non-beginner German

Year Abroad:

All students of German have the opportunity to spend the 3rd year of their degree programme in a German-speaking country.

You can:

- > Study at a university in Germany or Austria (Erasmus)
- > Work as an English Language Assistant at a German or Austrian school (ELA programme - subject to availability). Complete an Erasmus internship / placement (subject to availability)

Students who avail of the Year Abroad can get this year recognised as part of their studies and convert their degree programme into a 4-year BA International.

For MH101 subject groups table go to page 29

Sample Modules

1st year

- > Grundkurs Sprache: speaking, listening, reading, grammar, writing

2nd year

- > You will study a range of different topics and approaches to German Studies, and have opportunities to take optional modules in the cultures, cinemas, and literatures of Germanophone countries, as well as language awareness, business, and crossing boundaries (Year Abroad preparation)

Final year

- > In addition to further improving your language skills, you will have the opportunity to continue to specialise in the cultures, cinemas, and literatures of Germanophone countries, or to include, for example, modules in linguistics and translation

History (group 2 subject)

MH101 Points 2025: 300

For full details of MH101 minimum entry requirements see page 28.

Subject Overview

- > History is the systematic examination of human experience over time. It attempts to explain the origins and evolution of the societies we live in, from as many points of view as possible.
- > History explores the complex processes of social and economic change, the choice of one set of political or ethical values over another, the context in which new ideas arise, and much more.
- > The written word is one way of gathering information about the past, but new technologies and research methods allow for the study of history to take place through other mediums.
- > The Department's long-standing reputation for excellence and leadership in historical scholarship both in Ireland and abroad is key to the popularity of History at Maynooth. We have kept our discipline vibrant, engaging and of practical value to students. We provide a solid grounding in the practice of history and boast expertise in a wide range of specialist topics such as life in medieval Ireland, the intersection of European and world history, military history, country houses and estates, and gender and sexual politics.

After Graduation

- > History graduates are particularly skilled in assessing the causes and repercussions of changes in our present world. Critical thinking, analysis, research, writing and oral communication skills are adaptable to various work environments.

- > Arts and heritage administration, historical and other research (both private and public sector), archives and museums, teaching at all levels, computer services, library and information services, management consultancy, the diplomatic and civil service, public office, university administration, youth work, personnel management, banking, radio and TV, journalism, public relations, even air traffic control!
- > A range of postgraduate study options are available at Maynooth University.

MH101 Course Structure

1st year

BA Bachelor of Arts - Single Major, Double Major, Major/Minor or as a Minor

History and 1 other subject to degree level.

- > Take either 15 or 30 credits of History
- > Choose 2 or 3 other subjects, which may include Critical Skills, from the available groups (maximum 1 subject per group – see groups table p. 29)

2nd year and Final year

- > Continue with History and 1 other 1st year subject
- > Students who pass either 15 or 30 credits of History in 1st year may take History as part of a Double Major, a Major/Minor or a Minor from 2nd year
- > Optional 10 credit Elective in 2nd year (see p. 14 for details)

Erasmus/Study Abroad option after 2nd year

Or

Single Major History from 2nd year

- > At least 50 credits of History in each year
- > Students who achieve 50% or more in either the 15 or 30 credits of 1st year History may transfer to the Single Major in History from 2nd year
- > Optional 10 credit Elective in 2nd year (see p. 14 for details)

Erasmus/Study Abroad option after 2nd year

For MH101 subject groups table go to page 29

Sample Modules

1st year

- > Introduction to medieval history
- > Global revolution, 1916-19
- > The Anglo-Irish aristocracy in war, 1914-23
- > American History from Revolution to Civil War

2nd year

- > Europe in the early modern world
- > Ireland in the eighteenth century
- > History of terrorism
- > Europe post 1945
- > American history elective

Final year

- > Hitler's Europe, 1939-45
- > The Troubles: conflict in Northern Ireland
- > Art, design and society in seventeenth-century Europe
- > Sport and politics in modern Ireland
- > Gender and emigration in nineteenth- and twentieth-century Ireland

International Development (group 3 subject)

MH101 Points 2025: 300

For full details of MH101 minimum entry requirements see page 28.

Subject Overview

- > **International Development examines the many global challenges associated with sustainable development for the planet, including those confronting people and societies in the Global South (Africa, Asia, and Latin America).**
- > **As a student of International Development in the Bachelor of Arts degree, you will explore issues such as globalisation, climate change, poverty and migration, conflict and security, human rights, gender, the European Green Deal, and sustainable tourism from an international development perspective.**
- > **Gain an understanding of social change processes from household to global levels and how development can be planned, organised and managed to meet the needs of all, especially the most marginalised communities around the world.**
- > **We focus on the roles and effectiveness of international and national development actors (UN, Governments, NGO's and Civil Society groups) and market actors in meeting development challenges, and in providing a better world for all.**

After Graduation

- > Graduates will have developed knowledge of international policy trends, development education, facilitation, project planning and management as well as leadership and working with groups; opening opportunities to begin a career in the international development sector.

- > Graduates also find employment in the international business, civil service, and development education sectors. Many of our students go on to work in international aid agencies and civil society organisations both in Ireland and overseas, especially those focused in the countries of the Global South.
- > Postgraduate study options include an MA in International Development and an MA in International Peacebuilding, Security and Development Practice.

MH101 Course Structure

1st year

BA Bachelor of Arts – International Development – Double Major, Major/Minor or as a Minor

International Development and 1 other subject to degree level.

- > Take either 15 or 30 credits of International Development
- > Choose 2 or 3 other subjects, which may include Critical Skills, from the available groups (maximum 1 subject per group – see groups table p. 29)

2nd year and Final year

- > Continue with International Development and 1 other 1st year subject as a Double Major, Major/Minor or as a Minor
- > Optional 10 credit Elective in 2nd year (see p. 14 for details)

Erasmus/Study Abroad option after 2nd year

For MH101 subject groups table go to page 29

Sample Modules

1st year

15 credit option:

- > Introduction to key issues in International Development
- > Focus on key development challenges confronting the world today
- > Theory and practice of International Development responses

30 credit option:

- As per the 15 credit option, plus further modules that focus on:
- > Migration, conflict and development
 - > The work of key actors in the development sector (including non-governmental organisations, the state and international institutions)

2nd year

- > Development of key skills such as leadership, participatory development practice and project design
- > Build knowledge on development action including globalisation, sustainable tourism, gender inequality and humanitarian emergencies

Final year

- > Participation in optional research project
- > Advanced classes on contemporary issues in development, climate change and food security, trade and aid, and media/advocacy

Law (group 1 subject)

MH101 Points 2025: 300

For full details of MH101 minimum entry requirements see page 28.

Subject Overview

- > **Choosing Law in the MH101 degree is ideal for students who want to sample it in their first year as part of a broad-based Bachelor of Arts degree. Law can be taken as a single or double subject in first year allowing students to combine the study of core law subjects with options from a wide range of subject areas.**
- > **The flexibility and choice in the MH101 degree means students who successfully complete their first year law modules have the option of transferring to one of our specialised law degrees (BCL or LLB).**
- > **Transferring into one of the specialised law degrees opens up more opportunities in the study of law. At the end of second year, students of the BCL and LLB degrees may apply to complete a work placement year in a law firm (subject to availability).**
- > **All law students may apply to complete a year studying abroad at one of our partner institutions (subject to availability).**
- > **Students can get involved in our numerous student societies: the student Law Society, European Law Students' Association or Student FLAC (Free Legal Advice Centre) Society.**

After Graduation

- > Students can tailor their Bachelor of Arts degree to their interests while developing a broad skill set which is highly valued by employers. If choosing to continue with Law after first year, we recommend eligible students transfer into one of the specialised Law degrees.
- > Graduates of our specialised LLB and BCL programmes (but not of the MH101 BA programme) will be in a position to take exams for entrance to the Honorable Society of King's Inns in order to begin training as a barrister. Graduates of the BA, BCL, or LLB are eligible to progress to take the Law Society of Ireland's FE1 examinations to begin training as a solicitor.
- > Studying law also opens up a whole range of career options outside of being a lawyer such as careers in: journalism; policy development; business and finance; management consulting; the Non-Governmental Organisation (NGO) sector; and national and international public administration (such as with the EU or UN).
- > The School of Law and Criminology offers a wide range of postgraduate study options from Criminology to International Business Law.

MH101 Course Structure

1st year

BA Bachelor of Arts – Law as a Double Major or as a Minor

Law & 1 other subject to degree level.

- > 30 or 15 credits of Law
- > Choose 2 or 3 other subjects, which may include Critical Skills, from the available groups (maximum 1 subject per group – see groups table p. 29)

2nd year and Final year

- > Continue with Law as a Double Major or as a Minor in the BA degree
- > Students who successfully complete 1st year, attaining 40% or higher in Law in 1st year may apply to transfer into 2nd year of the BCL (Law and Arts) programme or 2nd year of the 4 year LLB Law degree. Students who have taken Law alongside Accounting, Business or Criminology in 1st year may apply to transfer to 2nd year of the BCL Law and Accounting, Business or Criminology respectively (subject to certain conditions). Only BCL and LLB graduates are recognised by the King's Inns as eligible to sit their entrance examinations for entry to training to become a barrister.
- > Optional 10 credit Elective in 2nd year (see p. 14 for details)

Erasmus/Study Abroad option after 2nd year

For MH101 subject groups table go to page 29

Sample Modules

1st year

- > The nature of legal systems, and how laws are made nationally and internationally
- > The role of lawyers, judges, legislators, and other actors in the legal system
- > The laws relating to crime, negligence, and privacy

2nd year

- > The laws relating to evidence, and building a legal case
- > The laws relating to business and companies
- > EU and international law

Final year

- > The laws relating to the family, media, and property
- > International law and justice
- > The theory of laws and legal systems

Mathematical Physics (group 6 subject)

MH101 Points 2025: 300

Minimum entry requirements for Mathematical Physics in MH101: recommended minimum O3/H7 Leaving Certificate Mathematics. For full details about entry requirements see page 28.

Subject Overview

- > **Mathematical physics, or theoretical physics, is the study of the fundamental laws of nature that govern our existence; from the interactions of quarks and gluons through the properties of metals and the aerodynamics of flight, to the evolution of stars and galaxies.**
- > **Many of the technologies we now take for granted have their origins in fundamental physics research, including PET scanners, lasers, Wi-Fi and the world wide web.**
- > **Theoretical physics challenges our deeply held notions of what the world is like, and has led to developments in thinking from philosophy to genetics and neuroscience.**
- > **The study of Mathematical Physics at Maynooth University has a long and distinguished tradition, of over 200 years. Modern theoretical physics and applied mathematics are exciting and dynamic fields, and this excitement is reflected in the research projects which are pursued in the Department.**
- > **As well as being introduced to the major ideas and developments in theoretical physics and applied mathematics, you will be equipped with the tools to meet current and future developments in science, engineering, finance and other technologies of the future.**
- > **Maynooth University offers the unique possibility of combining Mathematical Physics with subjects such as Music, Philosophy or Geography.**

After Graduation

- > Physics and mathematical science graduates with analytical and problem-solving skills are in high demand in our technology and data driven society.
- > Your career options include research and development, computing and software engineering, electronics, telecommunications, semiconductors, banking, finance, management and teaching.
- > Entry into research is also an option, including multi-disciplinary fields such as nanotechnology, biophysics, financial mathematics, or medical physics.
- > The Department of Physics offers a range of postgraduate study options including an MSc in Theoretical Physics and Mathematics.

- > Statistical physics
- > Particle physics
- > Physical cosmology
- > Solid state physics
- > Fluid mechanics
- > Quantum information science

Mathematical Studies (group 3 subject)

MH101 Points 2025: 300

Minimum entry requirements for Mathematical Studies in MH101: recommended minimum O3/H7 Leaving Certificate Mathematics. For full details about entry requirements see page 28.

Subject Overview

- > **Mathematics is the logical and abstract study of pattern. It involves an interplay between the concrete and the abstract: the ever-changing world around us is one of the key inspirations for the invention and investigation of abstract mathematics, and the discoveries of abstract mathematics have important and unexpected applications in the world around us.**
- > **The Department offers multiple programmes to suit a range of Mathematical backgrounds, from the intensive Pure Mathematics programmes, which are aimed at students with a strong interest in abstract mathematics and a flair for analytical reasoning, to the more applied programmes which appeal to students who enjoy the more concrete areas of the subject. Our Mathematics degrees aim to bridge the gap between school Mathematics and current frontiers of knowledge. You will learn to think hard and rigorously about questions and to solve new problems – invaluable skills that can be transferred to any area of life and any job you hold in future.**
- > **A degree in a Mathematical discipline opens the door to jobs in a variety of fields such as finance, trading, insurance, information technology, education, data analysis, scientific research and development.**

After Graduation

- > Well-trained mathematicians are always in demand. A degree in Mathematics from Maynooth University not only provides specialist knowledge, it also trains graduates to think logically and clearly. These skills are highly sought after in finance and banking, insurance, the civil service, teaching, industrial and commercial management, administration and technical, scientific and engineering work in industry and in research and development.
- > Postgraduate study is also available at the University. The academic staff in the Department of Mathematics and Statistics have a diverse range of research interests in areas including algebra, analysis, data analysis, dynamics, geometry, number theory, statistical modelling and topology.

Media, Film & Cultural Studies (group 6 subject)

MH101 Points 2025: 300

For full details of MH101 minimum entry requirements, see page 28.

Subject Overview

- > By studying Media, Film & Cultural Studies, you will have the opportunity to explore the ways that 'new' media like social media, AI, and digital platforms as well as 'old' media like film, television, print and radio shape your lived experience and learn how to engage effectively and critically with an increasingly mediated world.
- > You will have the opportunity to research and analyse media genres like advertising and documentary, media audiences and users, media technologies and platforms like video streaming and TikTok and you will develop an understanding of how media shapes our ways of being in the world.
- > You'll develop your employability and professionalism through your exploration of media, film and cultural industries and working lives.
- > This subject is focused on critical dimensions of media, film and culture, and you'll have opportunities to use practical and project-based skills on modules like Radio Production and Digital Content Creation. To develop more extensive skills in digital and audio-visual practice, you should apply to MH109 BA Media Studies.

After Graduation

- > Graduates emerge from Media, Film & Cultural Studies with in-demand skills to work in sectors including broadcasting and film, arts, culture & heritage; content creation; social media; marketing, PR and communications; NGOs and charity.
- > Students build knowledge of the key practices and processes of the ever growing and ever changing media and cultural industries. Graduates gain transferable communication, problem-solving, research, project management and teamwork skills that are well-matched with wider sectors including public service, education and business.

- > Postgraduate study is also an option and we offer a range of interesting options to our students.

2nd year

- > Along with modules that develop your research and analytical skills in media, film and cultural theories and texts, you'll be able to select optional modules like Film, TV and Screen Studies, Media & Politics, and Cultural Algorithms, among others.

Final year

- > Here you'll have the chance to learn more about media, film and cultural industries and work by engaging in skills-development projects, interacting with graduates and developing CVs and portfolios. You'll also be able to select optional modules like Podcasting, Global Cinema and Philosophy & Film.

Medieval Celtic Studies (group 6 subject)

MH101 Points 2025: 300

For full details of MH101 minimum entry requirements see page 28.

Subject Overview

- > **Anyone with an interest in Irish history, archaeology, languages or literature will be captivated by this subject:** from Cú Chulainn to Clonmacnoise, from Brú na Bóinne to the Book of Kells, all aspects of Medieval Celtic Studies are explored. The Department engages in teaching and research in the history, culture, language and literature of medieval Ireland and related societies.
- > The diverse range of topics encompasses heroic literature and medieval archaeology, Otherworld tales and mythology, and gender and sexuality in medieval Celtic societies. The links between Ireland and the wider Celtic world are explored through literature and archaeology.
- > You will study texts through English translations, and gain insights into the society of medieval Ireland: a world of power struggles, cattle raids, love triangles, infidelity, warfare, kingship and much more. Along the way, students discover that certain fundamental human experiences and anxieties were the same in the early Middle Ages as they are in the twenty-first century.
- > There is an option to study modules in both the Old Irish language and Middle Welsh.
- > A world-leading centre for the study of Medieval Irish and Celtic Studies, the Department of Early Irish is diverse and friendly and offers a vibrant and stimulating experience for students. The Department has received several prestigious grants, including a European Research Council grant to support research in the area of Early Medieval Irish literature and language, as well as two Irish Research Council Laureate Awards for frontier research on the history of medicine in medieval Ireland. The Department has also been at the forefront of several major collaborative projects in the area of Digital Humanities. Our special strengths lie in the study of medieval Irish literature, in its growth and development and in its relationship to contemporary European culture, as well as in the study of the Early Irish language.

After Graduation

- > Through your studies you'll develop a combination of analytical skills in literature, history and language – useful assets for critical thinking in a variety of careers. Graduates of Medieval Celtic Studies have found employment in heritage tourism and related areas, education, civil service, library work, Irish language publishing and academic research.
- > There is also the option for further study and graduates can also take advanced degrees after the undergraduate programme.

MH101 Points 2025: 300

Minimum entry requirements: To study Music requires minimum Leaving Certificate H5 Music or equivalent.

For full details about entry requirements see page 28.

You have the option of studying either solo performance (subject to audition or certificate) or group piano tuition. BA students who have attained Grade 6+ (ABRSM, RIAM, Trinity College London) on a standard orchestral instrument (excluding percussion), piano, organ, classical guitar, voice or saxophone; Grade 6+ (Rockschool, Trinity College London) on bass, drums, vocals, keyboard or guitar (electric or acoustic); or who are traditional Irish musicians or musical theatre vocalists of comparable fluency, will also have an opportunity to take individual tuition in their instrument or voice.

Students who have not taken formal performance examinations are invited to audition, demonstrating Grade 6+ attainment, in September. Please see further details on the Department of Music website. Alternatively, group piano tuition is an option open to all levels from absolute beginner to advanced. Where possible, the Department of Music arranges instrumental/vocal tuition on campus. Students can also choose to have instrumental/vocal tuition (funded to a maximum amount by the Department) at either TU Dublin or RIAM.

Subject Overview

- > Our programmes are designed to ensure an exciting, broad and firm grounding in practical, compositional and academic work. Studying Music at Maynooth offers unparalleled choice and expertise, from traditional music to contemporary creative practices, from plainchant performance to musical theatre, and from high art to heavy metal.
- > Students have the opportunity to focus on areas that really interest them in their final year, with the option to specialise in performance, composition or music research (musicology including pop/rock and other genres). Some of the modules available include 'Music and Film', 'Opera in Context', and 'Popular Music Studies'.
- > Students participate in ensembles such as the Choral Society, Chamber Choir, Musical Society and Traditional Music Group.
- > For those considering teaching Music at second level, Music in the MH101 degree satisfies the Teaching Council subject requirements.

After Graduation

- > Music graduates are equipped with a wide range of transferable skills. Our students have gone on to work as professional musicians in a broad range of roles and genres (performers, composers and conductors) and in adjacent areas such as music education, arts administration, multimedia, music promotion and marketing, journalism, radio production and presentation, music libraries.

MH101 Course Structure

1st year	2nd year	Final year
BA Bachelor of Arts – Music – Double Major, Major/Minor or as a Minor > 15 credits (group 5) or 30 credits (group 5 & group 2) of Music. Music in group 2 is only available when choosing Music in group 5 (double Music). > Choose 2 or 3 other subjects, which may include Critical Skills, from the available groups (maximum 1 subject per group – see groups table p. 29)	> After 1st year you take Music as part of a Double Major, as a Major/Minor or as a Minor > Continue with 20, 30 or 40 credits of Music plus 1 of your 1st year subjects > Optional 10 credit Elective in 2nd year (see p. 14 for details) Erasmus/Study Abroad option after 2nd year	> 20, 30 or 40 credits of Music plus other subject

For MH101 subject groups table go to page 29

Sample Modules

1st year	2nd year	Final year
> Performance > Introduction to Music Studies > Music Traditions and Repertoires	> Performance (solo and ensemble) > Music and History > Music and Film > Irish Traditional Music > Introduction to Orchestration and Arrangement	> Performance (solo and ensemble) > Composition > Music Therapy > Popular Music Studies > Music and its Sources

Music Technology (group 4 subject)

MH101 Points 2025: 300

Recommended minimum 03/H7 Leaving Certificate Mathematics. For full details about entry requirements see page 28.

Subject Overview

- > A unique opportunity to combine Music Technology with subjects such as Music, Computer Science and a wide range of other disciplines. Studying Music Technology offers an opportunity to develop and combine your creative and technical abilities.
- > This subject strikes a balance between practice and theory. You gain hands-on experience of the practical skills involved in music technology while learning about essential concepts.
- > Wide in scope, Music Technology includes recording and sound engineering, computer music programming, sound design, composition, acoustics and psychoacoustics.
- > Our programme is designed to ensure a broad and firm grounding in practical and theoretical work, with expanded opportunities to specialise in the areas that interest you the most in your final year. Final year students oversee significant recording and composition projects, or work towards instrument and software development.
- > Facilities include a recording studio; a live room; a 5.1 mastering studio; Mac laboratories utilising Pro Tools software and field recording resources.

After Graduation

- > Maynooth Music Technology graduates emerge with skills in sound design, computer programming, and music recording and production, as well as skills offered through studying a second discipline.
- > Career areas which graduates might consider include: sound designer for games, animation and film; music producer; recording engineer; software developer; radio producer. Graduates have also worked in arts administration, events management, music publicity and music journalism.

Philosophy (group 1 subject)

MH101 Points 2025: 300

For full details of MH101 minimum entry requirements see page 28.

Subject Overview

What is Philosophy? One of the oldest fields of study, Philosophy remains deeply relevant to modern life. We all do Philosophy every day - deciding who to vote for, questioning what happens after death, or even choosing a university course.

No matter what you study, Philosophy plays a role. It connects to Biology through the scientific method, to Anthropology through the study of cultural norms, and to Business through ethical responsibilities. Even film can be analysed through Philosophy. Today, with the rise of Generative AI, Philosophy is more essential than ever. Can AI truly 'think' or 'understand'? How can we ensure it is used ethically?

Studying Philosophy sharpens our ability to critically analyse. It equips us with the tools to interrogate ethical principles, explore our identities, and make well-informed decisions.

More than an academic subject, Philosophy is a way of thinking that applies to many aspects of life and work. At Maynooth, our Philosophy program not only engages with the 'big questions' but also helps students develop essential skills that are highly valued by employers, including:

- > **Analytical Thinking** – Develop confidence in breaking down complex problems and evaluating solutions.
- > **Collaboration** – Work effectively in diverse teams; engage with different perspectives.
- > **Open-mindedness** – Become comfortable with new ideas and ways of thinking.

Perhaps most importantly, Philosophy will equip you to better understand the world and yourself. You will explore how Philosophy has shaped power dynamics and human experience throughout history. You will learn what past philosophers have thought, how to challenge and build on their ideas, and apply them to real-world challenges.

If you want a subject that will expand your worldview and equip you with skills for a wide range of careers, Philosophy at Maynooth is the perfect choice.

After Graduation

Philosophy equips students with critical thinking skills, sound judgment, and the ability to communicate clearly and lead effectively - skills essential for success in any profession. A philosophy degree provides versatile expertise that can be applied across a wide range of careers.

Graduates gain three key advantages:

1. **Transferable Skills** – Expertise in research, decision-making, problem-solving, and leadership, applicable to consulting, management, policy, and strategic roles.
2. **Human Insight** – A nuanced understanding of human motivation and behaviour, crucial in politics, education, advocacy, marketing, and leadership.
3. **Subject Knowledge** – A deep understanding of philosophical concepts and narratives, valuable for careers in academia, writing, and media.

Use these strengths to choose a career path, develop personally, and use your understanding of human behaviour to create meaningful impact for employers. A Philosophy degree offers not just knowledge, but a powerful foundation for success in a complex world.

Sample Modules

1st year

- > Introduction to Philosophy: Cultivating Critical Thinking and Inclusive Perspectives
- > Introduction to Ethics: Exploring Value, Justice, and our Relationship to the Non-Human World

2nd year

- > Digital Ethics
- > Epistemology
- > Fundamentals of Logic for Computational Thinking
- > Introduction to Greek Philosophy
- > Philosophies of the Digital Age
- > Philosophy and Sustainability
- > Studying Women Philosophers

Final year

- > Morality and the Law
- > Phenomenology and Continental Philosophy
- > Philosophy of Natural Science
- > Philosophy of Religion in the Modern Age
- > Rationalists and Empiricists: Towards Modern Philosophy
- > Renaissance Philosophy: Methods and Practices
- > Philosophy and Film

Politics (group 6 subject)

MH101 Points 2025: 300

For full details of MH101 minimum entry requirements see page 28.

Subject Overview

- > **Politics is about how we figure out what our society should look like. Street protests, local elections, European treaties, parliamentary debate, local council decisions, industrial conflict – all are part of the everyday life of politics.**
- > **Politics combines the traditional study of political institutions (parties, parliaments, elections, policy-making and more), political ideologies (such as liberalism and socialism) and ideas (such as justice and freedom) across a wide range of countries and regions.**
- > **Students explore the ways that politics works and does not work, and how it shapes our lives for better and worse. We investigate the different forms that politics can take, how politics is organised in different countries, how politics is shaped by society and how it can chart new paths for societies. Students explore Irish and international politics.**
- > **Politics students do a participant workshop with a focus on active citizenship, providing “real world” experience of the issues raised in the teaching programme. Students also have the opportunity to carry out research into political life, developing analytical, communication and presentation skills. We encourage students to engage in social movements and issue-based campaigning, and to get involved with political parties and human rights work and to reflect upon that work.**
- > **The Centre for the Study of Politics (CSOP) and the Maynooth University Centre for European and Eurasian Studies (MUCEES) are both important parts of the MU Politics programme.**
- > **Politics students have the opportunity to spend a year abroad, to go on staff-led field trips and to become actively involved in the Sociology and Politics Society in the MSU (Maynooth Students’ Union).**

After Graduation

- > Taking Politics and/or Sociology to degree level meets the Teaching Council degree subject requirement to teach Politics and Society at second level following a Professional Master of Education (PME).
- > While some graduates may enter electoral and party politics, many more will work in areas such as public policy, the media, international affairs, the European Union, human rights, community work, political activism and business and management.
- > The Department offers a range of postgraduate study options.

1st year

- > Introduction to Political Institutions
- > Introduction to Political Ideas
- > Lectures are supplemented with a customised tutorial programme

2nd year

- > Democracy and Citizenship
- > Research Methods
- > Active Citizenship Workshop
- > Society and State
- > Optional modules include: Social Movements, Politics of the EU, Politics of the Americas, International Relations

Final year

- > Irish Politics and Society
- > Gender and Politics
- > Killing for the Nation
- > Democracy in Crisis
- > Revolutions
- > Environment and Society
- > Northern Ireland
- > Final year students produce a BA research project. For examples please see our website

Psychological Studies (group 6 subject)

MH101 Points 2025: 300

For full details of MH101 minimum entry requirements see page 28.

Subject Overview

- > **Psychological Studies in MH101 is a flexible degree option, ideal if you would like to learn about human behaviour in combination with another subject in the BA Arts Double Major pathway. This flexibility allows students to focus on key aspects of Psychology alongside other subjects of interest. For example, you may wish to combine Psychological Studies with subjects like Criminology, Business, Sociology or Geography.**
- > **Unlike MH106 and MH209, Psychological Studies in MH101 will not lead to a professionally-accredited degree. However, Psychological Studies graduates are eligible to apply for consideration for entry to a one-year master's postgraduate programme to achieve a professionally-accredited qualification in psychology (on a competitive basis - with limited numbers).**
- > **Teaching is delivered by leading researchers in Psychology involved in the cutting-edge of the discipline. Staff in the Department of Psychology at Maynooth University are highly research active, and enjoy state-of-the-art research facilities and technical support.**
- > **Research in the Department applies cutting-edge psychological science to address four complementary overlapping themes: Rehabilitation, disability and health psychology; Mental health, community and positive psychology; Neuroscience, behaviour and cognition; and Organisations, policy and systems.**

After Graduation

- > Psychological Studies graduates will be eligible to apply for further studies including professionally accredited psychology conversion degrees.
- > You will have acquired a range of key transferable, analytical and critical skills that will equip you for many roles in many different types of workplaces.
- > You may wish also to pursue further postgraduate studies in cognate areas of social and behavioural sciences.

- > Psychological Research Methods

Sociology (group 5 subject)

MH101 Points 2025: 300

For full details of MH101 minimum entry requirements see page 28.

Subject Overview

- > **Sociology is the study of human social life, groups and societies.**
- > **It gives students the opportunity to develop critical skills and powers of argumentation based on empirical evidence, become creative thinkers, and engage in a constructive enterprise oriented toward the promotion of equality and social justice.**
- > **Sociology is a subject that opens the mind, connecting students' own lived experience to the wider social and economic context, and that offers the opportunity to engage in an empowering form of student-led learning.**
- > **The Sociology Department is widely acknowledged as a leading national and international centre of teaching and research excellence, as well as an exemplar of public sociology and engagement.**
- > **We seek to equip you with the necessary resources and skills – intellectual, methodological, communicative and active citizenship – to meet the challenges of our fast changing contemporary society and to contribute productively to social transformation.**
- > **Sociology students have the opportunity to spend a year abroad, to go on staff-led field trips and to become actively involved in the Sociology and Politics Society in the MSU (Maynooth Students' Union).**

After Graduation

- > Studying Sociology opens our students up to personal change and development, and provides them with the necessary tools to successfully pursue diverse professional career paths.
- > Sociology offers a pathway into a range of professions including advocacy, education, public relations, political activism, journalism, probation service, social work, social care, online community management and social/market research to name a few.
- > Taking Politics and/or Sociology to degree level meets the Teaching Council degree subject requirement to teach Politics and Society at second level following a Professional Master of Education (PME).
- > Some Sociology graduates continue in the discipline and undertake doctoral or Masters studies so they can become professional sociologists, social researchers, in-house researchers or analysts in large organisations, policy analysts or lecturers in third-level and further education institutions. The Department offers a range of postgraduate study options.

- > Final year students produce a BA research project - for samples please see our website

Spanish (group 5 subject)

MH101 Points 2025: 300

Minimum entry requirements: While there is no minimum entry requirement to study non-beginner Spanish, we generally recommend H4 Leaving Certificate Spanish.

Beginners: no minimum Spanish requirement. For full details about entry requirements see page 28.

If taking up Spanish as a beginner, it is advisable to attend all lectures from the first week of term.

Subject Overview

- > Achieve a high level of competency in a world language and learn about Spanish and Latin American culture and society more generally in a friendly, supportive environment. As a student of Spanish, you will have a twin focus on language and culture. Through language classes and with supporting material such as film, literature and cultural events, you will aim to become a fluent speaker and writer of Spanish. You can study Spanish at non-beginner level (Leaving Certificate H4 in Spanish or equivalent recommended), or at beginner level (no minimum requirement).
- > Over the course of your degree programme, you will receive an excellent grounding in all aspects of Spanish language through core modules in Spanish Language, complemented by a broad range of optional modules in areas such as Linguistics, Spanish Literature and Cinema, Latin American Literature and Cinema, Translation, Business and Legal Spanish, Catalan and Portuguese.
- > What distinguishes Spanish and Latin American Studies at Maynooth University is that we give students a thorough grounding in the language while introducing them to Spanish as a world language and cornerstone of many vibrant cultures.
- > Students are expected to spend the third year of their BA studying in a university in Spain or Latin America. This is a unique opportunity and a "life-changing" experience, as any of our past students who have spent a year abroad can attest.

- > Students interested in teaching Spanish should note that the Teaching Council of Ireland requires all registered teachers of Spanish to have spent some time living in a Spanish-speaking country. The Maynooth University School of Modern Languages, Literatures and Cultures advises at least a three-month residency.
- > You also have the opportunity to work as a Teaching Assistant in Spain (subject to availability), which is a great asset to have on your CV. Students who successfully complete a year abroad as part of their programme are conferred with a 4-year BA International.

After Graduation

- > A degree in Spanish offers students enhanced employability in a wide range of careers – diplomatic service, development work with NGOs, education, publishing, working with EU and global institutions, translation and interpretation, international trade, communications and tourism.
- > Multinational companies such as Google and Intel, many of whom have bases in Ireland, continually note the importance of finding graduates who are not only fluent in languages but who have the intercultural competence to deal with colleagues and customers in an increasingly globalised world.
- > Some of our students go on to pursue postgraduate research in Spanish and Latin American Studies. We offer a range of postgraduate programmes, and are happy to supervise postgraduate research.

Contact Us

Maynooth University Spanish and Latin American Studies, School of Modern Languages, Literatures and Cultures, Rye Hall Block D

📧 www.maynoothuniversity.ie/spanish

✉ spanish@mu.ie

MH101 Course Structure

1st year

BA Bachelor of Arts – Spanish – Double Major or as a Minor

You will engage with a wide range of texts, learning to recognise and analyse key features.

- > Either 15 credits of Spanish (if you studied Spanish in school to the recommended H4 Leaving Certificate or equivalent level) or 30 credits of Spanish (if you are a beginner)
- > Non-beginners are strongly recommended to take Language and Culture as a subject in 1st year and to select the modules on Spanish Language and Culture. This is especially important if you are hoping to keep on Spanish to degree level
- > Choose 2 or 3 other subjects, which may include Critical Skills, from the available groups (maximum 1 subject per group – see groups table p. 29)

2nd year and Final year

- > Spanish as a Double Major or as a Minor
- > Continue with 1 of your 1st year subjects
- > Optional 10 credit Elective in 2nd year (see p. 14 for details)
- > Transfer option in 2nd year - into the Business and Languages degree MH409 - for students who have completed the first year of the BA degree (MH101) taking at least 15 credits of a Business subject and passing 30 credits of beginners/15 credits of non-beginner Spanish

Erasmus/Study Abroad option after 2nd year

All students of Spanish & Latin American Studies have the opportunity to spend the third year of their degree programme in a Spanish-speaking country. This might involve:

- > Studying at a university in Spain (Erasmus programme)
- > Assisting with English classes at a Spanish school (ELA programme - subject to availability)
- > Erasmus internship/placement (subject to availability)

Students who avail of the Year Abroad can have this year recognised as part of their studies and thus convert their degree programme into a 4-year BA International.

For MH101 subject groups table go to page 29

Sample Modules

1st year

- > Language from beginner or Leaving Certificate level (or equivalent)
- > Introduction to the culture of the Spanish-speaking countries

2nd year

- > Introduction to Spanish Literature
- > Business and Legal Spanish
- > Sport, Leisure & Popular Culture in the Spanish-speaking World
- > Sing it like Shakira! Latinx Stars on the Global Stage
- > Language modules
- > Linguistics
- > Catalan or Portuguese are also offered at beginner level
- > First Steps in Translation: Theory and Practice

Final year

- > Spanish Literature
- > Latin American Literature
- > Linguistics
- > Translation
- > Students continue with their language modules
- > Continuing Catalan or Portuguese are also offered

Statistics (group 6 subject)

MH101 Points 2025: 300

Minimum entry requirements: recommended minimum O3/H7 Leaving Certificate Mathematics.

For full details about entry requirements see page 28.

Subject Overview

- > Statistics deals with the collection, analysis and interpretation of data.
- > You will learn how to use statistical models and visualisation methods to unlock valuable information and hidden patterns in large volumes of data.
- > A degree in Statistics will provide you with tools to address problems of critical importance to humans such as climate change, developing cancer drugs or managing traffic flows.
- > Statistics as a Double Major subject can be combined with most other academic subjects in the Bachelor of Arts degree. This flexibility means you can combine your interest in aspects of society with knowledge of the statistical tools needed to understand data from those fields.
- > Data recording is happening at unprecedented levels on local, national and global scales. The ability to transform data into usable knowledge is a highly sought-after and desirable skill in today's workforce, be it in business, science, health or social sciences. This subject will strongly enhance your employability.

After Graduation

- > Graduates of a degree in Statistics are highly data literate and because of this are very much sought-after by employers. Critical thinking, being analytically focused and being adaptable to varying work environments are among the strong skills and traits of Statistics graduates that are attractive to employers. Graduates have a wide range of career options open to them, including employment in the civil service, industry and business, scientific research, medical research, environmental research, financial services and actuarial roles.
- > Postgraduate study options at Maynooth University are also available.

“I initially joined Maynooth University as a Computer Science and Software Engineering student. But before the end of first year, I discovered that I had a much stronger passion in physics than computer science. Because of my subject choices, I was able to transfer from the Computer Science and Software Engineering course to the Bachelor of Science programme. Little did I know that this opportunity and decision would completely change the view of my career and life.

After I completed my BSc at Maynooth University, I joined Intel as a manufacturing technician, where I worked on 14 nm technology node defect metrology tools. The versatility of my BSc showed very quickly to me, I was not only able to start my career in the semiconductor industry, but I was also able to start my Masters in engineering while I was still working at Intel.

After I completed my Masters, I joined Nokia Bell Labs as a doctoral researcher where I investigated the heat transfer mechanisms of in-house developed integrated evaporative heat exchangers.

After my doctorate, I re-joined Intel as a Process Integration and Yield Engineer where I was responsible for inline performance of fin and isolation layers on multiple technology nodes. After a couple of months into my engineering role, I was sent to the United States for a process development and technology transfer assignment with the Portland Technology Development group. After completing my assignment with Intel, I joined University of Maryland as a Postdoctoral Researcher in experimental condensed matter physics.

I would advise future students to explore beyond your degree course and use the supports available such as the Maths Support Centre. I was part of the Anime Society, and I had a wonderful time there as I got to meet a lot of interesting people beyond the science and maths circle. Joining a society or two is a great way to share and discuss your interest with people outside your course.”

Places: 250

Duration: 4 years

Erasmus/Study Abroad Option: Yes - subject to availability

Placement Option: No

Mature Applicants: See p. 156

QQI Link: See p. 156

UK, EU & International Applicants: See p. 159

Leaving Certificate Minimum Entry Requirements:

2H5 & 4O6/H7, O6/H7 Irish, English & a Science subject (i.e. Agricultural Science, Applied Mathematics, Biology, Chemistry, Computer Science, Physics or Physics with Chemistry) & O4/H7 Mathematics.

Why Maynooth University Science?

The Maynooth University Faculty of Science and Engineering is engaged in cutting-edge research in various scientific fields, with professors bringing their expertise into the classroom.

We take great pride in our warm and supportive campus community, which creates a positive learning environment where students can thrive academically and feel comfortable asking questions.

Our MH201 BSc Science programme goes beyond just teaching content – we focus on nurturing critical thinking, problem-solving, and effective communication skills, all of which are valuable for a wide range of careers.

The Faculty of Science and Engineering at Maynooth University comprises the following departments:

1. The Department of Biology
2. The Department of Chemistry
3. The Department of Computer Science
4. The Department of Electronic Engineering
5. The Department of Mathematics and Statistics
6. The Department of Physics
7. The Department of Psychology

All Faculty of Science and Engineering departments are involved in a diverse range of interesting and dynamic research areas. Visit the departments' webpages for more detail and read the pages that follow for MH201 subject information relating to each department.

Why MH201 Bachelor of Science Degree?

- > MH201 BSc Science is the most sought-after degree in the Faculty of Science and Engineering at Maynooth University.
- > It is the perfect choice for those who are curious about the natural world and want to understand how it operates from the smallest atom to the vastness of space.
- > This degree is ideal for students interested in multiple areas of science and who want the flexibility to explore their interests before specialising.
- > MH201 BSc Science will equip you with valuable skills that go beyond specific scientific knowledge. You will hone your critical thinking, problem-solving, and analytical abilities. You will learn to communicate complex ideas effectively, both in writing and verbally. These skills are highly sought after by employers in various fields, making it a versatile and rewarding choice.
- > Transitioning into MH201 - Orientation/Welcome Week September 2026 and ongoing supports:
 - > Orientation/Welcome Week is designed to help our new students to seamlessly transition into university life. You will find yourself quickly immersed in the vibrant Maynooth University campus community and in your new Bachelor of Science degree. Our experienced staff will be on hand to provide advice and support throughout the year at our award-winning Maths Support Centre and our dedicated Computer Science Centre.

Structure of the Maynooth Bachelor of Science Degree

- > Four subjects in 1st year, one of which is Mathematics. Students choose their three other science subjects from the seven remaining subjects - listed on page 67.
- > No decision about subject choice is necessary until four weeks after commencement of 1st year. This gives you a chance to sample various subjects and make an informed decision.
- > 2nd year - continuing with three of your 1st year subjects or two of your 1st year subjects with your choice of an Elective or Critical Skills (for more about Electives and Critical Skills see page 14).
- > 3rd year - continue with two subjects.
- > 4th year - continue with one or two subjects.

MH201 offers potential transfer opportunities into other degrees which are outlined together with the transfer criteria on the following page.

Career pathways for MH201 graduates:

Depending on the subjects chosen (and potential further specialisation), roles for MH201 graduates include, but are not limited to:

- | | |
|-----------------------|----------------------------|
| > Astrophysicist | > Global Health Specialist |
| > Biomedical Engineer | > Immunologist |
| > Botanist | > Mathematician |
| > Chemist | > Medical Physician |
| > Computer Scientist | > Meteorologist |
| > Cosmologists | > Physicist |
| > Cryptographer | > Science Communications |
| > Data Scientist | > Science Educator |
| > Environmentalist | > Statistician |
| > Genetic Specialist | > Zoologist |

MH201 Bachelor of Science Degree

(continued)

MH201 Course Structure

1st year	2nd year	3rd year	Final year Double Major OR	Final year Single Major
> Mathematics (required in 1st year) > Plus choose three subjects from: > Biology > Chemistry > Computer Science > Data Science⁷ > Engineering Science⁶ > Experimental Physics > Mathematical Physics	Continue with 3 of the 4 subjects taken in 1st year > Biology > Chemistry > Computer Science¹ > Engineering Science⁶ > Experimental Physics > Mathematical Physics > Mathematics > Statistics⁴ > Option to choose 10 credits of Critical Skills or a 10 credit Elective (see p. 14 for details)	Continue with 2 of the 3 subjects taken in 2nd year > Biology > Chemistry³ > Computer Science² > Engineering Science⁶ > Experimental Physics > Mathematical Physics³ > Mathematics (Applied) > Mathematics (Pure) > Statistics^{4,5}	Double Major: continue with your two subjects taken in 3rd year > Biology > Chemistry³ > Computer Science² > Engineering Science⁶ > Experimental Physics > Mathematical Physics³ > Mathematics (Applied) > Mathematics (Pure) > Statistics^{4,5}	Single Major: continue with one of the two subjects taken in 3rd year > Biology > Chemistry³ > Computer Science² > Engineering Science⁶ > Experimental Physics > Mathematical Physics³ > Mathematics (Applied) > Mathematics (Pure)

MH201 Flexibility

1st year	2nd year	Possible topics
Four weeks to decide on subject choice. During Orientation, students will have the opportunity to learn about more about subject selection within MH201.	Option to choose 10 credits of Critical Skills or 10 credits of an Elective (see p. 14 for details)	For module details see the subject pages

Transfer opportunities into specialised degrees from MH201

1st year	2nd year specialised degree	Requirements for eligibility to transfer - having successfully completed 1st year MH201
MH201 BSc Bachelor of Science Degree	MH202 BSc Biotechnology	Students must take Biology, Chemistry and Maths plus 1 other available 1st year subject. Students must achieve an overall grade of 60%. Places are limited and are based on results.
	MH204 BSc Physics with Astrophysics	Students attaining 60% in Experimental Physics and 60% in either Mathematics or Mathematical Physics in 1st year of MH201 may apply to transfer into 2nd year of MH204. Places are limited and are based on results.
	MH205 BSc Biomedical Science (NEW)	Students must take Biology, Mathematics plus 2 other available subjects. Transfer is based on 1st year performance and 1st year university results. Places are limited.
	MH207 BSc Data Science	Students must take Computer Science/Mathematics/Data Science plus 1 other available 1st year subject. Students must pass the year and achieve an overall grade of 55% or greater in Mathematics in their 1st year science examination. Places are limited.
	MH210 BSc Pharmaceutical and Biomedical Chemistry	Students must take Mathematics, Biology, Chemistry plus 1 other available 1st year subject. Students must achieve an overall grade of 60%. Places are limited and are based on results.
	MH212 SED BSc Science (with Education)	Students must take Mathematics, Biology, Chemistry and Experimental Physics. Up to 2 places each year may become available in MH212 for students successfully completing their first year of MH201. Availability and selection will be on the basis of 1st year results and dependent on programme capacity.
	MH212 MCS BSc Computer Science and Mathematics (with Education)	Students must take Mathematics and Computer Science plus 2 available 1st year subjects. Up to 2 places each year may become available in MH212 for students successfully completing their first year of MH201. Availability and selection will be on the basis of 1st year results and dependent on programme capacity.
	MH212 MED BSc Mathematics (with Education)	Students must take Mathematics, Mathematical Physics plus 2 other available 1st year subjects. Up to 2 places each year may become available in MH212 for students successfully completing their first year of MH201. Availability and selection will be on the basis of 1st year results and dependent on programme capacity.
	MH304 BE Electronic Engineering	MH201 Engineering Science to 2nd year MH304 BE Electronic Engineering for students who have taken Engineering Science, Computer Science, Mathematics and one other subject. Subject to attaining 50% or more in Mathematics in the student's first sitting of 1st year exams, and passing 1st year. Subject to availability of places.
	MH602 BSc Computer Science and Software Engineering (through Science)	Students must take 22.5 credits of Computer Science (including CS172), Mathematics plus one other available subject. There is no limit on places.
	MH602 BSc Multimedia, Mobile and Web Development (through Science)	Students must take 22.5 credits of Computer Science, (including CS172), Mathematics plus one other available subject. There is no limit on places.

¹ Students taking Computer Science in second year must also take Mathematics.

² Students intending to take Computer Science as a Single Major degree must take Mathematics (Pure) or Mathematics (Applied) in third year.

³ Chemistry and Mathematical Physics cannot be taken together in third or fourth year.

⁴ Statistics may not be taken with Mathematical Physics in any year, or with Chemistry in third and fourth year. Students taking Statistics must also take Mathematics in second year.

⁵ Statistics can be, but does not have to be, combined with Mathematics in third and fourth year.

⁶ Engineering Science cannot be taken with Biology. Students taking Engineering Science must also take Computer Science. Students may take Computer Science and not take Engineering Science.

⁷ Data Science cannot be combined with Mathematical Physics. Students taking Data Science in first year can follow on with Statistics in second year, provided they get 55% in first year Mathematics. However, Data Science in first year is not a requirement for taking Statistics in second year.

Biology

MH201 Points 2025: 352

For an overview of the full BSc Bachelor of Science degree MH201 and minimum entry requirements see page 66.

Subject Overview

> **Biology is the study of life - everything from the tiniest microbe to entire ecosystems that spread across the planet. It encompasses all aspects of living things including their structure, function, growth, origin, evolution, distribution and interactions with the environment. There are many “umbrella” fields of biology including:**

- **Biochemistry:** the study of molecules and of chemical processes in living organisms.
- **Cellular biology:** the study of the cellular units of living things.
- **Ecology:** the study of how organisms interact with/in their environment.
- **Evolutionary biology:** the study of the origins and changes in the diversity of life over time.
- **Genetics:** the study of genetic inheritance.
- **Immunology:** the study of the immune system and how organisms defend themselves against microbes and disease.
- **Microbiology:** the study of bacteria, fungi and viruses, as well as communities of microorganisms (microbiomes).
- **Molecular biology:** the study of biological molecules.
- **Plant science:** the study of plants, including applications to crops.
- **Physiology:** the study of the functions of organisms and their parts.
- **Zoology:** the study of animals, including animal behaviour.

> **Many of these fields overlap, for example, to study animals (zoology) it is also important to know about evolution, physiology and ecology. To study cellular biology, it is important to know about biochemistry and molecular biology as well.**

> **The Biology Department is unique in the university system in Ireland because it houses several biological disciplines together. This means that most aspects of biology are taught alongside each other throughout the degree programmes. This allows students to establish links between different areas of biology and gives students an integrated and comprehensive view of biology, from cells to ecosystems. Over the years, undergraduate students are exposed to a wide range of**

biological disciplines, and are given the opportunity to focus on their chosen area of interest in fourth year (for example, immunology, or ecology, or microbiology).

> **Our researchers have excellent national and international reputations in biochemistry, biodiversity, bioinformatics, ecology, immunology, microbiology, molecular biology, molecular genetics, plant science and proteomics.**

> **Students may have the opportunity to move from MH201 into a related specialised degree after first year. See page 67 for details.**

After Graduation

> Students graduating with a Biology Major (or double major with another subject) have found careers in the agri-food and drinks sector and in pharmaceutical industries (particularly if Chemistry is taken as a second subject). Our graduates have secured employment in the conservation services, agricultural services, and research in environment and medical areas.

> A Biology Major also provides strong foundations for careers in areas such as education, forensic science, health services, scientific research and science writing.

> The Biology Department offers a range of postgraduate study options, including Masters degrees (MSc) in Biology (research) and Immunology & Global Health (taught) and doctoral degrees (PhD) in Biology.

See p. 67 for full details about subject combination limits in MH201.	> Biology > Continue with 2 of your 1st year subjects > Optional 10 credit Elective or Critical Skills available in 2nd year (see p. 14 for details)	> Biology > Continue with 1 of your 2nd year subjects	> Biology may be taken as a Single Major or as a Double Major with the other subject taken in 3rd year

Sample Modules

1st year	2nd year	3rd year	Final year
> From Cell to Organism > Biological Function and Diversity	> Biochemistry > Animal Physiology > Evolutionary Biology > Molecular Biology of the Cell	> Immunology > Ecology > Microbiology > Molecular Biology > Plant Biology or Bioinformatics	Choose from an extensive range of topics, such as > Advanced Immunology / Tumour Biology / Medical Mycology / Antibiotics / Clinical Proteomics / Human Nutrition & Metabolic Disease / Plant Biotechnology / Molecular Ecology and Biogeography. > Option of either a lab-based or literature-based research project.

Chemistry

MH201 Points 2025: 352

For an overview of the full BSc Bachelor of Science degree MH201 and minimum entry requirements see page 66.

Subject Overview

- > **MH201 provides an excellent education in all the major branches of Chemistry, where topics ranging from fundamentals to the frontiers of modern Chemistry are covered.**
- > **In the early years, in addition to the core Chemistry modules, there is a flexible curriculum to suit personal interests, allowing courses and modules in other sciences, Critical Skills or an Elective to be combined with the core Chemistry content (Critical Skills/Elective option in second year only).**
- > **There is scope for some specialisation, through appropriate choice of modules in the fourth year. In fourth year, students have the opportunity to undertake a Single Major or Double Major degree, as well as direct experience of research through an in-depth individual research project.**
- > **The Department of Chemistry at Maynooth University offers state-of-the-art facilities and high standards in both teaching and research, which ensures a highly supportive learning environment, as well as a personal supervisor to oversee an in-depth final year research project.**
- > **In addition to becoming an expert in chemical science, students develop skills in problem-solving, critical thinking, communication, and scientific writing. These highly valued transferable skills means graduates are well-prepared for a range of careers and employment opportunities in chemistry and non-chemistry disciplines.**
- > **Potential to move from MH201 into a related specialised degree after first year. See page 67 for details.**

After Graduation

- > The pharma-chemical industry in Ireland employs more than 26,000 people directly and produces over €100bn in annual exports. Chemists work in pharmaceutical and biotechnology companies, agrochemical firms, semiconductor manufacturers and manufacturers of detergents, paints and cosmetics.
- > Employment in the business and financial sectors, the food sector, the government e.g. forensic science, journalism and the health services.
- > Postgraduate study options include: Research MSc and PhD in Chemistry.

BSc Biotechnology p. 136

BSc Physics with Astrophysics p. 138

BSc Pharmaceutical and Biomedical Chemistry p. 143

BSc Science (with Education) p. 144

BSc Food Science and Human Nutrition p. 146

MH201 Course Structure

1st year

- > Chemistry
- > Mathematics
- > Choose 2 other Science subjects (Biology, Computer Science [15 or 30 credits], Data Science, Engineering Science, Experimental Physics, Mathematical Physics. Chemistry may not be taken with Mathematical Physics or Statistics in 3rd or 4th year). See p. 67 for full details about subject combination limits in MH201.

2nd year

- > Continue with Chemistry plus 2 of your 1st year subjects
- > Optional 10 credit Elective or Critical Skills in 2nd year (see p. 14 for details)

3rd year

- > Continue with Chemistry plus 1 of your 2nd year subjects

Final year

- > Chemistry may be taken as a Single Major or as a Double Major with the other subject taken in 3rd year

Sample Modules

1st year

- > General Chemistry 1 & 2

2nd year

- > Organic Chemistry
- > Spectroscopy and Analytical Chemistry
- > Physical Chemistry
- > Co-ordination Chemistry and s-Block Groups

3rd year

- > Analytical Techniques
- > Heterocyclic, Carbohydrate and Peptide Chemistry
- > Solid State and p-Block Chemistry
- > Thermodynamics and Group Theory
- > Organic Chemistry
- > Transition Metal Chemistry

Final year

- > Project
- > Sustainable and Environmental Chemistry
- > Materials Chemistry
- > Bioinorganic and "F" Block Chemistry
- > Catalytic and Stereoselective Organic Chemistry

Computer Science

MH201 Points 2025: 352

For an overview of the full BSc Bachelor of Science degree MH201 and minimum entry requirements see page 66.

Subject Overview

- > **Computer Science at Maynooth University is the study of the principles and use of computers and software.**
- > **Advanced topics such as computer vision, theoretical computer science, robotics, cryptography and artificial intelligence may be studied, depending on the pathway students take.**
- > **Students enjoy the huge benefit of studying other science subjects with Computer Science in first year, lending graduates a wider frame of reference. There is a wide variety of options after first year.**
- > **The Department of Computer Science at Maynooth University was founded in 1987 and is located in the Eolas Building, a €20M state-of-the-art ICT hub. Our laboratories and equipment provide excellent facilities for practical work and all our courses include a mix of lectures and laboratory work.**
- > **We provide a supportive and enjoyable atmosphere for learning through our Computer Science Centre, extensive assistance during practical work and we are available outside of lectures to help our students.**
- > **Potential to move from MH201 into a related specialised degree after first year. See page 67 for details.**

After Graduation

- > Computer Science graduates can find employment in graphical interface design, medical imaging, video-based information systems, multimedia/web development, electronic publishing, computer assisted translation, e-learning systems development, games development, software development.
- > Non-computing industries: financial services, business and administration, health services, and the automobile and aeronautics sectors. The broad choice of subjects to choose from in first year helps prepare students for a wider array of jobs upon graduation.
- > Computer Science is a teaching subject at second level and therefore a career in education may also be possible following further postgraduate study.
- > Postgraduate study options currently include: MSc Computer Science (Software Engineering) / MSc in Data Science and Analytics / Professional Master of Education (Second Level Teaching) / MSc or PhD Computer Science (by research).

> Introduction to programming, computer systems and computer science theory	> Algorithms & Data Structures > Databases > Operating Systems	> Computer Architecture > Software Engineering > Introduction to UX, (UI) and Interaction Design > Networks > Web Information Processing > Computation & Complexity	> Theory of Computation > Programming Language Semantics > Final Year Project > Choice of CS topics

Data Science

MH201 Points 2025: 352

For an overview of the full BSc Bachelor of Science degree MH201 and minimum entry requirements see page 66.

Subject Overview

- > **Data Science is the science of collating, managing, analysing, visualising and understanding data. It is key to unlocking the hidden wisdom that is stored in the vast amounts of data available in today's world.**
- > **In MH201, students have the opportunity to study Data Science as a subject in first year - introducing students to the basics of how to manipulate, visualise and 'bring to life' large volumes of data. The hands on data experience that is gained in first year Data Science will be invaluable to any scientist, whether they plan to pursue the life sciences (e.g. Biology), the physical sciences (e.g. Experimental Physics) or are more interested in the highly quantitative sciences (e.g. Statistics, Mathematics, Computer Science).**
- > **Are you considering taking Statistics as a subject (available in MH201 from second year) to degree level? If so, taking Data Science in first year is strongly recommended. Taking Data Science in first year gives students the chance to try out the practical side of analysing and visualising data, while taking Statistics from second year gives students a deeper understanding of modelling and analysis techniques.**
- > **Are you choosing Computer Science in first year and considering taking it through to degree level? If so, Data Science in first year is highly complementary to first year Computer Science: these subjects combine the hands on practical side of working with data that students get in first year Data Science with the more rigorous programming and database skills that they learn in first year Computer Science.**

After Graduation

- > Data science graduates pursue careers with a wide range of organisations such as multinationals, financial services, and professional services companies. Some related roles in data science include data scientist, business intelligence analyst, customer insight lead, risk analyst, knowledge engineer, and data programmer.

MH201 Course Structure

1st year

- > In the BSc programme, you take Mathematics and Data Science with two other subjects except Mathematical Physics. See p. 67 for full details about subject combination limits in MH201.

2nd year

- > Data Science is a 1st year subject only, but in 2nd year students can take Mathematics, either of their other 1st year subjects, or Statistics (which begins as a subject in 2nd year). Students who enjoyed and excelled in Data Science in 1st year are recommended to take Statistics and Mathematics in 2nd year.
- > Statistics – see p. 76 for details and entry requirements – MH201 Statistics
- > Mathematics – see p. 75 for details – MH201 Mathematics
- > Optional 10 credit Elective or Critical Skills in 2nd year, (see p. 14 for details)

- > Students who have taken Mathematics, Data Science and Computer Science in 1st year may be considered for transfer entry into year 2 of MH207 Data Science (subject to entry requirements) – see p. 67.

Sample MH201 subject choice pathways that include Data Science/Statistics

1st year

- > Mathematics, Data Science, Biology, Computer Science
- > Mathematics, Data Science, Experimental Physics, Computer Science

2nd year

- > Mathematics, Statistics, Computer Science
- > Mathematics, Statistics, Biology
- > Mathematics, Computer Science, Experimental Physics

3rd year

- > Statistics, Computer Science
- > Statistics, Biology
- > Statistics, Mathematics (Pure or Applied)

Final year

- > Statistics, Computer Science
- > Biology
- > Statistics, Mathematics (Pure or Applied)

Sample Modules

1st year

- > Introduction to Data Science 1
- > Introduction to Data Science 2
- > Please see Statistics on p. 76 for possible follow on topics

Engineering Science

MH201 Points 2025: 352

For an overview of the full BSc Bachelor of Science degree MH201 and minimum entry requirements see page 66.

Subject Overview

- > **Electronic Engineering and Engineering Science are at the forefront of technological change - developing the newest phones, computers, toys, robots and cars. One of the newest areas for electronic engineers is the space where software and hardware meet.**
- > **Through our research programmes, Electronic Engineering at Maynooth has developed world-class expertise in the area of mobile communications, biomedical diagnostics and technologies, and the intelligent control of large machines such as Robots or wave machines.**
- > **Each of these areas is matched to rapidly growing industries and excellent job opportunities. By bringing this deep knowledge to all the undergraduate programmes, we provide our graduates with a world-class electronic engineering education but also a head start in these exciting and important areas.**
- > **Potential transfer opportunity having completed first year MH201 Engineering Science to second year MH304 BE Electronic Engineering. See page 67 for details.**

After Graduation

- > Graduates of this degree will come with a strong background in software and electronic systems, skills that are in high demand throughout the ICT sector in Ireland and internationally. Students who take a Computer Science and Engineering Science combination will have particular strength when seeking opportunities in companies which require a close fusion of hardware and software systems – such as robotics or highly

integrated devices (such as engine management, digitally controlled products).

- > Those taking another science subject can access careers in companies looking at sensing and monitoring – in the medical, biological and environmental sectors.

1st year	2nd year	3rd year	Final year
> Engineering Science is taken with Mathematics, Computer Science (15 or 30 credits) and 1 other Science subject from Chemistry, Data Science, Experimental Physics, Mathematical Physics. See p. 67 for full details about subject combination limits in MH201.	> Students take Engineering Science, Mathematics and another subject. > Optional 10 credit Elective or Critical Skills in 2nd year (see p. 14 for details) > Transfer pathway: 1st year MH201 Engineering Science to 2nd year MH304 BE Electronic Engineering for students who have passed first year taking Engineering Science, Computer Science, Mathematics and one other subject. Subject to attaining 50% or more in Mathematics in their 1st sitting of 1st year exams. Subject to availability of places.	> Continue with Engineering Science and one other subject.	> You choose between Engineering Science as a (i) Single Major or (ii) Double Major degree > Available Science subjects in conjunction with Engineering Science: Mathematics, Chemistry, Computer Science, Experimental Physics, Mathematical Physics or Statistics

Sample Modules

Students cover Electronic Engineering fundamentals, Systems, Signals and Control along with other topics with Project based learning in final two years.

1st year	3rd year	Final year Double Major	OR Final year Single Major
> Electronic Engineering Fundamentals > Introduction to Systems & Control	> Analogue Electronics > Signals & Systems > Realtime and Embedded Systems > Object-Oriented Systems > System Dynamics > Analogue Electronics Project	> Analogue Electronics > Digital Signal Processing > Electromagnetic Fields and Machines > Control Systems > Engineering Design Project (10 credits)	> Computation and Simulation > Digital Signal Processing > Electromagnetic Fields and Machines > Control Systems > Unconstrained Optimisation > Computer Control Systems > RF Circuits & Systems > ASIC Design with Verilog > Final Year Project (20 credits)
2nd year			
> Computing for Engineers > Digital Systems > Electric Circuits			

Experimental Physics

MH201 Points 2025: 352

For an overview of the full BSc Bachelor of Science degree MH201 and minimum entry requirements see page 66.

Subject Overview

- > **Physics deals with understanding the nature of concepts such as motion, forces, energy, matter, electricity, heat, sound and light. Often a distinction is made between classical physics - which includes classical mechanics, acoustics, optics, thermodynamics, and electromagnetism - and modern physics - which is the physics of matter on a very small scale or under extreme conditions, and includes quantum physics, atomic and nuclear physics, solid state physics and elementary particle physics.**
- > **Physics is relevant to many other sciences, such as astronomy, biology, and geology. The combinations of these fields are called astrophysics, biophysics, and geophysics. As a science, physics has always been regarded as a fundamental area of human knowledge, which is evidenced by its high profile in the media and general level of human interest.**
- > **Field trips and scientific visits are organised to other facilities such as L'Observatoire d'Haute Provence (France), the European Space Agency (the Netherlands), Jodrell Bank (UK), St. Luke's Hospital, Dublin and Armagh Observatory.**
- > **The University has a long tradition of excellence in Experimental Physics; the inventor of the induction coil, Nicholas Callan, was Professor of Experimental Physics here from 1826 to 1864.**
- > **We also offer a broad and exciting curriculum in a vibrant learning environment as part of our four-year degree programmes in Experimental Physics (BSc Single Major and Double Major) and a BSc in Physics with Astrophysics (MH204). Our facilities are first class and include state-of-the-art laboratories, an observatory with a computerised Meade telescope, an atmospheric physics facility and radio and cosmic ray telescopes.**

After Graduation

- > **Graduates from the Department have progressed to roles at Met Éireann, St. Luke's Hospital Dublin, the European Space Agency, NASA, Caltech, Intel, Hewlett Packard and the Jet Propulsion Laboratory, to name but a few.**
- > **Physicists can find challenging and rewarding careers in fields such as medical physics, computational physics, forensic science, meteorology, astrophysics, environmental and atmospheric physics. Physics graduates may also consider careers in areas such as computing, electronics, telecommunications, semiconductor industry, banking, finance and management.**
- > **Students who do sufficiently well are eligible to undertake research for an MSc or PhD degree. We have an impressive research record in astronomy, astronomical instrumentation and space science, atmospheric and environmental physics, atomic and molecular physics, imaging with THz radiation and fluid dynamics.**

> Experimental Physics > Mathematics > Plus choose 2 other Science subjects (Biology or Engineering Science, Chemistry, Computer Science [15 or 30 credits], Data Science, Mathematical Physics). Students taking Engineering Science must also take Computer Science. Students may take Computer Science and not take Engineering Science. See p. 67 for full details about subject combination limits in MH201.	> Experimental Physics > Continue with 2 of your 1st year subjects > Optional 10 credit Elective or Critical Skills in 2nd year (see p. 14 for details) OR > Potential to move from MH201 into a related specialised degree. See p. 67 for details.	> Experimental Physics > Continue with 1 of your 2nd year subjects	> Experimental Physics may be taken as a Single Major or as a Double Major with the other subject taken in 3rd year

Sample Modules

1st year	2nd year	3rd year	Final year
> Introduction to Classical Physics: Mechanics, Physics of Heat, Electromagnetism and Optics > Introduction to Atomic, Molecular and Nuclear Physics > Introduction to Astrophysics: Solar System, Stars and Galaxies	> Electricity and Magnetism > Physical Optics and Lasers > Mechanics and Thermal Physics > Quantum Physics	> Celestial Mechanics and Relativity > Electronics > Quantum Mechanics > Applied Electromagnetics > Thermodynamics and Statistical Mechanics > Introduction to Computational Physics	> Nuclear, Radiation and Particle Physics > Computational Optics > Electromagnetic Radiation > Physics of Atoms and Quanta > Solid State Physics > Device Physics > Individual Project

Mathematical Physics

MH201 Points 2025: 352

For an overview of the full BSc Bachelor of Science degree MH201 and minimum entry requirements see page 66.

Subject Overview

- > **Mathematical physics, or theoretical physics, is the study of the fundamental laws of nature that govern our existence; from the interactions of quarks and gluons through the properties of metals and the aerodynamics of flight, to the evolution of stars and galaxies.**
- > **Many of the technologies we now take for granted have their origins in fundamental physics research, including PET scanners, lasers, Wi-Fi and the world wide web.**
- > **Mathematical methods developed in mathematical physics have found their way to a wide range of applications, from financial markets and computer science to genetics and brain studies.**
- > **The study of Mathematical Physics at Maynooth University has a long and distinguished tradition, of over 200 years. Modern theoretical physics and applied mathematics are exciting and dynamic and that excitement is reflected in the research projects which are pursued in the Department.**
- > **As well as being introduced to the major ideas and developments in theoretical physics and applied mathematics, you will be equipped with the tools to meet current and future developments in science, engineering, finance and other technologies of the future.**
- > **If students achieve at least 70% in both subjects and an 80% average across both Mathematical Physics and Mathematics in first year, they may choose to specialise in Mathematical Physics and Pure Mathematics from second year, following the course structure of MH206 Theoretical Physics and Mathematics.**
- > **Potential to move from MH201 into a related specialised degree after first year. See page 67 for details.**

After Graduation

- > Physics and mathematical science graduates with analytical and problem-solving skills are in high demand in our technology and data driven society.
- > Your career options include research and development, computing and software engineering, electronics, telecommunications, semiconductors, banking, finance, management and teaching.
- > Entry into research is also an option, including multi-disciplinary fields such as nanotechnology, biophysics, financial mathematics or medical physics.
- > The Department of Physics offers a range of postgraduate study options including an MSc in Theoretical Physics and Mathematics.

1st year	2nd year	3rd year	Final year
> Mathematical Physics > Mathematics > Choose 2 other Science subjects (Biology or Engineering Science, Chemistry, Computer Science [15 or 30 credits], Experimental Physics). Mathematical Physics cannot be taken with Chemistry in 3rd or 4th year. Students taking Engineering Science must also take Computer Science. Students may take Computer Science and not take Engineering Science. See p. 67 for full details about subject combination limits in MH201.	> Mathematical Physics > Choose 2 of your 1st year subjects or > Mathematical Physics and Mathematics (Pure) only (subject to performance in 1st year - see above for details) > Optional 10 credit Elective or Critical Skills in 2nd year (see p. 14 for details)	> Mathematical Physics > Choose 1 of your 2nd year subjects	> Mathematical Physics may be taken as a Single Major or as a Double Major with the other subject taken in 3rd year

Sample Modules

1st year	2nd year	3rd year	Final year
> Space-time > Force > Newton's laws > Quantum physics > Einstein's special theory of relativity > Angular momentum > Conservation laws	> Vector calculus > Statistical and thermal physics > Electricity and magnetism > Vibrations and waves	> Mechanics of Lagrange and Hamilton > Quantum mechanics > Special relativity > Computational physics > Ordinary differential equations	> Statistical mechanics > Physical Cosmology > Particle Physics > General relativity > Partial differential equations > Fluid mechanics > Quantum information processing > Condensed matter theory

Topics listed are subject to change; individual modules may not be offered in a particular year.

Mathematics

MH201 Points 2025: 352

For an overview of the full BSc Bachelor of Science degree MH201 and minimum entry requirements see page 66.

Subject Overview

- > **The academic staff in the Department of Mathematics and Statistics have a diverse range of research interests in areas including algebra, analysis, data analysis, dynamics, geometry, number theory, statistical modelling and topology. The Department offers multiple programmes to suit a range of Mathematical backgrounds, from the intensive Pure Mathematics programmes, which are aimed at students with a strong interest in abstract mathematics and a flair for analytical reasoning, to the more applied programmes which appeal to students who enjoy the more concrete areas of the subject.**
- > **Mathematics is the logical and abstract study of pattern. It involves an interplay between the concrete and the abstract: the ever-changing world around us is one of the key inspirations for the invention and investigation of abstract mathematics, and the discoveries of abstract mathematics have important and unexpected applications in the world around us.**
- > **Our Mathematics degrees aim to bridge the gap between school Mathematics and current frontiers of knowledge. Students learn to think hard and rigorously about questions and to solve new problems – invaluable skills that can be transferred to any area of life and any future job.**
- > **In the four-year MH201 degree, students can take Mathematics as a subject in the first two years, and then choose between Mathematics (Applied) and Mathematics (Pure) at the beginning of third year.**
- > **Potential to move from MH201 into a related specialised degree after first year. See page 67 for details.**

After Graduation

- > Well-trained mathematicians are always in demand. A degree in Mathematics (Pure or Applied) from Maynooth University not only provides specialist knowledge, it also trains graduates to think logically and clearly.
- > A degree in a mathematical discipline opens the door to jobs in a variety of fields such as finance and banking, insurance, the civil service, teaching, industrial and commercial management, administration and technical, scientific and engineering work in industry and in research and development, trading, information technology, education and data analysis.
- > The Department offers a range of postgraduate study options.

MH201 Course Structure

1st year

> Mathematics and 3 other Science subjects (choose from Biology or Engineering Science, Chemistry, Computer Science [15 or 30 credits], Data Science, Experimental Physics & Mathematical Physics). Students taking Engineering Science must also take Computer Science. Students may take Computer Science and not take Engineering Science. See p. 67 for full details about subject combination limits in MH201.

2nd year

> Mathematics and 2 other subjects
> Optional 10 credit Elective or Critical Skills in 2nd year (see p. 14 for details)

3rd year

> Mathematics (Pure) or Mathematics (Applied) and 1 other subject studied in 2nd year

Final year

> Mathematics (Pure) or Mathematics (Applied) is taken as a Single Major or as a Double Major taking Mathematics (Pure) or Mathematics (Applied) and your 3rd year subject. Available Science subjects: Biology, Chemistry, Computer Science, Engineering Science, Experimental Physics, Mathematical Physics and Statistics as a Double Major in 3rd and 4th year.

Sample Modules

1st year

> Calculus
> Linear Algebra

2nd year

> Calculus
> Linear Algebra
> Statistics

3rd year

> **Mathematics (Applied):** Differential Equations, Complex Analysis, Number Theory, Cryptography, Coding Theory, Operations Research
> **Mathematics (Pure):** Real Analysis, Complex Analysis, Metric Spaces, Group Theory, Rings and Fields

Final year

> **Mathematics (Applied):** Graph Theory, Numerical Analysis, Geometry, Group Theory
> **Mathematics (Pure):** Topology, Galois Theory, Number Theory, Differential Geometry

Statistics

MH201 Points 2025: 352

For an overview of the full BSc Bachelor of Science degree MH201 and minimum entry requirements see page 66.

Subject Overview

- > **Statistics deals with the collection, analysis and interpretation of data.**
- > **Students learn how to use statistical models and visualisation methods to unlock valuable information and hidden patterns in large volumes of data.**
- > **A degree in Statistics provides students with tools to address problems of critical importance to humans such as climate change, drone analytics, biodiversity loss or designing medical products.**
- > **Statistics is available as a subject from second to fourth year. Interested students are recommended to take Data Science as a subject in first year. Statistics is offered as a Double Major subject to degree level which can be combined with other subjects in the Bachelor of Science degree. This flexibility means students can easily combine other scientific interests with Statistics.**

After Graduation

- > **Complex and voluminous data arises in all aspects of science.**
The ability to transform data into usable scientific knowledge is a highly sought-after and desirable skill in today's workforce and in almost all scientific research areas. Studying Statistics through to degree level, or for a portion of the degree, will strongly enhance the student's employability and skill-set as a scientist.
- > **Critical thinking, an ability to analyse big data and being adaptable to various work environments are among the strong skills and traits of Statistics graduates.**
- > **Graduates have a range of career options open to them, including employment in the civil service, industry and business, scientific research, medical research, environmental research, financial services and actuarial roles.**
- > **Postgraduate study is also possible and the Department offers a range of options.**

Statistics in the Bachelor of Arts degree - see Section 1

BSc Data Science p. 141

BSc Quantitative Finance p. 80

MH201 Course Structure

1st year

Statistics begins as a subject in 2nd year.

In 1st year of the BSc Double Major programme, you take Mathematics with two or three other subjects. Students interested in Statistics from 2nd year are strongly recommended to take Data Science as one of their subjects in 1st year. See p. 67 for full details about subject combination limits in MH201.

2nd year

In the BSc Double Major programme, you take Statistics, Mathematics and one other subject.

- > Optional 10 credit Elective or Critical Skills in 2nd year (see p. 14 for details)

Statistics cannot be combined with Mathematical Physics in 2nd year.

3rd year

Statistics is taken in 3rd year along with 1 of your 2nd year subjects; the second subject can be, but does not have to be, Mathematics (Applied or Pure). Statistics cannot be combined with Mathematical Physics or Chemistry in 3rd year.

Final year

Statistics is available as a Double Major. Statistics can be combined with all other subjects except Mathematical Physics or Chemistry in 4th year.

Sample Modules

1st year

- > Introduction to Data Science 1 & 2

2nd year

- > Data Analysis
- > R programming for Statistics and Data Science
- > Design and Analysis of Experiments
- > Nonparametric Statistics

3rd year

- > Probability
- > Linear Models
- > Data Visualisation
- > Generalized Linear Models
- > Time Series

Final year

- > Applications of Complex Models
- > Advanced R programming
- > Bayesian Data Analysis
- > Statistical Machine Learning
- > Statistical Inference

“Since graduating, my journey as a professional footballer has been driven by dedication and resilience. After completing my undergraduate degree in MH404 Business and Management at Maynooth University, I signed with Shelbourne Football Club, where I spent 18 enjoyable months playing under Manager Damien Duff.

During my time at MU, I was part of the Sports Scholarship programme. Throughout my undergraduate degree, I played for the university soccer team and had the chance to travel around the country, competing against other top universities.

My undergraduate years at MU were a period of real growth for me, both in terms of confidence and knowledge. Each year, I could see the progress I was making within the University, which translated well onto the pitch. Group assignments helped me develop strong teamwork skills, while individual projects taught me the importance of personal performance and accountability.

Wanting to push myself further, I decided to pursue an MSc in Strategy and Innovation. The lectures were rich in detail and incredibly beneficial, but it was the practical elements of the course that really helped me understand how to apply what I was learning to my career.

Alongside my football commitments, I also work for GMC Utilities Group, a civil engineering company. I was offered a permanent role after completing a work placement with them during my Masters. Balancing a career off the pitch with life as a professional footballer can be challenging at times, but it’s something I find very rewarding.”

UK, EU & International Applicants: See p. 159

Leaving Certificate: 2H5 & 4O6/H7, Irish, English & O1/H5 Mathematics

Degree Overview

- > This programme offers a dynamic and challenging path for students aiming to pursue a career in financial markets. Learn from leading experts across three different disciplines; Finance, Mathematics and Computer Science.
- > Students have the opportunity to put theory into practice during the work placement period, and enjoy the daily life of a professional in the financial services industry.
- > You will be ready to pursue a career in Financial Services using your skills in Finance, Mathematics and Computer Programming.
- > You will develop problem-solving skills that will open up a wide range of future career opportunities, not just in the financial sector but anywhere an analytical and innovative mind is required.

After Graduation

- > The combination of financial, mathematical and computer programming skills equip graduates to succeed and prosper in a fast-changing banking and financial sector.
- > Quantitative finance graduates have strong numeracy and computational skills, coupled with an ability to think critically and analytically – invaluable assets in a wide range of professions.
- > Graduates are ideally positioned to pursue a career in investment banking, treasury management, corporate finance, financial engineering, fintech and wealth management. Our graduates can be found working in the major financial centres of the world; New York, London, Hong Kong, Dublin, and many more.
- > Many graduates want to continue studying Finance. At postgraduate level, the School offers a number of options.

Mathematics

Degree Overview

- > This degree affords you the opportunity to become a highly sought-after graduate possessing the accounting, finance and transferable skills required of future business leaders. Graduates can develop rewarding careers with international mobility and high earning potential.
- > The degree is recognised by the professional accountancy bodies in Ireland (Chartered Accountants Ireland, the ACCA and the CIMA). Upon its successful completion you will be exempt from the first level of their professional examinations (CAP1 and equivalent) and well on the road to your professional accounting qualification, which requires you to complete a series of professional exams as well as on-the-job training.
- > On this degree, you will learn how the financial systems and markets work. You also will learn how to compile, analyse, interpret and communicate essential information about the operations of a business – whether that business be a small firm, a publicly traded corporation or an NGO (non-governmental organisation).
- > Expert faculty will guide you through a dynamic, supportive, and engaging learning environment, where academic excellence is matched with real-world relevance.
- > You will also have the opportunity to pursue a four-year degree. You can choose between a work placement in a leading accounting or finance firm, or indeed a study year abroad, enabling you to combine what you learn in Maynooth University with insights into industry or another culture.
- > There is a possible transfer option to this degree in second year for students who have completed the first year of the Bachelor of Arts degree (MH101). See page 28.

After Graduation

- > While graduates are likely to be primarily focused on a professional accountancy qualification, the numeracy skills, coupled with an ability to think critically and analytically, which are developed on this programme, are invaluable assets in a wide range of careers. Graduates have successful and rewarding careers in accounting, banking and financial services.
- > Many of our students continue to further postgraduate study in Accounting or Finance or one of a wide range of Business subjects at Maynooth University.

Course Structure

	1st year	2nd and Final year
Accounting is the major element studied with Finance and Economics.	Students are introduced to the fundamentals of accounting and finance in 1st year with no prior knowledge required, as we teach accounting from first principles. Students develop key analytical, technical and numeracy skills which create a solid foundation to build upon in subsequent years.	In 2nd and final year you will expand and deepen your knowledge of all areas of accounting and finance as well as gain an understanding of the financial environment in which businesses operate. Some students may choose to complete a work placement or study abroad year between 2nd and final year and graduate after the 4th year. (*The University will support you in the search for a placement job; however, the process is competitive).

Degree Overview

- > The BBS in Business and Management is the flagship undergraduate degree programme in the School of Business, offering comprehensive coverage of all major elements of business and our widest range of optional modules.
- > Business and Management students learn from international and local industry experts about how they can make a positive difference in the lives of customers, employees, colleagues, organisations and broader society through applying management best practices.
- > Students explore how to manage contemporary organisations and are offered exceptional flexibility and choice. This degree offers students insights into all of the major functions of business, as well as the opportunity to undertake specialist options in the subjects they most enjoy. This means students may specialise based on their strengths and interests.
- > The goal of the programme is to ensure graduates leave as critical thinkers, confident team players, and professionals equipped with strong knowledge of business functions and the practical skills required to thrive in today's evolving job market.
- > A transfer pathway to this degree is available in second year for students who have completed the first year of the Bachelor of Arts degree (MH101). See page 34 for details.

After Graduation

- > Typically, Business and Management graduates enter employment as general management graduate trainees in service or manufacturing organisations; work as functional specialists in marketing, sales, operations, management information systems, or human resource management. Careers in consulting, public service, and not-for-profit organisations are also popular.
- > Business and Management graduates may also continue their education through the various specialist postgraduate degree programs offered through the School of Business.

Course Structure

1st year

The first year is about building the foundations of knowledge in business and management. The fundamentals of business and management are covered in modules, including Management, Marketing, Innovation, Professional Skills and Business Ethics. No prior studies in business/management are required.

2nd year

The second year is about expanding your knowledge of the core disciplines and functions in business and management. Students take a combination of core and optional modules. Optional 10 credit Elective (see p. 14 for details). Some students may choose to complete a work placement or study abroad year between 2nd and 3rd year and graduate after the 4th year. (*The University will support you in the search for a placement job; however, the process is competitive).

Final year

The final year is about deepening your understanding of business in general, examining how functions and theories tie together at the strategic level. Students also have the opportunity to specialise through a choice of advanced optional modules.

Sample Modules

1st year

- > Introduction to Accounting
- > Introduction to Economics

Leaving Certificate: 2H5 & 4O6/H7, Irish, English & O4/H7 Mathematics

OPC (Open Choice Option):

Up to 4 weeks to decide on MH404 degree stream

Degree Overview

- > This degree focuses on organisations that transcend national borders, and how business is conducted across the globe. Students learn how organisations of all sizes internationalise their operations to exploit opportunities in the global market. Our International Business degree is ideal for students with a global outlook who wish to work either in local firms competing abroad or in subsidiaries of foreign multinationals, located either here or abroad. To live and work effectively within the global economy, an understanding of the theory and practice of international business management is essential.
- > Students develop key skills for lifelong learning, including how to analyse and think critically about solving business problems in an international environment.
- > The cultural, operational, marketing, and people-management insights gained through this degree are vital for understanding internationalisation, managing diverse teams across business units, and serving a wide range of international customers. Students will also explore how to respond to global social, economic, political, legal, and technological changes.
- > International Business students at Maynooth benefit from exceptional choice and flexibility. The programme includes modules that build core business management knowledge alongside more specialised modules focusing on the international dimensions of business.
- > International Business students also have the option of taking a four year degree with a work placement or study year abroad, thus combining what you learn in university with insights into industry or another culture.
- > Students who are interested in taking International Business with a language might wish to consider MH409. See page 87.
- > A transfer option to this degree is available in second year for students who have completed the first year of the Bachelor of Arts degree (MH101). See page 33.

After Graduation

- > This degree equips graduates with the skills necessary to be employed by multi-national companies, work in different countries, offering a range of exciting experiences, new knowledge, and other benefits that enhance careers. In today's interconnected world, business is conducted differently across cultures. The broad range of business skills developed in this programme can lead to diverse and rewarding careers.
- > Graduates will be well suited to employment in the Irish operation of a major multinational, working with Irish companies who supply to international customers, helping organisations to internationalise and grow, managing a diverse workforce and supply chain operations. Opportunities at a policy level, working for national organisations to promote Ireland as a destination for inward investment, for internationalising Irish business and for multinational operations in other countries exist.
- > Many of our students continue to further postgraduate study in a very wide range of Business, Accounting and Finance subjects at Maynooth University.

Places: 250 (MH404)**Duration:** 3 years (4 years with optional placement or Erasmus/Stu- dy Abroad)**Erasmus/Stu- dy Abroad Option:** Yes - subject to availability**Placement Option:** Yes* (see Course Structure for details)**Mature Applicants:** See p. 156**QQI Link:** See p. 156**UK, EU & International Applicants:** See p. 159**Leaving Certificate:** 2H5 & 4O6/H7, Irish, English & O4/H7 Mathematics**OPC (Open Choice Option):**

Up to 4 weeks to decide on MH404 degree stream

Degree Overview

- > Students develop core marketing skills and a thorough understanding of how the marketing function fits into a wider organisational context.
- > Learn to work with a wide range of both established and emerging marketing tools and channels, including digital and social media marketing, influencer marketing, as well as the evolving roles of AI and metaverse applications in modern marketing.
- > This degree also helps students to understand, where, when, and how to spend marketing budget to greatest effect; how to plan market research, develop strategic marketing plans, and create persuasive communications, while considering the needs of a multicultural, international business environment; and how marketing interacts with the operations and strategy of a firm as a whole.
- > Marketing is both profoundly local, selling to one customer, and global, selling to international markets. Our faculty, a blend of local and international experts, bring extensive experience in areas such as online retailing, digital marketing, SME marketing, and consumer behaviour, offering students practical and strategic insights into real-world marketing. They bring profound insights into the practicality and complexity of the Marketing subject.
- > Marketing students at Maynooth benefit from unmatched flexibility and choice. This degree offers the opportunity to undertake specialist options in subjects so students can focus their degree according to their own strengths and interests. Students also gain insights into Business as a whole, taking key modules in Management to complement their Marketing studies.
- > The opportunity to take a work placement in a multi-national or Irish firm for a year (subject to availability) provides students with practical business work experience that can enhance their employability following graduation. Alternatively, a study year abroad allows students to gain insights into another culture.

> A transfer option to this degree is available in second year for students who have completed the first year of the Bachelor of Arts degree (MH101). See page 35 for details.

After Graduation

- > Business graduates are consistently among the most employable in the Irish education system. For example, marketing graduates can expect to take up roles in marketing, digital marketing, social media management, sales, and consulting in Irish or international organisations in different industries. In the public sector, there are roles in state agencies, voluntary organisations, the civil service, charities, NGOs, and others, for marketing graduates.
- > By studying marketing, students gain knowledge and skills that can help them in any business-related career, because they understand the view of the final customer.
- > Many of our students have also gone on to further study and the School offers a range of postgraduate options.

Leaving Certificate: 2H5 & 4O6/H7, Irish, English & O4/H7 Mathematics

OPC (Open Choice Option):

Up to 4 weeks to decide on MH404 degree stream

Degree Overview

- > If you are fascinated by business in the complex and diverse world around us, then this is the degree for you!
- > An essential challenge for businesses in Ireland is how they can connect the capabilities of our workforce to contribute to solutions for people who are largely in markets outside Ireland, across the EU and the wider global community. Business needs graduates who can both understand the fundamentals of how to create value for customers and also how to translate them into solutions and services that fit the needs of diverse cultures.
- > Students on this degree can choose from one of three Business subjects (Management, Marketing or International Business) which they can combine with an array of Global Cultures modules, covering topics such as exploring cultures in global contexts, urbanisation, science and technology in society, security, consumption and sustainability, and user experience and service innovation.
- > The optional work placement/study abroad will enable you to apply theory in practice, significantly improving employability upon graduation.
- > This unique programme brings together expertise from Ireland's youngest and most dynamic School of Business and the only Department of Anthropology in the Republic of Ireland. Students benefit from teaching by a diverse faculty of international and local experts who offer deep insights into the real-world complexities of business and global cultures.
- > There is a possible transfer option to this degree in second year for students who have completed the first year of the Bachelor of Arts degree (MH101) taking Business and Anthropology. See page 32.

After Graduation

- > Graduates of this programme, with their combined expertise in business and global cultures, are highly employable across a range of sectors.
- > Typical career paths include graduate programmes with multinational companies, roles in public service, and opportunities in small and medium-sized enterprises, particularly where businesses are focused on international growth or cross-cultural collaboration.
- > This degree qualifies graduates for a wide range of postgraduate degrees that are offered by the School of Business and in the Department of Anthropology.

Course Structure

1st year

You will take 30 credits of the business subject of your choice. This will provide you with a foundational knowledge of your business subject. You will also take 30 Global Cultures credits to develop inter-cultural skills through an understanding of human diversity and difference.

2nd year

Second year is about learning the functional capabilities of your business subject, including some optional choices. You will also learn how to systematically observe, interpret and describe the world around you.

Optional additional year

Some students may choose to complete a work placement or study abroad year between 2nd and final year and graduate after the 4th year. (*The University will support you in the search for a placement job; however, the process is competitive).

Final year

In your business subject this is the year in which you will develop your understanding of the strategic aspects of running a business or service, as well as advanced skills in your chosen subject. This will be complemented by studying the transnational flows and mobilities of culture, ideas, media, technology, and finance, which impact on people's lives.

Sample Modules

1st year

Your topics will vary depending on your Business subject choice:

- > Consumer Research & Marketing
- > Financial Accounting & Business Models
- > Management
- > Material, Digital and Visual Worlds
- > States, Markets & Global Development Challenges

2nd year

You will study different aspects of Business & Global Cultures such as:

- > Human Resource Management
- > Digital Marketing
- > Marketing Management
- > Global Health, Sustainability & Development
- > Ethnographic Research & Storytelling

Final year

You will continue to develop your knowledge with options such as

- > Strategic Management
- > International Marketing and Innovation
- > Globalisation, Science, Technology & Society
- > User Experience and Service Innovation

BBS/BBA Business and Accounting

CAO Code: **MH407** | CAO Points 2025: **401**

Places: 50

Duration: 3 years (4 years with optional placement or Erasmus/StudY Abroad)

Erasmus/StudY Abroad Option: Yes - subject to availability

Placement Option: Yes* (see Course Structure for details)

Mature Applicants: See p. 156

QQI Link: See p. 156

UK, EU & International Applicants: See p. 159

Leaving Certificate: 2H5 & 4O6/H7, Irish, English & O4/H7 Mathematics

Degree Overview

- > This degree provides a foundation for entering the accounting profession and other areas of business. To become a professional accountant, students successfully complete three levels of professional exams as well as on-the-job training. Graduates of the BBS Business and Accounting degree are exempt from the first level of these professional examinations (CAP 1 examinations from Chartered Accountants Ireland and equivalent examination papers from the ACCA and the CIMA professional accounting bodies).
- > Students also gain an excellent foundation in the management of organisations. Studying Business and Accounting together allows students to develop excellent technical accounting skills, financial analysis and a thorough appreciation of the world of business and management.
- > Accounting is an important component that supports the implementation of a business strategy that creates and captures value for, and from, customers. The business element of the degree gives students an appreciation of the core functions of value creation.
- > Students have the option of taking a four year degree with a work placement or study year abroad, thus combining what they learn in university with insights into industry or another culture.
- > Students who complete the Masters in Accounting at Maynooth are exempt from the second level of professional examinations. Following this, only one level of professional exams and completion of on-the-job training results in a full accountancy qualification.

After Graduation

- > While many graduates focus on achieving their professional accountancy qualification, this programme also prepares students for a broad range of careers across private and public sectors and multiple industries.
- > Our graduates enjoy rewarding careers in accounting, banking, financial services, financial research, and teaching.
- > Many of our students continue to further postgraduate study in a very wide range of Business subjects at Maynooth University.

BBA Business and Languages

CAO Code: **MH409** | CAO Points 2025: **400**

Places: 40

Duration: 4 years with placement or Erasmus/Study Abroad

Erasmus/Study Abroad Option: Yes - integrated

Placement Option: Yes* (see Course Structure below for details)

Mature Applicants: See p. 156

QQI Link: See p. 156

UK, EU & International Applicants: See p. 159

Leaving Certificate: 2H5 & 4O6/H7, Irish, English & O4/H7 Mathematics. Non-beginner Mandarin Chinese, French, German, Spanish: Leaving Cert H4 recommended. Beginner Mandarin Chinese, French, German, Spanish: no previous study required.

Degree Overview

➤ **MH409 provides students with the widest choice of business and languages of any university degree in Ireland. Choose one business subject (Accounting**, Business Management, International Business or Marketing) and one language (Chinese, French, German or Spanish). No previous study of either business or the chosen language is required to take this degree.**

➤ **Students have up to four weeks at the beginning of semester one to choose their preferred business and language options. This enables students to find the subjects that best match their interests and aptitude. If beginning a new language, it is advisable to attend all lectures from the beginning of semester one.**

➤ **In third year students must undertake a year of study in a country where their target language is spoken. This allows for learning to be put into practice which significantly improves graduate employability. Most businesses in Ireland and Europe trade internationally across languages and so these skills are highly sought after. Alternatively, students may undertake an international internship in the country where the target language is spoken (subject to availability).**

➤ **A transfer option is available into this degree in second year for students who have completed the first year of the BA degree (MH101) in Business and the relevant language. See page 34 for details.**

After Graduation

➤ A combination of excellent skills in both business and a foreign language means that graduates are highly employable in all business sectors and in many international organisations.

➤ Graduates are well placed to join large multinational employers in their graduate programmes. They will also be an asset to a small or medium-sized organisation, where they will be able to contribute to the growth of the business both domestically and on the international stage. Language skills mean that graduates will be able to work as a bridge between the English-speaking world and the cultures of their chosen language, whether that's in an export-orientated firm in Ireland or for a company anywhere in the world.

➤ Many of our students continue to further postgraduate study in a very wide range of Business, Accounting and Finance subjects at Maynooth University.

Literatures and Cultures

📧 www.maynoothuniversity.ie/school-modern-languages

✉ smllc@mu.ie

** Please note that Accounting can only be combined with German or Spanish. All other business subjects can be combined with the four languages. Accounting stream students are exempt, subject to conditions, of the first level of professional accounting body examinations (CAP1 examinations from Chartered Accountants Ireland and equivalents)

Course Structure

1st year

You will take 30 credits of the business subject of your choice. This will provide you with a foundational knowledge of your business subject. Beginner (30 credits) and non-beginner (15 credits) options are available in French, German, Spanish and Chinese. Students who take a language at non-beginner level (15 credits) also take the relevant Language and Culture modules (15 credits).

You also have the option of taking one or two non-beginner (post Leaving Certificate H4 or higher) languages in 1st year.

2nd year

For business, second year is about learning the functional capabilities of your subject, including some optional choices. As a language student, you will have a twin focus on language and culture. Your language skills will continue to be developed through small-group teaching, and you will be able to choose from a wide range of different options to hone your intercultural awareness.

3rd year

You will take a year of study abroad in one of our partner universities or undertake an international internship (subject to availability). Study abroad will offer you the opportunity to develop your language and cultural skills. You will have an opportunity to strengthen your language skills by living and studying through the target language, and you will also be able to take modules in other language, cultural, business or alternative subjects.

Students may wish to undertake an international internship in the country where their target language is spoken. Students may also qualify for funding through the Erasmus+ internship programme. * (The University will support you in the search for a placement job; however, the process is competitive).

Final year

In your business subject, this is the year in which you will develop your understanding of the strategic aspects of running a business, as well as advanced skills in your chosen subject, including a range of optional and core modules. In your language, you will build on your experience abroad to develop a high degree of fluency and accuracy, and you will continue to develop your creative, analytical, and critical thinking through engaging with cultural studies.

Sample Modules

1st year

Your business topics will vary depending on your subject choice. In Marketing, for example, you will learn about consumer behaviour and market analysis. In Accounting, you will learn the basics of financial accounting. In Management, you will learn about business models, and how to manage people, amongst others. In your language you will study either beginners' or continuing French/German/Spanish/Chinese.

2nd year

Examples of business topics include management accounting, international management, human resource management, operations and supply chain management, and digital marketing, amongst others. In your language, you will be able to choose from a range of modules, including linguistics and language studies, film and literary studies, and language for business.

Final year

Examples of business topics include advanced management and cost accounting, strategic management, management information systems, innovation, and international marketing, amongst others. In your language, you will be able to choose from a range of modules, including advanced linguistics, film studies, politics and the media, literary analysis and translation.

BBS/BBA Finance

CAO Code: **MH410** | CAO Points 2025: **NEW in 2026****Places:** 40**Duration:** 3 years (4 years with placement or Erasmus/Study Abroad)**Erasmus/Study Abroad Option:** Yes - subject to availability**Placement Option:** Yes* (see Course Structure for details)**Mature Applicants:** See p. 156**QQI Link:** See p. 156**UK, EU & International Applicants:** See p. 159**Leaving Certificate:** 2H5 & 4O6/H7, Irish, English, and O4/H7 Mathematics

Degree Overview

- > Finance is the gateway to a wide range of careers from investment banking and financial analysis to consultancy and even having your own business. If you have an aptitude for problem-solving and enjoy working with numbers, then finance is a very rewarding potential career with the opportunity to make a real difference to the lives of others and to the operations of different organisations. In this degree, you will learn about how the financial system works – how assets such as gold, coffee and orange juice are traded, how international markets are linked and the impact of government decisions on markets.
- > We have access to Bloomberg as well other data platforms so that you can apply your knowledge and perform analysis in the same way as market professionals thus enhancing your employment opportunities post-graduation. We also offer the opportunity to have a work placement in the financial services industry in Ireland or outside of Ireland (subject to availability) to gain hands-on experience. Alternatively, you may decide to study abroad at one of our wide range of partner universities. The financial services industry is a key employer in Ireland and across the globe.

After Graduation

- > Finance graduates have high numeracy skills, coupled with an ability to think critically and analytically – invaluable assets in a wide range of professions. While MH410 is a new degree, there is a long history of Finance graduates from Maynooth and they can be found in the major financial centres of the world: New York, London, Hong Kong, Dublin and many more.
- > Popular careers include investment banking, stockbroking, consultancy, corporate finance, journalism, financial research and the finance units of private and public sector organisations.
- > Graduates can continue studying Finance at postgraduate level in the School of Business.

Course Structure

1st year

You will study Finance, Economics and Business as the major elements of your degree. First year includes

- > 15 credits of Finance
- > 15 credits of Economics
- > 15 credits of Business
- > 7.5 credits of Mathematics
- > 7.5 ECTS of either Business or Mathematics.

2nd year and Final year

You will start to specialise with core modules in corporate finance, financial management, economics and financial markets and begin to analyse financial data. You will also have an introduction to Accounting.

You will have a choice of optional modules from Business, Economics, Mathematics and Taxation.

At the end of 2nd year, you can choose to take a work placement in industry or study abroad for a year.

*(The University will support you in the search for a placement job; however, the process is competitive).

In final year, you focus on investments, derivatives and sustainable finance and build your analytical skills with additional modules in financial analysis. You will also have optional modules in Business and Economics.

Sample Modules

1st year

Money, Markets & Investments, Macroeconomics, Microeconomics, Business Models and Marketing.

2nd year

Corporate Finance, Financial Markets & Institutions, Financial Modelling

Final Year

Derivatives, Sustainable Finance, Financial Analysis & Data Management

BBS/BBA Entrepreneurship

CAO Code: **MH411** | CAO Points 2025: **360**

Places: 30

Duration: 3 years (4 years with optional placement or Erasmus/Stuay Abroad)

Erasmus/Stuay Abroad Option: Yes - subject to availability

Placement Option: Yes* (see Course Structure for details)

Mature Applicants: See p. 156

QQI Link: See p. 156

UK, EU & International Applicants: See p. 159

Leaving Certificate: 2H5 & 4O6/H7, Irish, English & O4/H7 Mathematics

Degree Overview

- > This programme nurtures entrepreneurial thinking and equips students with the skills and knowledge to succeed in the wider business world or to launch their own ventures.
- > Students learn the process in which entrepreneurs generate ideas for new businesses and existing businesses shape them into opportunities supported by business models and frameworks.
- > This degree enables students to develop relevant skills in creative problem solving, diagnostics, communications, and project management. Graduates emerge with functional and strategic capabilities that contribute to business success.
- > The learning experience of this programme is designed to be formative, creative and dynamic, providing students with both in-class and industry engagement and learning.
- > Entrepreneurship students at Maynooth are offered insights into all of the major functions of business, as well as the opportunity to undertake specialist options in the subjects that you most enjoy and that you feel support your development as an entrepreneur.
- > Entrepreneurship students also have the option of taking a four year degree which includes a work placement or study year abroad (subject to availability). This offers our students an opportunity to gain experience in industry and/or learning within another culture.
- > Our degree also offers students a fantastic opportunity to build their business network through academic engagement as well as through extra-curricular engagements in our thriving societies such as the Maynooth University Entrepreneurial Society, ENACTUS and the Business Society.

After Graduation

- > Business graduates consistently rank among the most employable in Ireland. Entrepreneurship graduates have diverse career pathways available across the private, public, and third sectors. Popular fields include consulting, research and design, public service, and not-for-profit organisations.
- > Graduates gain work within an existing business or start up their own business - building upon their own entrepreneurial ideas that have been developed and supported throughout the duration of the degree.
- > Entrepreneurship is also global in nature so the opportunity to stay local or to work abroad is also an option.
- > Many of our graduates choose to specialise further with a postgraduate degree. The School of Business offers a range of postgraduate programmes for Business students.

BSc/BBA Business with Sport Science

CAO Code: **MH412** | CAO Points 2025: **455**

Places: 35

Duration: 3 years (4 years with optional placement or Erasmus/Stuay Abroad)

Erasmus/Stuay Abroad Option: Yes - subject to availability

Placement Option: Yes* - see Course Structure for details

Mature Applicants: See p. 156

QQI Link: See p. 156

UK, EU & International Applicants: See p. 159

Leaving Certificate: 2H5 & 4O6/H7, Irish, English & O4/H7 Mathematics

Degree Overview

- > **Maynooth University offers the only programme that allows students to combine a full business degree with sports science. This programme is for students who have a desire to work in the growing and diverse range of businesses in the area of sports, exercise and well-being.**
- > **The sports, exercise and well-being sector is one of the largest service industries in Ireland and globally. Ranging from small to large enterprises, many are run by sports-professionals. These businesses need graduates who can understand both the science and practicalities of the sports and exercise sector, and the fundamentals of how to create value and make a profit - via services and solutions that meet a variety of customers.**
- > **MH412 provides students with the unique option of combining Business with sports related content - from practical exercise skills to the science behind human performance and well-being.**
- > **In third year, students have an opportunity to undertake an accredited work placement (subject to availability), in Ireland or abroad, which gives students a chance to put learning into practice and which significantly improves employability upon graduation. Given the diversity of businesses in this sector, many run by those without formal business training, people with both business and sports science knowledge are highly attractive with many opportunities.**

- > Many enjoy sporting activities but sports and exercise are well known to have mental and physiological benefits. In combination with the business modules, this programme will allow students to understand how sports and exercise can impact on health, allowing graduates to explore how this can be translated to new services and solutions.
- > Graduates typically join large multinational employers in graduate programmes, public service, or in small and medium sized organisations where you are able to work on contributing to the businesses, domestically and globally. The addition of sports science will allow graduates to access opportunities in the sports and exercise market. That could be from small local enterprises to large companies that operate sporting enterprises or that supply services to the sports, exercise and health sectors.
- > Many of our students continue to further postgraduate study in a very wide range of Business subjects at Maynooth University.

After Graduation

- > This is a rapidly growing sector, with a deep demand for graduates that bridge the fields of business and sports - employees that have both a deep insight into how to create value for businesses (through business skills) and the science of sports exercise.

✉ business@mu.ie

Course Structure

1st year

You will take 30 credits of Business. This will provide you with foundational knowledge of your business subject. You will also take 15 credits of the sports science programme, and 15 credits of another first year subject (Groups 1, 3 or 4 - see p. 29 for Subject Groups).

2nd year

For business, second year is about learning the functional capabilities of your subject, including some optional choices. In addition you will take 20 credits of sports science modules.

Optional additional year

Work placement or study abroad year between 2nd and final year and graduate after the 4th year. (*The University will support you in the search for a placement job; however, the process is competitive. Students who choose to take the year 3 placement option will be required to undergo background check by the National Vetting Bureau in advance of this placement.)

Final year

In your business subject this is the year in which you will develop your understanding of the strategic aspects of running a business or service, as well as advanced skills in your chosen subject. This will be complemented by 20 credits of content from sports science.

Sample Modules

1st year

- > Business Models and Marketing
- > Organisational Behaviour and Management
- > Coaching Science and Performance 1
- > Introduction to Anatomy and Biomechanics

2nd year

- > Human Resource Management
- > Data Management Skills for Business
- > Physiological Measurement and Exercise Testing
- > Sports Injuries

Final year

- > Strategic Management
- > Social Media
- > Nutrition for Health and Performance
- > Exercise for Health

BSc Economics

CAO Code: **MH415** | CAO Points 2025: **445**

Places: 15

Duration: 3 years (4 years with optional placement or Erasmus/ Study Abroad). Integrated MSc Economics option.

Erasmus/Study Abroad Option: Yes - subject to availability

Placement Option: Yes* (see Course Structure for details)

Mature Applicants: See p. 156

QQI Link: No

UK, EU & International Applicants: See p. 159

Leaving Certificate: 2H5 & 4O6/H7, Irish, English & O1/H5 Mathematics

You do NOT need have taken Leaving Certificate Economics to study MH415.

Degree Overview

- > This is the first integrated BSc/MSc degree in Economics in Ireland: having achieved 55% or more in the BSc Economics, students have the option to automatically progress to the MSc Economics programme. This results in an MSc degree after four years.
- > This degree suits analytical students who have a passion to tackle pressing socioeconomic challenges such as poverty, unemployment, financial instability, gender and racial inequality and the effects of climate change.
- > BSc Economics students learn to take a scientific, evidence-based approach in order to understand, critique and create policies to combat economic and social problems.
- > Data analysis skills are developed steadily over the course of the degree.
- > From first year, students learn how to do independent research, not just consume knowledge created by others. The focus on independent research allows students to flourish based on their individual curiosity and strengths.
- > Throughout the degree, students take modules from a variety of disciplines such as Sociology, Geography, Law and Statistics. This allows students to develop synergies in their own research.
- > Students benefit from a personal academic advisor who guides them throughout their studies.

After Graduation

- > Employers in all sectors, from government to financial services, have a growing need for economists who can analyse and interpret data.
- > BSc Economics graduates have the tools to become key players in business and in public policy and enjoy wide career choices - consultant, fund manager, investment banker, urban planner, journalist, teacher, policy maker as well as many other areas.
- > Students are entitled to automatically progress to the MSc Economics if they choose. This will provide the additional option of working as a professional economist in, for example, economic consultancies, policy institutes, the Central Bank, and various government departments.
- > Other postgraduate study options include finance, business, international development, public policy, public administration and data science.
- > According to Forbes, economics graduates earn very competitive salaries on average compared to most other fields. PayScale reports significant wage growth over the first ten years of a career, nearly doubling entry-level salaries.

[Economics in the Bachelor of Arts degree - see Section 1](#)

Course Structure

1st year

Microeconomics, Macroeconomics, History of Economic Thought, Econometrics I (Statistics for Economists), Quantitative Analysis. In addition, you will take a research skills module titled 'Exploring Economics'.

You will take two 15-credit subjects (typically two modules in each subject) outside of Economics. Choose your two subjects (one of which may be Critical Skills) from Subject Groups 1, 3 (excluding Mathematical Studies) or 5 on p. 29. Maximum one subject per Subject Group.

2nd year

Intermediate Microeconomics and Macroeconomics, Econometrics II, Statistical Computing with R, Corporate Finance, Advanced Quantitative Methods

In addition, you will earn credits for the 'BSc Team Project'

Optional work placement after 2nd year:

You will have the option to add a year-long accredited placement in Ireland or abroad to your degree. The University will support you in the search for a placement job; however, the process is competitive.

3rd year

Advanced Microeconomics (Game Theory) and Macroeconomics, Applied Econometrics

And you will undertake the year-long BSc Economics Thesis

Sample Modules

1st year

You will take two 15-credit subjects (typically two modules in each subject) outside of Economics - at most one from each group. The available groups to choose your two subjects from are groups 1, 3 (excluding Maths Studies) or 5. Critical Skills is also an option. At the end of first year, should you change your mind and find your calling in one of the fields listed above, you can switch to MH101 BA Arts without any credit deficit and keep Economics as a major/ minor subject.

2nd year & 3rd year

In the 2nd and 3rd year combined, you will take eight to eleven optional Economics modules: Money and Banking, Environmental Economics, Public Economics, International Macroeconomics, International Trade, Economics of Sports, Health Economics, Economics of the EU, Competition and Regulation, Information Economics, Economics of the Labour Market, Behavioural Economics.

You will have the option to add a year-long accredited placement in Ireland or abroad to your degree. The University will support you in the search for a placement job; however, the process is competitive.

You can take up to three optional modules outside of Economics from a wide selection of disciplines. The list of modules includes but is not limited to Digital Ethics, Environmental Sociology & Climate Change, Media & Society, Europe Post 1945, Irish Politics & Society, Sustainable Finance, Statistical Machine Learning.

BA International Economics

CAO Code: **MH416** | CAO Points 2025: **413**

Places: 15

Duration: 4 years (placement or Erasmus/Study Abroad in year 3)

Erasmus/Study Abroad Option: Yes - subject to availability

Placement Option: Yes (subject to availability)**

Mature Applicants: See p. 156

QQI Link: See p. 156

UK, EU & International Applicants: See p. 159

Leaving Certificate: 2H5 & 4O6/H7, Irish, English & O4/H7 Mathematics. Non-beginner Mandarin Chinese, French, German, Spanish: Leaving Cert H4 recommended. Beginner Mandarin Chinese, French, German, Spanish: no previous study required

Degree Overview

- > **Study Economics, Mathematics and a choice of languages or Computer Science.**
- > **Languages available: Mandarin Chinese, French, German and Spanish are available to complete beginners. Leaving Certificate H4 recommended to study non-beginner level Mandarin Chinese, French, German, Spanish.**
- > **Work and/or study abroad in 3rd year (or work in an internationally orientated company in Ireland – all subject to availability).**
- > **Develop an understanding of the economic principles underlying markets of all kinds – financial markets, labour markets and goods markets.**
- > **Learn how the international economic system works – how assets are traded, international markets are linked, government policy decisions affect the economy and how financial markets respond.**
- > **Prepare intellectually and practically for employment in the competitive and dynamic field of international economics.**
- > **Learn to apply analytical tools such as mathematics, deductive logic, and applied statistics to analyse problems and develop logical solutions.**

After Graduation

- > International Economics graduates have strong numeracy skills, coupled with an ability to think critically and analytically – invaluable assets in a wide range of professions.
- > Graduates can be found in the banking and financial services industry, economic consultancy, finance units of public and private sector organisations, financial research, journalism and teaching.
- > Postgraduate degree holders are also to be found working in financial institutions, both public and private, in Dublin, London, New York and around the globe. Many of our students continue to further postgraduate study in a range of economics--related programmes.

[BSc Economics p. 91](#)

[Economics in the Bachelor of Arts degree - see Section 1](#)

Course Structure

1st year

- > 30 credits of International Economics, which includes Economics, mathematical and statistical modules
- > 15 or 30 credits of a language (Chinese Studies*, French*, German*, Spanish*) or Computer Science
- > Credits permitting, students may take 1 other subject, which may include Critical Skills, from Subject Groups 1, 2 or 5. See p. 29.

*Beginners language programme available. This requires 30 credits in the language (Mandarin Chinese, French, German or Spanish).

Students are strongly recommended to take 7.5 credits of Accounting, however, because of timetable restrictions, it will only be available to those taking Computer Science, Spanish or German (not as beginner). Students will have a second opportunity to take an Introduction to Accounting course in 2nd year.

Students who wish to keep open the option of a minor in Maths in Year 2 should select specific modules. See Course Finder for details.

2nd year

Choose between 2 possible routes:

- > Single Major in International Economics
- > Major/Minor with International Economics as the Major and either Computer Science or the 1st year language as a Minor. Approximately one third of a student's time is spent on the Minor.

Optional 10 credit Elective in 2nd year (see p. 14 for details)

3rd year

- > Work or Study Abroad or placement in an internationally orientated firm in Ireland (subject to availability). If a suitable placement cannot be found, the student may continue directly into the final year, obtaining a single major or major/minor BA Bachelor of Arts in Economics.

**The University will support you in the search for a placement job; however, the process is competitive.

Final year

Back on the Maynooth University campus taking the Single Major or Major/Minor (depending on the 2nd year option chosen).

Sample Modules

1st year

Microeconomics, Macroeconomics, Quantitative Methods, Mathematics.

2nd year

Microeconomics, Macroeconomics, Econometrics I, Information Economics, History of Economic Thought, Money and Banking, Financial Modelling.

3rd year

Work or Study Abroad or placement in an internationally orientated firm in Ireland (subject to availability). If a suitable placement cannot be found, the student may continue directly into the final year, obtaining a single major or major/minor BA Bachelor of Arts in Economics.

Final year

Investments, Derivative Securities, Behavioural Economics, Fixed Income Markets, Econometrics II, Economics of the EU, International Trade, Economics Thesis.

BCL (Law and Accounting)

CAO Code: **MH502 LWA** | CAO Points 2025: **409****Places:** 200 (MH502)**Duration:** 3 years**Erasmus/Study Abroad Option:** Yes - subject to availability**Placement Option:** Yes – subject to availability****Mature Applicants:** See p. 156**QQI Link:** See p. 156**UK, EU & International Applicants:** See p. 159**Leaving Certificate:** 2H5 & 4O6/H7, Irish & English & 04/H7 Mathematics*

* Students admitted to MH502 are required to have 04/H7 Mathematics to register for LWA

OPC (Open Choice Option):

Up to 4 weeks to decide on MH502 degree stream (entry requirements apply)

Degree Overview

- > This degree is jointly accredited by both the legal and accounting professions. Students can avail of exemptions (upon graduation) from CAP 1 examinations from the Institute of Chartered Accountants in Ireland, and equivalent examination papers from the ACCA and the CIMA professional accounting bodies. This law degree is accredited by the Honorable Society of King's Inns.
- > This degree is designed for those who would like to study law while gaining a strong background in accounting. For the three years of this programme, students take Law and Accounting in equal measure, making this degree particularly attractive for those considering a career in either of these fields.
- > Students acquire key financial and accounting skills alongside a thorough grounding in core law subjects.
- > Become a highly sought-after law and accounting graduate with the technical and transferable skills needed to succeed in your chosen career. Enhance your employability by developing your faculties for argument, reasoning and for the analysis of complicated ideas.

After Graduation

- > Embark on the route to becoming a professional in accounting or law, both of which offer a rewarding career with international mobility and high earning potential.
- > The numeracy skills, coupled with an ability to think critically and analytically, which are developed on this programme, are invaluable assets in a wide range of careers. Graduates have successful and rewarding careers in accounting, banking and the financial services sector generally, as well as financial research and teaching.
- > Graduates of the BCL programme, wishing to pursue a career in accounting, will be in a position to enter professional training and avail of exemptions from the professional accounting bodies.
- > Graduates of the BCL will be eligible to take the Law Society's FE-1 entrance examinations (necessary to access training as a solicitor) and the entrance examinations for the King's Inns' Barrister-at-law degree programme (necessary to access training as a barrister).
- > Many of our students continue to further postgraduate study in a very wide range of Law, Business, Accounting and Finance subjects at Maynooth University.

|--|--|---|---|
| > Accounting is taken jointly with Law for the three years of the programme, with a wide range of accounting and legal subjects being studied. | > Students take the core modules required for professional legal and accounting careers, but also choose from a range of optional modules. No prior knowledge of accounting or law is required, as we teach both subjects from first principles. | > A number of modules focus on developing critical skills (legal writing, advocacy, financial literacy and communication skills). | > Some students may choose to complete a work placement or study abroad year between 2nd and final year and graduate after the 4th year. Students who opt to spend a year studying abroad are awarded a BCL (International) degree. (**The University will support you in the search for a placement job; however, the process is competitive). |
|--|--|---|---|

Sample Modules

1st year	2nd year	Final year	
> Core modules, like Criminal Law, Contract Law, Introduction to Accounting, and Fundamentals of Finance > Critical skills modules, like Legal Research Methods > Practical skills, participating in mock trials	> Core modules, like Company Law, EU Law, Financial and Management Accounting and Taxation > Critical skills, analysing materials in tutorials and seminars > Practical skills, like participating in negotiation	> Core modules, like Property Law, Equity, Management Accounting, Financial Accounting and Finance > Critical skills, analysing the philosophy of law, and the ethics of corporate governance	> Choose from a range of options, including Media Law, Employment Law, and Environmental Law

BCL (Law and Business)

CAO Code: **MH502 LWB** | CAO Points 2025: **409****Places:** 200 (MH502)
Duration: 3 years**Erasmus/Study Abroad Option:** Yes – subject to availability
Placement Option: Yes – subject to availability**
Mature Applicants: See p. 156
QQI Link: See p. 156
UK, EU & International Applicants: See p. 159**Leaving Certificate:** 2H5 & 4O6/H7, Irish & English & O4/H7 Mathematics*

* Students admitted to MH502 are required to have O4/H7 Mathematics to register for LWB

OPC (Open Choice Option):
Up to 4 weeks to decide on MH502 degree stream (entry requirements apply)

Degree Overview

- > The BCL is a three-year degree in law combined with one other subject, in this case Business - accredited by the Honorable Society of King's Inns. While the BCL covers all the core modules of law, students take less law than on the LLB (MH501), giving students more time to develop expertise in business. The main advantage is that it allows the study of law along with learning in business. This combination is ideal for those who may wish to run their own practice, to work in a setting where law is applied, to work in a business itself, or to practice commercial law.
- > Business is the way by which every product and service you use in daily life is developed, promoted and delivered on the global stage. This degree provides students with insights into the core functions of Business and how they interact to create value for and capture value from clients and customers.
- > Law and Business students at Maynooth are offered unparalleled flexibility and choice. Students have the option of taking a four year degree with a work placement or study year abroad (subject to availability), thus combining what they learn in university with insights into industry (legal or commercial) or another culture.
- > The defining feature of this degree is the skill-set which it provides students; future employability is enhanced by developing the student's faculties for argument and reasoning, for clear thinking, for the analysis of complicated ideas and for understanding the commercial context in which the law operates.
- > Students who successfully complete 1st year also have the option of transferring into the 2nd year of the LLB degree or the 2nd year of the BBS Business and Management degree (MH404).

After Graduation

- > This degree combines the best elements of the University's degrees in Business and in Law to ensure students graduate with the maximum range of career options, both in Law and in Business.
- > Graduates of the BCL will be eligible to take the Law Society's FE-1 entrance examinations (necessary to access training as a solicitor) and the entrance examinations for the King's Inns' Barrister-at-law degree programme (necessary to access training as a barrister).
- > Business graduates are consistently among the most employable in the Irish education system. This degree opens up a whole range of career options in the commercial world such as in general management, service, IT and management organisations, consulting, journalism, policy development, the NGO sector, and national and international public administration.
- > Both the School of Business and the School of Law and Criminology offer a range of postgraduate programmes for BCL (Law and Business) graduates.

Course Structure

- > Business is taken jointly with Law for the three years of the programme, with a wide range of business and legal subjects being studied.
- > Some students may choose to complete a work placement or study abroad year between 2nd and final year and graduate after the 4th year. Students who opt to spend a year studying abroad are awarded a BCL (International) degree. (**The University will support you in the search for a placement job; however, the process is competitive).
- > Students who successfully complete the 1st year of the programme have the option of transferring into the 2nd year of the LLB degree MH501 or 2nd year of the BBS Business and Management degree. An introductory accounting module must be taken in semester 1 of 2nd year (in the case of the latter degree).

Sample Modules

1st year

- > Core areas, like Business Models and Marketing, and Criminal Law
- > Critical skills modules like Legal Research Methods and Managing Innovation
- > Practical skills through participating in mock trials

2nd year

- > Core areas, like Company Law, EU Law, Management Information Systems, and Human Resource Management
- > Critical skills like analysing materials in tutorials and seminars
- > Range of optional modules from which to choose, including Commercial Law, Project Management, and International Business

Final year

- > Core areas, like Property Law, Equity, Strategic Management, and Human Resource Management
- > Critical skills, like analysing the philosophy of law
- > Optional modules, including Innovation Management, Media Law, Environmental Law, Contemporary Issues in Marketing, and Employment Law

“I studied Computer Science and Software Engineering at MU. I took every opportunity to get involved in extra-curricular activities that would enhance my CV and future job prospects - I volunteered as a CoderDojo demonstrator, I did the MU SPUR (Summer Programme for Undergraduate Research), and I was a member of the Games Society.

Taking part in as many volunteering programs and projects your course has to offer enhances your CV, and this will improve your chances when you apply for internships and jobs.

The MU experience that shaped my career was definitely the internship I did in third year as part of my course. I did my internship in AWS (Amazon Web Services) which led me to a graduate position and to where I am now - working as a software developer in AWS.

I would advise anyone thinking about their college choices to strongly consider a degree with an internship opportunity. I learned so much during my internship and it led me to where I am now. Even if your internship doesn't offer a graduate position, at least you can still add it to your CV and you've gained insight and experience as to what it like working in the corporate world.

What I find most interesting and challenging about my job is the constant learning. I am never bored since I am always learning something new - working on a new project or debugging a problem or helping someone with an issue they face makes every day interesting.

I was very lucky to have the internship as a requirement in my course. The MU Careers and Employability Service guided us as to how to apply for internships and gave us a lot of help”

Kyla Adanza
BSc Computer Science and Software Engineering
Software Development Engineer, AWS (Amazon Web Services)

BSc Computer Science and Software Engineering (through Arts)

CAO Code: MH601 CSA | CAO Points 2025: 360

Places: 70 (MH601)
Duration: 4 years

Erasmus/Study Abroad Option: Yes - subject to availability
Placement Option: Yes – subject to availability
Mature Applicants: See p. 156
QQI Link: See p. 156
UK, EU & International Applicants: See p. 159

Leaving Certificate: 2H5 & 4O6/H7, Irish & English & O3/H7 Mathematics
OPC (Open Choice Option):
Up to 4 weeks to decide on MH601 degree stream

Degree Overview

- > **Power up your future:** Dive into the world of computing and software, mastering everything from programming and problem-solving to cutting-edge technologies and mathematical principles.
- > **Shape your own learning journey:** With a wide range of cutting-edge modules, you can dive into the most exciting and relevant areas of Computer Science, from gaining vital software engineering skills, networking, cryptography to artificial intelligence and beyond.
- > **Get hands-on from day one!** You'll develop practical programming skills and advanced problem-solving techniques in our state-of-the-art Eolas building—Maynooth's €20M ICT hub with top-tier labs and facilities.
- > **Explore beyond Computer Science:** In first year, you'll have the chance to study another Arts Subject or Critical Skills with Computer Science and Mathematics, allowing you to broaden your knowledge and discover new interests.
- > **Real-world industry experience:** A six-month placement in third year gives you the chance to work in industry, gain professional experience, and build career connections—many students secure job offers before completing their placement!
- > **Collaborate on exciting projects:** Throughout the course you will work on individual and team projects. In third year, you'll work as part of a team to solve real-world challenges in Computer Science, developing teamwork, communication, and technical skills.
- > **A pathway into software engineering:** If you start in MH101 Arts, you can transfer to second year MH601 CSA (Computer Science and Software Engineering). See page 38.
- > **Supportive student-centred approach:** Enjoy a friendly and inclusive learning environment, with accessible academic staff, practical support, and a dedicated Computer Science Centre.
- > **A thriving Computer Science community:** Maynooth University's Computer Science Centre (CSC) supports students at all levels—whether you need extra help with coursework or want to take on advanced challenges. With competitions, events, and social activities throughout the year, it's a great way to connect, collaborate, and be part of a dynamic CS community. From second year, students can volunteer as tutors within the CSC, enhancing teaching and communication skills.

After Graduation (Careers and Graduate Skills)

- > **MU graduates are highly sought after by employers:** 83% of 2023 graduates were in employment or full-time education in the 6 months after graduation, including in companies.
- > **Tech skills that open endless doors:** Computing, programming, and software development are in high demand across industries. From AI and medical imaging to game development, multimedia systems, and cybersecurity, the possibilities are endless!
- > **Not just for tech careers:** Computer Science graduates are highly valued in finance, business, healthcare, automotive, aeronautics, and more. The broad range of first-year subjects ensures you develop versatile skills for a variety of career paths.
- > **Shape the future in education:** With Computer Science now a second-level teaching subject, this degree can also lead to a rewarding career in education, inspiring the next generation of tech innovators.

Why Choose/Study MH601

This programme offers a strong foundation in computing, combined with practical experience, industry connections, and flexible study options. Whether you are interested in software development, artificial intelligence, multimedia, web development, or interdisciplinary applications, MH601 provides the skills and opportunities to prepare you for a successful career.

Course Structure

1st year

Computer Science (30 credits), Mathematics and 1 other subject (which may include Critical Skills) from Subject Groups 1, 2, 4 or 6. See page 29 for Subject Groups.

2nd, 3rd and Final year

Concentrate on Computer Science topics only.
Students also complete a minimum 6 month work placement (subject to availability).

Sample Modules

1st year

- > Introduction to computer programming
- > Computer systems and computer science theory
- > Logic systems and logic programming
- > Mathematics

2nd year

- > Algorithms and data structures
- > Operating systems and databases
- > Computer architecture
- > Software engineering & software process
- > Software testing
- > Introduction to UX, (UI) and Interaction design
- > Web information processing
- > Calculus and algebra

3rd year

- > Software design
- > Compilers
- > Networks
- > Verification
- > Complexity
- > Team project
- > Work placement (subject to availability)

Final year

- > Programming language design
- > Computer Science Project
- > Elective topics (e.g. robotics, cryptography, computer vision)

BSc Multimedia, Mobile and Web Development (through Arts)

CAO Code: **MH601 MWA** | CAO Points 2025: **360**

Places: 70 (MH601)

Duration: 4 years

Erasmus/Study Abroad Option: Yes - subject to availability

Placement Option: Yes – subject to availability

Mature Applicants: See p. 156

Leaving Certificate: 2H5 & 4O6/H7, Irish & English & O3/H7 Mathematics

OPC (Open Choice Option):

Up to 4 weeks to decide on MH601 degree stream

Degree Overview

- > **Creative & technical skills from day one:** Study all the principles and uses of computer science with a strong emphasis on multimedia, mobile apps, and website software, key mathematical concepts, a substantial final-year project, and a six-month industry placement.
- > **Hands-on learning environment:** Develop programming expertise and advanced problem-solving skills in Eolas, our dedicated, state-of-the-art computer science building.
- > **Flexible and creative first year:** Combine Computer Science and Mathematics with another Arts subject or Critical Skills module in your first year, allowing for a more diverse academic experience.
- > **Transfer pathway:** There is a transfer pathway from 1st year MH101 Arts to 2nd year MH601 Multimedia Mobile and Web Development (through Arts). Students must have taken and passed at least 22.5 credits of Computer Science in first year. There is no limit on places.
- > **Gain a broader academic perspective:** Studying Computer Science alongside an Arts subject in first year enhances creativity, critical thinking, and cross-disciplinary awareness. This broader academic foundation gives graduates a more expansive perspective.
- > **Career-focused programme:** This degree is designed for students interested in multimedia and web/mobile technologies, while also preparing graduates for wider career opportunities in Computer Science.
- > **Learn in cutting-edge facilities:** Join a department established in 1987, now housed in the €20M Eolas Building—an advanced ICT hub equipped with modern labs and resources supporting hands-on learning.
- > **Graduate with industry experience:** Take part in a six-month professional placement as part of your degree, boosting your employability and real-world confidence.
- > **Supportive student-centred approach:** Enjoy a friendly and inclusive learning environment, with accessible academic staff, practical support, and a dedicated Computer Science Centre.

After Graduation (Careers and Graduate Skills)

- > **Diverse career opportunities:** A degree in Multimedia, Mobile and Web Development opens the door to a wide range of fast-growing digital careers. Graduates are well-prepared for roles in mobile app development, web and interface design, game development, multimedia systems, and interactive content creation. Many also contribute to fields like AI, e-learning, medical imaging, and software testing—where digital innovation is thriving.
- > **In-demand across industries:** Your skills will be valued far beyond traditional tech sectors. Graduates are in demand in finance, business, healthcare, and even aerospace and automotive industries, where digital systems are essential. The broad first-year curriculum—including another science subject alongside Computer Science and Mathematics—helps you build a solid foundation and access more varied career paths.
- > **Pathway to teaching:** If you're considering education, this degree provides a route into teaching. Computer Science is now recognised as a second-level teaching subject in Ireland. With a Professional Master of Education (PME), graduates can teach at post-primary level.
- > **Further study options:** Maynooth offers several postgraduate options to deepen your expertise. These include the MSc in Computer Science (Software Engineering), MSc in Data Science and Analytics, MSc or PhD in Computer Science by research, and the PME. These programmes offer clear progression for those aiming to specialise, research, or teach.

Why Choose/Study MH601 MWS

This degree combines creativity and technology, teaching you to design websites, build apps, and create multimedia experiences. You'll gain hands-on skills, complete a six-month industry placement, and study in our cutting-edge Eolas Building. With a broad first year and strong support throughout, you'll graduate ready for a wide range of digital careers.

Degree Overview

- > **Explore the world of computing:** Delve into the principles and uses of computers and software, essential mathematics, a major final-year project, and a six-month placement in industry.
- > **Hands-on programming from day one:** Build real programming skills and master advanced problem-solving techniques in Eolas – our purpose-built Computer Science building.
- > **A broader scientific foundation:** In first year, study an additional science subject alongside Computer Science and Mathematics for a more rounded academic experience.
- > **Transfer pathway:** There is a transfer pathway from first year MH201 BSc to second year MH602 CSS Computer Science and Software Engineering. See page 67.
- > **Perfect for science & maths lovers:** Ideal for students who want to combine Computer Science with Mathematics and other science disciplines for a strong technical foundation.
- > **Designed for technical careers:** This stream provides a focused technical education, making it ideal for those aiming for careers that demand high levels of technical expertise and innovation in computing.
- > **Learn in cutting-edge facilities:** Join a department established in 1987, now housed in the €20M Eolas Building—an advanced ICT hub equipped with modern labs and resources supporting hands-on learning.
- > **Gain valuable industry experience:** Enhance your career prospects with a six-month industry placement built into your degree – preparing you for real-world success.
- > **Collaborate on exciting projects:** Throughout the course you will work on individual and team projects. In third year, you'll work as part of a team to solve real-world challenges in Computer Science, developing teamwork, communication, and technical skills.
- > **Supportive student-centred approach:** Enjoy a friendly and inclusive learning environment, with accessible academic staff, practical support, and a dedicated Computer Science Centre.
- > **A thriving Computer Science community:** Maynooth University's Computer Science Centre (CSC) supports students at all levels—whether you need extra help with coursework or want to take on advanced challenges. With competitions, events, and social activities throughout the year, it's a great way to connect, collaborate, and be part of a dynamic CS community. From second year, students can volunteer as tutors within the CSC, enhancing teaching and communication skills.

After Graduation (Careers and Graduate Skills)

- > **MU graduates are highly sought after by employers:** 83% of 2023 graduates were in employment or full-time education in the six months after graduation, including in companies.
- > **Tech skills that open endless doors:** Computing, programming, and software development are in high demand across industries. From AI and medical imaging to game development, multimedia systems, and cybersecurity, the possibilities are endless!
- > **Not just for tech careers:** Computer Science graduates are highly valued in finance, business, healthcare, automotive, aeronautics, and more. The broad range of first-year subjects ensures you develop versatile skills for a variety of career paths.
- > **Shape the future in education:** With Computer Science now a second-level teaching subject, this degree can also lead to a rewarding career in education, following further postgraduate study, inspiring the next generation of tech innovators.

Why Choose/Study MH602

If you have a head for problem-solving, a love for technology, and want a degree that opens real opportunities, the BSc in Computer Science and Software Engineering (through Science) at Maynooth University is the perfect choice. With a strong foundation in computing, mathematics, and additional science subjects, plus access to the cutting-edge Eolas Building and a built-in six-month industry placement, this programme equips you with in-demand technical and professional skills. Whether you dream of working in AI, cybersecurity, fintech, or education, you'll graduate career-ready, with the confidence, experience, and support to thrive in a rapidly evolving digital world.

BSc Robotics and Intelligent Devices p. 113

Course Structure

1st year

Computer Science (30 credits), Mathematics and 1 Science subject (Biology, Engineering Science, Experimental Physics, Mathematical Physics).

2nd, 3rd and Final year

Concentrate on Computer Science topics only.

Students also complete a minimum 6 month work placement (subject to availability).

Sample Modules

1st year

- > Introduction to computer programming
- > Computer systems and computer science theory
- > Logic systems and logic programming
- > Mathematics

2nd year

- > Algorithms and data structures
- > Operating systems and databases
- > Computer architecture
- > Software engineering & software process
- > Introduction to UX, (UI) and interaction design
- > Web information processing
- > Calculus and statistics

3rd year

- > Software design
- > Compilers
- > Networks
- > Verification
- > Complexity
- > Team project
- > Work placement (subject to availability)

Final year

- > Programming language design
- > Computer Science Project
- > Elective topics (e.g. robotics, cryptography, computer vision)

BSc Multimedia, Mobile and Web Development (through Science)

CAO Code: **MH602 MWS** | CAO Points 2025: **352**

Places: 110 (MH602)

Duration: 4 years

Erasmus/Study Abroad Option: Yes - subject to availability

Placement Option: Yes – subject to availability

Mature Applicants: See p. 156

QQI Link: See p. 156

UK, EU & International Applicants: See p. 159

Leaving Certificate: 2H5 & 4O6/H7, Irish & English & O3/H7 Mathematics

OPC (Open Choice Option):

Up to 4 weeks to decide on MH602 degree stream

Degree Overview

- > **Build advanced technical skills from year one:** Study all the principles and uses of computer science with a strong emphasis on multimedia, mobile apps, and website software, key mathematical concepts, a substantial final-year project, and a six-month industry placement.
- > **Hands-on learning environment:** Develop programming expertise and advanced problem-solving skills in Eolas, our dedicated, state-of-the-art computer science building.
- > **Scientific breadth in first year:** Combine Computer Science and Mathematics with another Science subject to develop analytical skills and scientific reasoning from the start.
- > **Transfer pathway:** There is a transfer pathway from 1st year MH201 Science to 2nd year MH602 MWA Multimedia Mobile and Web Development (through Science). See page 67 for details.
- > **Scientific perspective on computing:** Studying Computer Science alongside a Science subject in the first year. This lends to graduates with a wider frame of reference.
- > **Career-focused programme:** This degree is designed for students interested in multimedia and web/mobile technologies, while also preparing graduates for wider career opportunities in Computer Science.
- > **Learn in cutting-edge facilities:** Join a department established in 1987, now housed in the €20M Eolas Building—an advanced ICT hub equipped with modern labs and resources supporting hands-on learning.
- > **Graduate with industry experience:** Take part in a six-month professional placement as part of your degree, boosting your employability and real-world confidence.
- > **Supportive student-centred approach:** Enjoy a friendly and inclusive learning environment, with accessible academic staff, practical support, and a dedicated Computer Science Centre.

After Graduation (Careers and Graduate Skills)

- > **Diverse career opportunities:** A degree in Multimedia, Mobile and Web Development opens the door to a wide range of fast-growing digital careers. Graduates are well-prepared for roles in mobile app development, web and interface design, game development, multimedia systems, and interactive content creation. Many also contribute to fields like AI, e-learning, medical imaging, and software testing—where digital innovation is thriving.
- > **In-demand across industries:** Your skills will be valued far beyond traditional tech sectors. Graduates are in demand in finance, business, healthcare, and even aerospace and automotive industries, where digital systems are essential. The broad first-year curriculum—including another science subject alongside Computer Science and Mathematics—helps you build a solid foundation and access more varied career paths.
- > **Pathway to teaching:** If you're considering education, this degree provides a route into teaching. Computer Science is now recognised as a second-level teaching subject in Ireland. With a Professional Master of Education (PME), graduates can teach at post-primary level.
- > **Further study options:** Maynooth offers several postgraduate options to deepen your expertise. These include the MSc in Computer Science (Software Engineering), MSc in Data Science and Analytics, MSc or PhD in Computer Science by research, and the PME. These programmes offer clear progression for those aiming to specialise, research, or teach.
- > **Why Choose/Study MH602 MWS:** This programme blends scientific thinking with digital creativity to prepare students for high-demand careers in mobile/web technologies and beyond. With strong technical grounding and flexible career routes, graduates thrive in digital, engineering, and scientific sectors.

Duration: 3 years

Erasmus/Study Abroad Option: Yes – subject to availability

Placement Option: Yes – subject to availability

Mature Applicants: See p. 156

QQI Link: No

UK, EU & International Applicants: See p. 159

Leaving Certificate: 2H5 & 4O6/H7, Irish, English & H2 Mathematics

Degree Overview

- > **Study Computer Science, Mathematics and Philosophy in an accelerated three-year Bachelor of Science degree.**
- > **Learn how to combine human creativity with the power of computers to solve problems.**
- > **Examine the essentials of theoretical computer science and their mathematical foundations.**
- > **Students have the option of undertaking a 1-year work placement or study abroad between second and third year (subject to availability).**
- > **Acquire a deep understanding of the foundations of computation and information theory and gain advanced practical knowledge of programming in multiple languages.**
- > **Study pure mathematics to hone your problem-solving skills, logical reasoning and analytical abilities, while gaining deep insight into principles that underlie mathematical thought.**
- > **The Department of Computer Science is located in the Eolas Building, a state-of-the-art ICT hub with dedicated business incubation facilities. Our laboratories and equipment provide excellent facilities for practical work and all our courses include a mix of lectures and laboratory work. The Department of Mathematics and Statistics is located in Logic House on the South Campus.**

After Graduation

- > Our BSc in Computational Thinking has been specifically designed to answer calls from industry for graduates with strong analytical competence, problem-solving skills and the ability to think critically.
- > Graduates enjoy outstanding career opportunities across a range of areas such as software development, machine learning, data science, mathematical and financial modelling, bioinformatics, cryptography, security and AI.
- > Postgraduate study may include MSc Computer Science (Software Engineering), MSc in Data Science and Analytics, PhD Computer Science (Research), PhD Mathematics, PhD Statistics/Data Science.

2nd year

- > Computer Science (Programming Languages, Computation, Complexity)
- > Mathematics (Analysis, Group Theory)
- > Philosophy (Epistemology, Analytical Philosophy)

Final year

- > Programming Language Semantics,
- > Group Theory, Differential Geometry, Topology
- > Selected topics from Computer Science, Mathematics and Philosophy

"I graduated from the Froebel Department in 2024, fulfilling a lifelong dream to study in a place rooted in child-centred, play-based learning. I still remember the excitement of my first day; it truly felt surreal. Now, as I look back on my first year in the classroom, and in the teaching profession, I see just how much my Froebelian philosophy continues to guide me.

Placement was by far the highlight of my time in the Froebel Department. Each school experience helped me grow in confidence, and I was continuously supported by the incredible team of lecturers and supervisors, whose encouragement helped shape me as a teacher.

The Froebel Department is truly special. Its overall structure, small class sizes, close-knit community, and a uniquely hands-on, values-driven approach helped me develop the professional skills I now use every day. I have made lifelong friends and gained a deep sense of purpose in my role as a teacher.

I am honoured to be the recipient of the 2024 Vere Foster Award, and I owe a huge amount of gratitude to my amazing supervisors and lecturers who guided me throughout my time at the Froebel Department. I am now excited to return to MU this August to begin the Masters of Education (Research in Action), and to continue a journey that started in a place that has left a lasting mark on both my career and my heart."

MH212 OPC	You can choose OPC (Open choice to any degree stream) on your CAO application and make up your mind on your chosen degree stream during the first four weeks of semester one (provided you meet the minimum entry requirements for that stream).	

BEd Bachelor of Education – Froebel Primary Teaching

CAO Code: **MH001/MH002[^]** | CAO Points 2025: **506 (MH001)**

Places: MH001: 68
Duration: 4 years

Erasmus/Study Abroad Option: Yes – subject to availability
Placement Option: Required
Mature Applicants: Must apply before the 1st February. See p. 156
QQI Link: No
UK, EU & International Applicants: See p. 159

Leaving Certificate Applicants to MH001: 3H5 & 3O6/H7 grades. Required minimum grades are Irish H4, English O4/H7 and Mathematics O4/H7. **Leaving Certificate Applicants to MH002:** see below.

Note: An offer of a place on MH001/MH002 is subject to a satisfactory background check by the National Vetting Bureau. In the case of MH001/MH002, prior to entry, candidates are required to complete a Health Status Information Form.

[^]MH002 is another application route for students who reside in officially designated Gaeltacht Language Planning areas and who use Irish as the normal language of the home (applicants must include their Eircode when applying to MH002). Applicant details will be forwarded to the Department of Education to determine eligibility for this route. Minimum entry requirements for MH002: as per MH001 above apart from the LC points requirement (**MH002 CAO Points 2025: 544**), and the H3 Irish requirement.

Degree Overview

- > There are two routes into primary teaching: the undergraduate Bachelor of Education (BEd) route and the two-year postgraduate Professional Master of Education (PMEd) route (see the Graduate Studies website for full details about the PMEd route). The BEd degree and the PMEd are designed for students who wish to become primary school teachers within the Republic of Ireland (both qualifications may offer the opportunity to work in many countries internationally).
- > Child-centred and active approaches to teaching are central to the Froebel philosophy and permeate the ethos in the Department.
- > The foundation disciplines of Psychology, Philosophy, Sociology and History of Education form the theoretical basis for this degree.
- > Education modules and school-based practice within a variety of placement settings feature across all four years, as well as a placement in the Gaeltacht for two fortnight blocks at Easter in second and third year.
- > As the Froebel Department is named after the famous educational philosopher, Friedrich Froebel, our programmes reflect his ideology by incorporating active, student-centred approaches to our teaching. Studying primary education at the heart of a major university, students enjoy intellectual stimulus and social interaction with professors and students from other disciplines.

After Graduation

- > Graduates are eligible to register with the Teaching Council and are qualified to teach in primary schools in Ireland.
- > Some graduates move into employment areas such as volunteering in developing countries, authoring of educational texts, third level teacher education and the civil service.
- > Further training: the Department offers a range of postgraduate study options.

Note: An offer of a place on this course is subject to a satisfactory background check by the National Vetting Bureau.

Degree Overview

- > Full time, level 8, honours degree, catering for those aspiring to enter the Early Childhood Education and Care sector from Leaving Certificate, further education or mature student paths. Those currently working in the ECEC sector may be interested in the flexible BA in Early Childhood Teaching and Learning (MH004 - see page 108).
- > The programme is closely linked with Early Childhood Education and Care (ECEC) practice, and staff are experienced in the development, delivery and advocacy of Early Childhood Education and Care.
- > Work placements take place in Tusla-notified Early Childhood Education and Care settings.
- > It is a progressive level 8 degree, supporting the development of outstanding early childhood educators.
- > Students can graduate with a level 7 qualification after 3rd year or a level 8 qualification after 4th year.
- > This degree offers graduates the option of progressing their careers in Early Childhood Education and Care in varied professional roles.

After Graduation

- > Graduates emerge as early years teaching professionals. Career progression within this sector, for those with a level 7 or level 8 Childhood degree, is expanding rapidly within and beyond Early Childhood Education and Care settings to include opportunities within policy development and evaluation agencies within government departments, semi-state bodies and NGO's.
- > The Bachelor of Arts in Early Childhood Teaching and Learning positions graduates to spearhead and lead learning in Early Childhood Education and Care services.

- > Graduates may also take up roles with local development agencies within the early childhood sector both nationally and internationally.
- > The Department offers a range of postgraduate study options.

Students can apply for either of these courses once they have completed their undergraduate degree. See Graduate Studies website for more details.

Course Structure

- > This full-time degree will prepare you for a range of leadership roles in the Early Childhood Education and Care (ECEC) sector. Lectures are 3 days a week and students spend one day a week in settings (for example, in 2024-2025 lectures took place Tuesday - Thursday and placement was either Monday or Friday).

Sample Modules

1st year

- > Reflective Practice: Educator as Learner
- > Introduction to Child Psychology
- > Introduction to Social and Legal Studies
- > Introduction to Curriculum and Pedagogy
- > Health and Well-being for Infants and Toddlers
- > Inclusion in Early Childhood Education
- > Philosophy, Culture and Constructs of Early Childhood Education and Care
- > Professional Practice 1

2nd year

- > Reflective Practice: Integrating Theory & Practice
- > Learning & Development Practices (Birth to 6 years)
- > Play
- > Health and Well-Being for Young Children
- > Children's Spaces
- > Building Relationships with Children, Families and Communities
- > Exploring Curricula & Pedagogy
- > Professional Practice 2

3rd year

- > Reflective Practice: Educator as Change Agent
- > Learning & Development in Context
- > Social Justice, Ethics & Diversity
- > Supporting Creativity & Imagination
- > Social & Legal Context of Childhood
- > Community as Context
- > Supporting Enquiry/Enacting the Curriculum
- > Professional Practice 3

Final year

- > Reflective Practice: Educator as Action Researcher
- > Learning & Development: Challenges
- > Leadership and Management
- > Transitions in the Early Years
- > Dominant Discourses in Early Childhood Education and Care
- > Curriculum, Pedagogy and Assessment
- > Literacy Numeracy and Scientific Enquiry
- > Professional Practice 4

BA Early Childhood – Teaching and Learning (flexible)

CAO Code: **MH004** | CAO Points 2025: **Not applicable**

Places: 30 Duration: 4 years (flexible) Applicants with a level 6 qualification in Early Childhood Education and Care may apply for exemption from year 1.	Erasmus / Study Abroad Option: No Placement option: Placement is required (420 hours per academic year)* Mature Applicants: See p. 156 QQI Link: See p. 156 UK, EU & International Applicants: See p. 159	Entry requirement: Level 6 Early Childhood award
	Please note that MH004 BA Early Childhood Teaching & Learning (flexible) will run subject to sufficient numbers in 2026. A decision on September 2026 intake will be made in May 2026. For more details please contact the Department.	Please note that applications for the BA Early Childhood - Teaching & Learning (flexible) degree (CAO Code MH004) must be made through the Advanced Entry portal on the CAO application website.

Note: An offer of a place on this course is subject to a satisfactory background check by the National Vetting Bureau.

Degree Overview

- > **Flexible, level 8 honours degree, catering for those currently working in the ECEC sector. Those aspiring to enter the Early Childhood Education and Care sector from Leaving Certificate or further education paths may be interested in the full-time programme MH003.**

BSc Science or BSc Mathematics and Computer Science or BSc Mathematics (with Education)

CAO Code: **MH212 SED or MCS or MED** | CAO Points 2025: **420**

Places: 65 (MH212)

Duration: 4 years + 1 year postgraduate study

Erasmus/Study Abroad Option: No

Placement Option: Placement is required

Mature Applicants: See p. 156

QQI Link: No

UK, EU & International Applicants: See p. 159

Leaving Certificate: 2H5 & 4O6/H7, Irish, English & Science subject (one of Agricultural Science, Applied Mathematics, Biology, Chemistry, Computer Science, Physics, or Physics with Chemistry) & O4/H7 Mathematics*

OPC (Open Choice Option):

Up to 4 weeks to decide on MH212 degree stream (entry requirements apply)

*Students admitted to MH212 are required to have H4 Mathematics to register for MCS or MED.

Note: An offer of a place on this course is subject to a satisfactory background check by the National Vetting Bureau.

Degree Overview

There are three MH212 streams – students choose one stream and have up to four weeks following registration to decide.

> **MH212 SED:** If you are interested in a career as a second-level science and/or mathematics teacher, this may be the degree for you.

> **MH212 MCS:** If you are interested in a career as a second-level mathematics and computer science teacher, this may be the degree for you.

> **MH212 MED:** If you are interested in a career as a second-level mathematics and applied mathematics teacher, this may be the degree for you.

> **Students take a five year route to second-level teaching studying a four-year Science/Mathematics/Computer Science degree, while also completing 60 credits in Education.**

> **After four years, students are awarded a BSc Science (with Education) or BSc Mathematics and Computer Science (with Education) or BSc Mathematics (with Education) degree – a level 8 honours degree. Students now have two pathways open to them:**

1. Students can choose to exit their studies with their level 8 qualification and take a different path in their education or career.

OR

2. Students can continue with their studies to become a fully qualified teacher. This means they complete one further year of study at postgraduate level - necessary to meet the Teaching Council requirements to be registered as a Newly Qualified Teacher (NQT) in two subjects. Having graduated with their level 8 degree, students are guaranteed their place in this postgraduate year.

> **At the end of year five of your studies, you will have achieved, in addition to your level 8 higher degree, a level 9 professional masters qualification:**

- **MH212 SED:** You will be a fully qualified second-level science or science and mathematics teacher, recognised by the Teaching Council to teach up to Leaving Certificate level.

- **MH212 MCS:** You will be a fully qualified second-level mathematics and computer science teacher, recognised by the Teaching Council to teach up to Leaving Certificate level.

- **MH212 MED:** You will be a fully qualified second-level mathematics and applied mathematics teacher, recognised by the Teaching Council to teach up to Leaving Certificate level.

- **Through this pathway students are fully qualified after five years rather than taking the six year route (details of the six-year route are outlined in the next bullet point below).**

> **An alternative six-year route to second-level teaching is available. Students can take the BSc Bachelor of Science degree (MH201) for four years and then apply for a place on the Level 9 Professional Master of Education degree. The PME is a two-year, full-time programme designed to qualify graduates to teach at second level. Entry to the PME is competitive and is not guaranteed to graduates of the BSc Bachelor of Science degree (MH201).**

After Graduation

> **MH212 SED:** depending on the subjects chosen during the course of the degree, graduates will be in a position to teach any two of the following subjects to senior cycle level (HL): mathematics, biology, chemistry, physics.

> **MH212 MCS:** fully qualified second-level computer science and mathematics teacher up to Leaving Certificate level.

> **MH212 MED:** fully qualified second-level mathematics and applied mathematics teacher up to Leaving Certificate level.

Graduates apply to the Teaching Council of Ireland for registration.

BSc Bachelor of Science - see [Section 2](#)

Up to 2 places each year may become available in MH212 for students successfully completing their first year of MH201. Availability and selection will be on the basis of first year results and dependent on programme capacity.

Course Structure

> After four years of concurrent Science and Education studies, students may graduate with a Level 8 honours degree in Science/Mathematics/Computer Science (with Education)

> To become a fully qualified science/mathematics/computer science teacher, students must complete a fifth year of study at Masters level – the Professional Master of Education

> Once students reach the required standards after 4th year, the place in 5th year is guaranteed

Sample Modules

1st year

- > Biology
- > Chemistry
- > Experimental Physics
- > Mathematics
- > Computer Science

2nd year

- > Continue with any 2 of your 1st year Science subjects
- > Introduction to Teaching – Critical Reflection on Science and Mathematics Teaching and Learning including school-based experience in semester two
- > Foundations of Education

3rd year

- > Continue with your 2 Science subjects (40 credits)
- > School-based experience (1 day per week)
- > Learning, Teaching, Assessment and Curriculum
- > Global Citizenship Education
- > Critical Reflections on Science and Mathematics Teaching and Learning

4th year

- > Continue with your 2 Science subjects (40 credits)
- > School-based experience 3 (2 week block in September and 1 day per week in semester 1)
- > The Teacher as Critically Reflective Practitioner
- > Inclusion, Diversity and Special Needs Education
- > Critical Reflections on Science and Mathematics Teaching and Learning

Final year

- > School-based experience 4 (3 days per week in school)
- > Teaching, Learning, Assessment and Curriculum: The Practice of Teaching
- > Becoming a Teacher
- > Lesson Study Research Project

"I always enjoyed physics, mathematics and computer science, and after learning about robotics when I entered high school in Romania, it quickly transformed from a hobby to my desired profession. I was looking for undergraduate robotics courses across the EU and visiting multiple universities from different countries and once I visited Maynooth University I knew that the BSc in Robotics and Intelligent Devices was the option for me.

A big factor in moving to Maynooth, was a very collaborative environment, stretching across engineering, business, biology and chemistry – with space to do experiments.

In the Electronic Engineering department, the great staff, lovely campus, top-notch research going on and the close-knit community promoted learning, allowing us to become good engineers and scientists after graduation.

During my third year I had an internship with Qualcomm where I worked with AI models and AI acceleration. After graduating I started working on the AURA Project at MU designing, developing and programming autonomous farming robots, while doing my PhD in parallel on hybrid locomotion methods for legged robots.

Once I finish my PhD I plan to remain in academia and continue my journey in the research of field robotics and legged robotics."

James Florin Petri
BSc Robotics and Intelligent Devices
Robotics Research Assistant - AURA Project
PhD Student - Robotic Hybrid Legged Locomotion

ELECTRONIC ENGINEERING SPECIALISED DEGREES

MH304	BE Bachelor of Electronic Engineering	112
MH306	BSc Robotics and Intelligent Devices	113
	Engineering Science available in the Bachelor of Science degree (MH201)	72

BE Bachelor of Electronic Engineering

CAO Code: MH304 | CAO Points 2025: 364

Places: 40
Duration: 4/5 years

Erasmus/Study Abroad Option: Yes - subject to availability
Placement Option: Yes - subject to availability (year 4 of 5 year programme)
Mature Applicants: See p. 156
QQI Link: No
UK, EU & International Applicants: See p. 159

Leaving Certificate: 2H5 & 4O6/H7, Irish, English & a Science subject (i.e. Agricultural Science, Applied Mathematics, Biology, Chemistry, Computer Science, Physics, Physics with Chemistry or Technology) & H4 Mathematics.
Applicants under 23 years of age must have at least 350 points.

Engineering Scholarship: W.A. Barrett Scholarship in Engineering

The W.A. Barrett Scholarship in Engineering at Maynooth University was established in 2023 through the generosity of Earthridge International and the Barrett family to commemorate the late William Anthony (Tony) Barrett. The scholarship provides €3,000 to eligible first year students taking a Level 8 course that is accredited by Engineers Ireland at Maynooth University. Two scholarships are available for MH304/MH306 Engineering students.
www.mu.ie/scholarships

Degree Overview

- > **MH304 Bachelor of Electronic Engineering and optional Year 5 Master of Engineering is accredited by Engineers Ireland. Both degrees are recognised internationally, and meet the educational standard required to become a chartered engineer.**
- > **In MH304 Electronic Engineering, students take Engineering fundamentals, Mathematics modules and start their first Problem Based Learning Project in 1st year, with projects in all proceeding years of the degree.**
- > **Problem based learning modules help to better prepare our students to meet the challenges in modern society. Our students are given a solid grounding in: effective communication, ethics, sustainable development goals and project delivery.**
- > **Students who achieve a 2.2 grade (50%) minimum in 3rd year may choose the ME stream. These students have the option in 4th year to complete one of the following: 6 month industry work experience / Erasmus or Research Internship or Project (subject to availability).**
- > **Electronic Engineering at Maynooth University has developed world-class expertise in the area of mobile communications, radio and wireless communications, biomedical engineering research, dynamics and control research, wave energy research, and robotics. Each of these areas is matched to rapidly growing industries and excellent job opportunities. By bringing this deep knowledge to all the undergraduate programmes, we provide our graduates with a**

world-class electronic engineering education but also a head start in these exciting and developing areas.

After Graduation

- > **MH304 Electronic Engineering graduates are highly sought-after in a wide range of ICT, engineering and non-engineering roles. Automotive, health, education, business and finance are all examples of activities now dependent on electronic engineering. Maynooth University engineering graduates are equipped to work in silicon chip manufacturing and design, communications companies and in the development of products closely combining hardware and software.**
- > **Beyond electronic engineering, MH304 graduates have the software skills to work in most software companies, and the problem solving and mathematical skills for many roles in the financial, consultancy and management sectors.**
- > **MH304 Electronic Engineering graduates are highly sought-after in a wide range of engineering and non-engineering roles.**
- > **The Department offers a range of postgraduate programmes.**

Course Structure

In response to consultation with our industry advisory board, this programme offers Project Based learning throughout

1st & 2nd year	3rd year	4th year
Students take Engineering fundamentals, Programming and Mathematics modules and start their first four Problem Based Learning Projects.	3rd year students complete a selection of taught modules and two PBL (Project Based Learning) modules. Students have two progression routes out of the programme to qualification, depending on their grade average in 3rd year.	In fourth year students can choose from a selection of module options. Students planning to exit after 4th year complete a final year project. OR Students with a minimum of 2:2 grade (50%) in 3rd year may complete a further 2 years to graduate with an ME in Electronic Engineering. Work experience is available to students in the 4th year of the 5 year Masters. Students may alternatively choose Erasmus, Study Abroad or a Research Internship or Project (subject to availability).

Sample Modules

1st year	2nd year	3rd year	4th year BE Option
> Electronic Fundamentals > Statics & Dynamics > Mathematics > Physics > Programming > Systems & Control > Project Based Learning x 2	> Analogue Electronics > Telecommunications > Mathematics > Digital Systems > Programming > Electric Circuits > Project Based Learning x 2	> Signals & Systems > Mathematics > Software Engineering > Embedded Real-Time systems > Control System Design > Community Based Project (PBL – Project Based Learning)	> Innovation Management > Computer Control Systems > Computer Vision > Wireless Digital Communications > Computation & Simulation > RF Circuits & Systems > Capstone Project
4th year – ME option		5th year - ME option	
> RF Circuits & Systems > Computer Control Systems > Computer Vision > Robotics & Automation > Information Theory > Wireless Digital Communications		> Advanced Wireless Communications > Design of Experiments & Data Analysis > Electromagnetic Emissions > Optimization Theory > Advance Real Time Systems > Capstone Project	

Topics listed are subject to change; individual modules may not be offered in a particular year.

BSc Robotics and Intelligent Devices

CAO Code: **MH306** | CAO Points 2025: **350**

Places: 35
Duration: 4 years

Erasmus/Study Abroad Option: No
Placement Option: Yes – subject to availability
Mature Applicants: See p. 156
QQI Link: See p. 156
UK, EU & International Applicants: See p. 159

Leaving Certificate: 2H5 & 4O6/H7, Irish, English & O3/H7 Mathematics

Degree Overview

- > The Robotics and Intelligent Devices programme focuses on the design, implementation, and use of intelligent physical things including robots, autonomous vehicles, smart sensors, and internet-of-things devices. It is accredited by Engineers Ireland and internationally recognised.
- > Blending Electronic Engineering and Computer Science, the programme focuses on adding intelligence to everyday systems and developing robots that can collaborate and interact with humans and our environment. Throughout the programme students have the opportunity to work with multiple robotic and intelligent device platforms in well equipped labs.
- > With a problem-based learning approach and substantial projects throughout the programme, students can build a compelling portfolio of projects to show potential employers. In addition to practicing skills in hardware and software analysis and design, experiential learning through projects equips students with key skills in technical and non-technical communication, teamwork, engineering management, and evaluation of impact.
- > The programme is ideally suited to students who want to make a difference in areas such as health and wellbeing, assistive living, smart agriculture, smart manufacturing, retail, hospitality, and many others, through robotics and intelligent device based technologies and solutions.

After Graduation

- > With the rapid pace of progress in the development of Robotics, AI, and intelligent device technologies, graduates gain employment in sectors such as manufacturing, food science, pharmaceuticals, healthcare, energy, communications, research and less obvious areas such as finance.
- > Possible graduate roles may include robotics engineer, software engineer/developer, embedded systems engineer/developer, intelligent systems architect and intelligence analyst.
- > Employers appreciate the experience that graduates have as a result of their work placement and portfolio of projects.
- > Once a student has completed the degree in Robotics and Intelligent Devices they may continue their education in Maynooth, or elsewhere, through postgraduate studies and PhD programmes.

Course Structure

1st year

- > Students take a range of modules covering mathematics, physics, programming, electronic fundamentals and project work

2nd & 3rd year

- > Over these 2 years you will develop a strong basis in robotics and intelligent devices
- > Complete a work placement (subject to availability) or a design challenge in third year.
- > Students are encouraged to compete in high profile robot competitions and other competitive challenges

Final year

- > Students choose between robotics and intelligent device thematic large projects

Sample Modules

Substantial team projects in each of the first 5 semesters with key modules in computing and embedded systems, systems and control, machine learning, and robotics.

1st year

- > Electronic Fundamentals
- > Statics & Dynamics
- > Mathematics
- > Physics
- > Programming
- > Systems & Control
- > Project Based Learning

2nd year

- > Computing for Engineers
- > Digital and Analogue Electronics
- > Mathematics
- > Object Oriented Programming (C++)
- > Algorithms and Data Structures 1+2
- > Operating Systems
- > Intelligent Systems Project
- > Systems Dynamics and Control
- > Systems Dynamics and Control Project

3rd year

- > Robotics & Intelligent Devices for Society Project
- > Probability and Statistics
- > Software Engineering
- > Real-Time and Embedded Systems
- > Robotics & Automation
- > Six month work placement (subject to availability)

Final year

- > Digital Signal Processing
- > Computer Control Systems
- > Machine Learning and Neural Networks
- > Computer Communications Networks
- > Autonomous Mobile Robotics
- > Robotic actuation and sensing
- > Digital Signal Processing
- > Machine Learning and Neural Networks
- > Computer Communications Networks
- > Digital Design and Verilog
- > Computer Vision and Capstone Project

Topics listed are subject to change; individual modules may not be offered in a particular year.

“If you're passionate about solving real, human-centred challenges, this degree is for you. It goes far beyond simply building prototypes in a workshop — design thinking completely transformed how I approach problem-solving. It taught me to lead with curiosity, empathy, and creativity, and I've carried those principles into countless settings since starting my studies at Maynooth University.

One of the standout aspects of the course was its emphasis on presentation and communication. I graduated with a real love for storytelling and a strong ability to convey complex information clearly and engagingly — a skill that truly sets you apart in the workplace.

My time at Maynooth was also shaped by my involvement in the Drama Society, German Society, and Access Society, as well as winning the Universal Design Grand Challenge in the Technology category in 2023 — all of which added valuable depth to my CV.

After speaking with an Accenture representative at the GradIreland Fair in the RDS, I successfully joined their Technology Graduate Programme. Now, as a Business Architecture Analyst, I contribute to various stages of the software development lifecycle — from situation analysis and requirements gathering to testing and project management. The extensive training we received prepared me to work confidently with clients and modern technologies.

What excites me most is the ability to bridge the gap between client expectations and user needs. I get to apply both my foundation in user-centred design and my new skills in technology architecture — and that combination is incredibly powerful in delivering meaningful, impactful solutions.”

Jule Loescher
BSc (Hons) Product Design and Innovation (2023)
Business Architecture Analyst - Accenture

MH804	Bachelor of Arts - part-time, flexible learning (mature only) (NEW)	123

BMus Bachelor of Music

CAO Code: **MH103** | CAO Points 2025: **Not applicable**

Places: 25

Duration: 3 years (4 years with optional Erasmus/ Study Abroad)

Erasmus/Study Abroad Option: Yes - subject to availability

Placement Option: No

Mature Applicants: See p. 156

QQI Link: See p. 156

UK, EU & International Applicants: See p. 159

Leaving Certificate: 2H5 & 4O6/H7, Irish, English & 3rd language. *Restricted-application course – apply to the CAO by February 1st.

Degree Overview

- > **A dynamic programme for music specialists, blending performance, composition, and academic study.**
- > **Offers excellent choice and expertise, from classical to coding, trad to techno, plainchant performance to musical theatre, and minimalism to metal.**
- > **Students can focus on different areas in final year, with major/minor specialisations in performance, composition, or music research (including pop, rock, opera, and film music).**
- > **Develop your performance skills through access to individual tuition.**
- > **Students participate in ensembles such as the Choral Society, Chamber Choir, Musical Society and Traditional Music Group.**
- > **For those considering teaching Music at second level, Music in the MH101 degree also satisfies the Teaching Council subject requirements.**

After Graduation

- > Music graduates are equipped with a wide range of transferable skills. Our students have gone on to work as professional musicians in a broad range of roles and genres (performers, composers and conductors) and in adjacent areas such as music education, arts administration, multimedia, music promotion and marketing, journalism, radio production and presentation, and music libraries.

*MH103 is a CAO restricted-application course. Prospective students must complete an online video audition. Applicants must be able to demonstrate, during the audition, a minimum of Grade 6 standard (ABRSM, RIAM, Trinity College London) on a standard orchestral instrument (excluding percussion), piano, organ, classical guitar, voice or saxophone, or a minimum of Grade 6 standard (Rockschool, Trinity College London) on bass, drums, vocals, keyboard or guitar (electric or acoustic). Traditional Irish instrumentalists and musical theatre vocalists of a comparable fluency are also invited to audition. Please see further details on the Department of Music website. Applicants to MH103 will be sent full details on the assessment process in March annually by the Department of Music. Offers will be made to successful applicants in May, subject to students attaining matriculation requirements in the Leaving Certificate or equivalent examination.

BA Psychology

CAO Code: **MH106** | CAO Points 2025: **509**

Places: 25

Duration: 3 years (4 years with optional Erasmus/Stuay Abroad)

Erasmus/Stuay Abroad Option: Yes – subject to availability

Placement Option: No

Mature Applicants: See p. 156

QQI Link: See p. 156

UK, EU & International Applicants: See p. 159

Leaving Certificate: 2H5 & 4O6/H7, Irish, English & 3rd language

Degree Overview

- > This degree is accredited by the Psychological Society of Ireland (PSI).
- > Psychology is the scientific study of mental life and behaviour. It involves topics such as Brain and Behaviour, Social Psychology, Cognitive Psychology, Developmental Psychology and Psychological Research Methods.
- > Students take Psychology along with two Arts subjects in first year, concentrating on Psychology only in second and third year.
- > This degree is for students who are interested in studying the human mind and behaviours with the rigours of scientific testing.
- > Students use research methods including observation, measurement, hypothesis testing, experimentation, logical inference and statistical analysis.
- > For those who wish to pursue a career as a professional psychologist, this PSI-accredited degree opens up a variety of study options and career paths.

> A variety of career paths outside of psychology are also open to graduates. Some graduates choose to pursue postgraduate conversion courses in different fields of interest.

After Graduation

- > A variety of career paths are available, both within and outside psychology: for students who aim to pursue a career as a professional psychologist, an undergraduate degree is the first stage in professional training that will require an additional two to six years of study and supervised experience.
- > Examples of professional psychologists include:
 - Clinical Psychologists who provide comprehensive mental and behavioural health care across the lifespan.
 - Educational Psychologists who promote better understanding of children's and young people's strengths and needs, and support and enhance school's systems.
 - Organisational Psychologists who identify solutions to problems that improve the well-being and performance of organisations and their employees.

BSocSc Bachelor of Social Science

CAO Code: **MH107** | CAO Points 2025: **348****Places:** 70**Duration:** 3 years (4 years with optional Erasmus/Stuay Abroad)**Erasmus/Stuay Abroad Option:** Yes – subject to availability**Placement Option:** Yes – civic engagement option provided (subject to availability)**Mature Applicants:** See p. 156**QQI Link:** See p. 156**UK, EU & International Applicants:** See p. 159**Leaving Certificate:** 2H5 & 4O6/H7, Irish, English & 3rd language

Degree Overview

- > **The Bachelor of Social Science degree (BSocSc) studies how human societies are organised, the social forces, institutions and ideologies that shape society, and the factors that influence the wellbeing of individuals, families, communities, and countries. The scope of the course includes key topics like class, gender, religion and race.**
- > **Students develop the ability to analyse contemporary social issues and policy responses in areas such as poverty and social exclusion, drug use, criminal justice, housing, migration, ethnicity, disability, ageing, and gender. A key focus is on addressing inequality and promoting rights and entitlements to services for all.**
- > **The degree also introduces students to the social professions, including social work, community work, and youth work, and offers clear pathways to postgraduate study in these areas at Maynooth. Postgraduate opportunities in Social Policy are also available.**
- > **The degree is organised as a double major programme with the core subject of Social Policy and one of the following subjects: Sociology, Philosophy, History, Anthropology, Geography or Economics. The core subject of Social Policy (only available to study in this degree) focuses on government and institutional policies concerned with human needs and welfare in the broadest sense, and how these needs are addressed.**

After Graduation

- > Social Policy is the basis for careers in policy research and policy analysis.
- > Graduates pursue careers in policy analysis, social research and social professions (social work, community work and youth work), the civil service and the charitable sector.

- > Our graduates are also found in management and public administration, the NGO sector, journalism, the media and social research.
- > Graduates can take the National Qualification in Social Work at Masters level (for more information visit www.coru.ie). This degree is prescribed as the basis for undertaking a Masters in Social Work.
- > The Department offers a range of postgraduate study options.

BA Media Studies

CAO Code: **MH109** | CAO Points 2025: **367**

Places: 40

Duration: 3 years (4 years with optional Erasmus/Stuay Abroad)

Erasmus/Stuay Abroad Option: Yes – subject to availability

Placement Option: No

Mature Applicants: See p. 156

QQI Link: See p. 156

UK, EU & International Applicants: See p. 159

Leaving Certificate: 2H5 & 4O6/H7, Irish, a third language & H5 English

Degree Overview

> Media Studies students:

- Gain practical experience through hands-on instruction in creative media practice and critically analyse a range of media forms in society, culture and politics;
- Combine creative and practical storytelling with the development of critical understanding of media – a vital skill since media industries are constantly expanding, with new platforms emerging each year and new issues materialising like AI or fake news;
- Research and analyse media cultures, genres and industries as well as the role of media in society and politics;
- Use critical and creative thinking in their practice of media design and production and interactive storytelling.

> Students develop employability and professionalism through their exploration of media and cultural industries and working lives. Students can also broaden their educational experience by studying Media Studies along with Arts subjects (such as languages, business, social sciences, computer science).

> Media Studies can be combined with Computer Science to develop a broad expertise in Media Technologies.

After Graduation

- > Graduates emerge with a range of practical, critical and transferable skills that enhance their employability in areas including: film, television and radio production; social media; marketing, PR and communications; web and graphic design; content creation; media research; IT.
- > Our graduates have taken up positions at RTÉ, Virgin Media, BBC One, Cartoon Saloon, Brown Bag Films, Microsoft, Accenture, BBDO, Version1. In addition, graduates have become independent creative professionals in filmmaking, content creation and social media.
- > The Department offers a range of postgraduate study options.

BA Creative Writing and English

CAO Code: **MH111** | CAO Points 2025: **380**

Places: 40

Duration: 3 years (4 years with optional Erasmus/Stuay Abroad)

Erasmus/Stuay Abroad Option: Yes – subject to availability

Placement Option: No

Mature Applicants: See p. 156

QQI Link: No

UK, EU & International Applicants: See p. 159

Leaving Certificate: 2H5 & 4O6/H7, Irish, a third language and H5 English

Degree Overview

The BA in Creative Writing and English offers you the opportunity to develop critical and creative skills within one programme, which is innovative not only for its integration of two intertwined subjects, but for its industry links and its teaching practices.

As a student of Creative Writing and English, you will learn:

- > how to develop your creative writing (fiction/poetry/memoir/creative non-fiction) through intensive workshops;
- > the practicalities of creative literary industries;
- > about the development of literary genres and practices;
- > about the conditions that shape literature – from history and geography to questions of gender, race, sexuality, and class.

After Graduation

- > Graduates of the BA in Creative Writing and English will be equipped with: skills in creative thinking; the ability to formulate, present and disseminate complex issues; excellent communication skills; a highly-tuned sensitivity to language usage; the ability to tell and organise stories in compelling ways; an understanding of how to inhabit alternative viewpoints and outlooks. As such, graduates of the programme will be well-prepared for the world of work and will have the capacity to be flexible, inventive and adaptable in their chosen careers.
- > Maynooth University's Department of English includes award-winning creative writers as well as internationally acclaimed scholars of Irish, American, Arab, African, and global literatures. We offer MA programmes in Literatures of Engagement and in Creative Writing, and also offer PhDs in Creative Writing and in critical literature.

Update Feb 2026:
new transfer
pathway from
MH101 into MH111.
See page 41

Course Structure

1st year

Semester 1

- > Take 3 x 7.5 credit modules of Creative Writing and English:
 - > Introduction to Creative Writing
 - > Foundational English 1 (Prose)
 - > Climate Fiction
- > Plus choose 1 other subject, which may include Critical Skills, from the available Subject Groups 1, 2, 4 or 5. See p. 29.

Semester 2

- > Take 3 x 7.5 credit modules of Creative Writing and English:
 - > Introduction to Creative Writing
 - > Foundational English 2 (Poetry and Drama)
 - > Literary Criticism and Theory
- > Continue with your other subject.

2nd year and Final year

- > English and Creative Writing
- > Optional 10 credit Elective in 2nd year (see p. 14 for details)
- > Erasmus/Stuay Abroad option after 2nd year

Sample Modules

1st year

Introduction to Creative Writing: This module is a foundational workshop that provides Creative Writing and English BA students with a grounding in key elements of structure, technique and form through writing practice, including fiction, creative non-fiction, and poetry. The course assists students in establishing and developing their writing practice through exercises and assignments, as well as through reading and through the giving and receiving of feedback.

Climate Fiction: This module considers climate fiction or 'cli-fi'. It examines how writers and artists represent the climate crisis, how they confront its scale, how they urge us to move beyond the anthropocentric and imagine nature, and how they engage readers ethically, with an emphasis on individual and collective responsibility.

2nd year

Specialist Module in Creative Writing: This workshop module will be led by the Maynooth University Arts Council Writer-in-Residence, with content and genre determined by their expertise. Past holders of this position, in place since 2022, are novelists Louise O'Neill and Booker Prize winner Paul Lynch, now a member of staff. The Writer-in-Residence will deliver a seminar / workshop series that examines, for instance, the genre of the novel, with classes analysing selected examples and supporting students to generate material in a workshop setting. The module offers the opportunity to learn from experts in their fields, enhancing student understanding of form and developing their analytical skills while also working to produce original work in the specified genre.

Experiential Learning: This module sees students gathering practical experience of the creative literary industries in Ireland: assisting final year BA CW and/or MA students of Creative Writing in the production of an in-house literary journal, or assisting in the planning and production of an arts event or festival (Arts and Minds at Maynooth; Kildare Readers Festival, with which the Department has established links); or other work experience that might include attending and reviewing festivals/events, or other relevant experience.

Final year

Literary Festival/ Journal Production: In their final semester, students will work as a cohort to stage a mini-festival/ event series or to produce a literary journal. With guidance from lecturers and staff, students will take on different roles in their production(s), which will align with student interests and further their practical experience.

Final Year Project: In addition to their coursework, each student will work with a supervisor to develop and submit a thesis, an extended piece of writing, in their final year: a collection of poetry; a series of short stories; an extract of a novel; or an extended piece of creative non-fiction. Co-supervision with members of other Departments where appropriate to the project/ practice will be supported.

BSocSc Community and Youth Work (full-time)

CAO Code: **MH116** | CAO Points 2025: **Not applicable**

Places: 25-30

Duration: 3 years (full-time)

Erasmus/Study Abroad Option: Yes – subject to availability. We encourage students to consider undertaking international fieldwork placements in years 2 or 3.

Placement Option: Fieldwork placements integral to programme

Mature Applicants: 23 years or older on January 1st of the year of entry. See p. 156

QQI Link: See p. 156

UK, EU & International Applicants: See p. 159

Leaving Certificate: 2H5 & 4O6/H7, Irish, English & 3rd language.

*Strict CAO application deadline of 1st February.

Degree Overview

- > The BSocSc Community and Youth Work is a professional qualification in community work and youth work, dual endorsed by AIEB and NSETS. This programme combines the full-time level 8 degree plus a full-time block fieldwork placement each year.
- > Both community work and youth work are concerned with the achievement of social change and the programme integrates class-based learning and immersive practice experience, creating a unique and transformative learning environment.
- > A range of topics relating to community and youth work are studied in all three years of the programme.
- > Students learn in small groups, with and from others who are committed to making the world a better place. Students are taught by a highly experienced, committed and passionate staff team who challenge and support students to reach their potential as a professionally qualified youth worker and community worker.
- > The Department of Applied Social Studies (DAPPSS) is the longest established provider of professional education and training in youth work and community work in the Republic of Ireland.
- > This programme is for you if you are passionate about and committed to social and environmental justice and want to work in solidarity with those affected by human rights denial, poverty and inequality.
- > Mandatory supervised block fieldwork placements form an integral part of the programme, providing a solid foundation for practical learning, critical reflection, and readiness for employment in the sector.

After Graduation

- > Graduates are employed in a range of community and youth work organisations and agencies such as community development projects, urban and rural development groups, environmental justice groups, youth projects, as well as organisations concerned with particular groups (e.g. women, Travellers, LGBTQ+) or issues (e.g. global citizenship education, Human Rights, unemployment, migrant rights, drugs, poverty etc.)
- > Graduates have a wide range of options to continue their study at postgraduate level.

Application procedure for all applicants to MH116

*As a restricted-application course, entry to MH116 BSocSc Community and Youth Work is not based on CAO points. The application process is designed to assess the applicants' potential to develop as professional practitioners. All applicants are invited to Maynooth University to complete a personal statement and written exercise. Applicants who have a disability and who may require exam supports should refer to page 155. Shortlisted applicants will be invited to Maynooth University for an individual and group interview in April 2026. Interviewees should bring one work / volunteer or study related reference.

Note 1: 50% of places are reserved for appropriately experienced mature students.

Note 2: Any offer of a place on this programme is subject to a satisfactory background check by the National Vetting Bureau.

🖱 www.maynoothuniversity.ie/applied-social-studies

Course Structure

- > The MH116 degree is a level 8 honours degree and professional qualification in Community Work and Youth Work. It combines on-campus study of a range of topics relevant to community and youth work with off-campus full-time block supervised fieldwork practice. Classes run from early September to late May each year with an attendance requirement of 80%.
- > Students are required to complete 520 hours of full-time block supervised fieldwork in each year of the degree. This will involve evening and weekend work. All students complete fieldwork practice in both community work and youth work.

Sample Modules

1st year	2nd year	Final year
> Community and Youth Work Principles and Practices > Introduction to Social Sciences > Youth and Community Arts > Practice Skills Development > Fieldwork Practice	> Community and Youth Work Issues and Policies > Professional Studies > Applied Social Sciences > Practice Skills Development > Fieldwork Practice	> Research for Practice > Social Science Context of Practice > Critical Issues in Practice > Professional Development > Fieldwork Practice

BSc Product Design and Innovation

CAO Code: **MH305** | CAO Points 2025: **327**

Places: 40
Duration: 4 years

Erasmus/Study Abroad Option: Yes – subject to availability
Placement Option: Yes – subject to availability
Mature Applicants: See p. 156
QQI Link: See p. 156
UK, EU & International Applicants: See p. 159

Leaving Certificate: 2H5 & 4O6/H7, Irish, English and O3/H7 Mathematics plus 3 other subjects

Degree Overview

- > Students of Product Design and Innovation develop creative, artistic, and analytical skills while gaining a deep understanding of materials, manufacturing technologies, and user and human-centred design. The programme supports the development of products that are functional, feasible, and responsive to the needs of people and society.
- > The programme is a practical, studio-based course that includes project-based learning, workshops, CAD laboratory sessions, and group work. Students engage in both individual and collaborative projects, developing a balance of independent design skills and teamwork.
- > Studio subjects cover visualisation, freehand drawing and rendering, computer modelling and digital rendering, as well as model making and prototyping using a range of traditional and digital tools.
- > The interdisciplinary nature of the programme allows students to explore design through engineering, business, and social innovation perspectives. This prepares graduates to address complex design problems that require creative thinking, technical understanding, and commercial awareness.
- > Academic staff include experienced designers and entrepreneurs with expertise across a range of industries, including medical devices, consumer services, electronics, user interfaces, sports equipment, and homeware.
- > Students engage with real clients through industry-linked projects, providing meaningful experience in responding to professional briefs and working within real-world constraints.
- > The programme includes the option of a six-month, full-time work placement in a relevant employment setting or a study abroad opportunity through the Erasmus programme. Placement support is offered through the University's Placement Office, International Office, and departmental placement coordinators.

After Graduation

- > Product designers shape how we interact with products, services, and systems. As design plays a key role in addressing technological and social change, the BSc in Product Design and Innovation prepares students to think critically, act creatively, and collaborate effectively across the fields of design, engineering, and business.
- > Graduates are equipped with the skills and knowledge to contribute to a wide range of fields, including Product Design, User Experience and User Interaction (UX/UI) Design, Service Design, Medical Device Development, Furniture and Homeware Design, Digital Marketing, User Research, and roles focused on Design-Led Innovation.
- > Many choose to continue their studies through the Department's MSc, MPhil, or PhD in Design Innovation, deepening their expertise, specialising in a particular area, or pursuing research in design-led practice.

[BBS/BBA Entrepreneurship p. 89](#)

Course Structure

> As a specialised 4 year Bachelor of Science degree in Product Design and Innovation, a range of technology, marketing and design subjects are taken in all years.

> In third year, students may choose either to undertake a six-month, full-time work placement in a relevant employment setting, or to participate in the Erasmus/Study Abroad exchange programme by completing a semester at a third-level partner institution within the EU or at a non-EU partner university through Erasmus+ (subject to availability).

Sample Modules

1st year

- > Creative thinking and design
- > Core design skills (sketching, prototyping, presentation)
- > Introduction to embedded electronic engineering
- > Maths, physics and material science
- > Computer aided design

2nd year

- > Core design skills
- > Universal design
- > Usability, ergonomics and aesthetics
- > Visual communication & portfolio
- > Design history and culture
- > Manufacturing processes
- > Option in the second semester to take either Digital marketing or Introduction to UX & UI

3rd year

- > Ethnography
- > Design for environment and sustainability
- > Design project with industry
- > Industry Erasmus/Study Abroad
- > Human computer interaction

Final year

- > Advanced materials and design for manufacture
- > Innovation management
- > Keystone design projects
- > Systematic design methods for innovation

Bachelor of Arts – part-time, flexible learning

(three part-time evening degrees for mature students aged 21 years or older only)

CAO Code: **MH804 (NEW)** | CAO Points 2025: **Not applicable**

- BA Local History, Cultural Heritage and Environment
- BA Equality and Community Studies
- BA Adult, Community and Further Education

Update Feb 2026: MH804 BA Adult, Community and Further Education is now a 6 year degree - to meet Teaching Council requirements

Places: 50 (MH804)
Duration: 4.5 years (part-time)

Erasmus/Study Abroad Option: No
Placement Option: No
Mature Applicants: Applicants must be 21 years or older on 1 January of the year of entry. Application through the CAO. Selected candidates are invited for interview. See our website for details (link in Contact us).
QQI Link: No
UK, EU & International Applicants: See p. 157

Leaving Certificate: Not applicable. Only open to mature applicants aged 21 years or older on 1 January in year of application.

OPC (Open Choice Option): Decision on choice of MH804 degree stream must be made at Registration

Overview of the BA degrees

- > These three BA programmes are part-time, evening (with some daytime options available), interdisciplinary degrees for mature applicants (21 years or older on 1 January in year of application). Applicants choose one of three degree options at the point of registration:
 - BA Local History, Cultural Heritage and Environment
 - BA Equality and Community Studies
 - BA Adult, Community and Further Education
- > Applicants can use previous learning to fast-track to the degree award through the University's Recognition of Prior Learning system.
- > MH804 is a 4.5 year programme, with defined core modules and the option to register for optional modules at the beginning of each year, from year 2 onwards.
- > New students of these degrees may have been out of the education system for some time. We therefore dedicate time across all 4.5 years to study skills and student support.
- > These degrees are led by the Department of Adult and Community Education in collaboration with the departments of Applied Social Studies; History; Geography; Anthropology; Sociology; Classics; Centre for Irish Cultural Heritage; and Nua-Ghaeilge.

BA Equality and Community Studies

- > If you are interested in community work, addiction and recovery, social justice, youth studies, development, adult education, politics, society and culture then this wide-ranging degree will appeal to you.

BA Local History, Cultural Heritage and Environment

- > This degree combines the expertise of Ireland's leading history department for the study of local history, with one of the most well regarded geography departments in the country; study folk traditions, Gaelic Literature and Culture with modules from the Centre for Irish Cultural Heritage and Ancient Classics, Anthropology and Sociology.

BA Adult, Community and Further Education

- > If you are interested in understanding how adults learn, education across the lifespan, design and delivery of Adult Education programmes, and are working in, or seeking to work in learning contexts across community and further education, then this degree is for you. (Teaching Council Accreditation in progress).

After Graduation

BA Equality and Community Studies

- > The community, voluntary and statutory sectors.
- > Adult and further education and training; community development, teaching, drug and alcohol services, civil service and Non-Governmental Organisations.
- > Postgraduate study in a variety of disciplines including Adult and Community Education, Applied Social Studies, Sociology.
- > Progression to the HDip. in Further Education and Training or the MEd in Adult and Community Education.

BA Local History, Cultural Heritage and Environment

- > Develop research, writing, communication, critical thinking, analysis and interpretation skills to the highest level. Some of our graduates have published their research.
- > Higher education, tourism, hospitality and leisure industries.
- > Postgraduate study in fields such as history, geography, archaeology and folklore.
- > Progression to the HDip. in Further Education and Training or the MA in Local History (incorporating Historic Irish Houses and Local History).

BA Adult, Community and Further Education

- > Teach in a range of Further Education settings including in Colleges of Further Education, adult learning centres, YouthReach, community education, prison education, National Learning Network, private providers
- > Hold education positions in NGOs and in the tertiary sector etc.
- > Postgraduate study in adult and community education
- > Progression to MEd in Adult and Community Education

Sample Modules

BA Equality and Community Studies

- > Community work principles and processes
- > Anti-Racism in Community Work
- > Delivering EDI within Organisations
- > Substance Misuse and Dependence
- > Disability Studies
- > Group Facilitation Skills

BA Local History, Cultural Heritage and Environment

- > Death in Early Ireland
- > Climate change: the potential impacts for community and locality
- > Geographies of Waste
- > Ireland and the Great Famine
- > Irish Social History 1850-1950

BA Adult, Community and Further Education

- > Reflecting on equality, diversity, and inclusion
- > Urban Society: global processes in local settings
- > Adult Learning in groups
- > Philosophy of Adult Education
- > Curriculum Studies and assessment methods

“My time spent on the LLB at Maynooth University was an incredibly rewarding academic and personal experience. I was excited to study at university, but I was also a little nervous about starting at third level. From the very beginning, though, I felt genuinely welcomed and supported.

The School of Law and Criminology has a real sense of community, with engaging lecturers who encourage you to think critically and develop your voice.

One of the best experiences in Maynooth was getting involved in the different law societies (the Law Society, FLAC Society and ELSA Society), which has afforded me so many opportunities to meet new people, get involved in events, including guest speaker talks, intervarsity moot court and negotiation competitions and networking, and to feel part of the student life in Maynooth beyond the classroom.

I was delighted to win Maynooth University Society Person of the Year 2024, to be a finalist in the Irish Law Student of the Year 2024, and act as Secretary-General of ELSA Ireland 2024-2025.

Studying in the heart of a university town made the experience all the more special, as we had all we needed nearby but were also very close to the city.

The LLB has given me the flexibility to explore a wide range of legal topics, and has helped me to focus on my future goals. It has given me the legal research and advocacy skills, confidence, and inspiration to further pursue my career in academia by completing both a Masters of Law (LLM) in 2025 and qualifying as a Barrister from the King's Inns — and I know that I will look back on my time at Maynooth as some of the most valuable years of my life.

For anyone considering the the LLB, or studying in the School of Law and Criminology at Maynooth, I could not recommend it more — it's academically challenging, socially vibrant, and a genuinely supportive environment to grow both personally and professionally as you pursue the successful foundations for a life-long career in law.”

Adam O'Carroll

LLB Law

CAO Code: **MH501** | CAO Points 2025: **452**

Places: 60
Duration: 4 years

Erasmus/Study Abroad Option: Yes - subject to availability
Placement Option: Yes - subject to availability**
Mature Applicants: See p. 156
QQI Link: See p. 156
UK, EU & International Applicants: See p. 159

Leaving Certificate: 2H5 & 4O6/H7, Irish & English

Degree Overview

- > The LLB (MH501) is a four-year degree almost exclusively in law, allowing you to study law in depth and detail. This innovative programme puts a strong emphasis on the development of verbal and written advocacy skills through applied modules such as legal skills, negotiation and dispute resolution. Students can future-proof their degree with our exciting new modules in Law and Technology in each of years 2 and 3.
- > MH501 provides students with a wider selection of law modules than MH502, the BCL, and is one year longer than the latter degree. Both law degrees, MH501 and MH502, are accredited by the Honorable Society of the King's Inns.
- > Acquire a thorough grounding in the fundamental areas of legal study and a broad range of specialist modules like Law and Biotechnology, Tax Law, and Media Law.
- > Enhance employability by developing your faculties for argument, reasoning and for the analysis of complicated ideas.
- > Students may apply to complete a work placement year in a law firm (subject to availability) or a year studying abroad at one of our international partner institutions (subject to availability).
- > Student societies such as the Law Society, European Law Students' Association or Student FLAC (Free Legal Advice Centre) Society are all valuable additions to our students' university experience.

After Graduation

- > Graduates of the LLB will be eligible to take the Law Society's FE-1 entrance examinations (necessary to access training as a solicitor) and the entrance examinations for the King's Inns' Barrister-at-law degree programme (necessary to access training as a barrister).
- > Studying law also opens up a whole range of career options outside of being a lawyer such as careers in: journalism; policy development; business and finance; management consulting; the Non-Governmental Organisation (NGO) sector; and national and international public administration (such as with the EU or UN).
- > The School of Law and Criminology offers a wide range of postgraduate study options from Criminology to International Business Law.

BCL (Law and Accounting)

CAO Code: **MH502 LWA** | CAO Points 2025: **409****Places:** 200 (MH502)**Duration:** 3 years**Erasmus/Study Abroad Option:** Yes - subject to availability**Placement Option:** Yes – subject to availability****Mature Applicants:** See p. 156**QQI Link:** See p. 156**UK, EU & International Applicants:** See p. 159**Leaving Certificate:** 2H5 & 4O6/H7, Irish & English & O4/H7 Mathematics*

* Students admitted to MH502 are required to have O4/H7 Mathematics to register for LWA

OPC (Open Choice Option):

Up to 4 weeks to decide on MH502 degree stream (entry requirements apply)

Degree Overview

- > This degree is jointly accredited by both the legal and accounting professions. Students can avail of exemptions (upon graduation) from CAP 1 examinations from the Institute of Chartered Accountants in Ireland, and equivalent examination papers from the ACCA and the CIMA professional accounting bodies. This law degree is accredited by the Honorable Society of King's Inns.
- > This degree is designed for those who would like to study law while gaining a strong background in accounting. For the three years of this programme, students take Law and Accounting in equal measure, making this degree particularly attractive for those considering a career in either of these fields.
- > Students acquire key financial and accounting skills alongside a thorough grounding in core law subjects.
- > Become a highly sought-after law and accounting graduate with the technical and transferable skills needed to succeed in your chosen career. Enhance your employability by developing your faculties for argument, reasoning and for the analysis of complicated ideas.

>After Graduation

- > Embark on the route to becoming a professional in accounting or law, both of which offer a rewarding career with international mobility and high earning potential.
- > The numeracy skills, coupled with an ability to think critically and analytically, which are developed on this programme, are invaluable assets in a wide range of careers. Graduates have successful and rewarding careers in accounting, banking and the financial services sector generally, as well as financial research and teaching.
- > Graduates of the BCL programme, wishing to pursue a career in accounting, will be in a position to enter professional training and avail of exemptions from the professional accounting bodies.
- > Graduates of the BCL will be eligible to take the Law Society's FE-1 entrance examinations (necessary to access training as a solicitor) and the entrance examinations for the King's Inns' Barrister-at-law degree programme (necessary to access training as a barrister).
- > Many of our students continue to further postgraduate study in a very wide range of Law, Business, Accounting and Finance subjects at Maynooth University.

BCL (Law and Business)

CAO Code: **MH502 LWB** | CAO Points 2025: **409****Places:** 200 (MH502)
Duration: 3 years**Erasmus/Study Abroad Option:** Yes – subject to availability
Placement Option: Yes – subject to availability**
Mature Applicants: See p. 156
QQI Link: See p. 156
UK, EU & International Applicants: See p. 159**Leaving Certificate:** 2H5 & 4O6/H7, Irish & English & 04/H7 Mathematics*

* Students admitted to MH502 are required to have 04/H7 Mathematics to register for LWB

OPC (Open Choice Option):

Up to 4 weeks to decide on MH502 degree stream (entry requirements apply)

Degree Overview

- > The BCL is a three-year degree in law combined with one other subject, in this case Business - accredited by the Honorable Society of King's Inns. While the BCL covers all the core modules of law, students take less law than on the LLB (MH501), giving students more time to develop expertise in business. The main advantage is that it allows the study of law along with learning in business. This combination is ideal for those who may wish to run their own practice, to work in a setting where law is applied, to work in a business itself, or to practice commercial law.
- > Business is the way by which every product and service you use in daily life is developed, promoted and delivered on the global stage. This degree provides students with insights into the core functions of Business and how they interact to create value for and capture value from clients and customers.
- > Law and Business students at Maynooth are offered unparalleled flexibility and choice. Students have the option of taking a four year degree with a work placement or study year abroad (subject to availability), thus combining what they learn in university with insights into industry (legal or commercial) or another culture.
- > The defining feature of this degree is the skill-set which it provides students; future employability is enhanced by developing the student's faculties for argument and reasoning, for clear thinking, for the analysis of complicated ideas and for understanding the commercial context in which the law operates.
- > Students who successfully complete 1st year also have the option of transferring into the 2nd year of the LLB degree (MH501) or the 2nd year of the BBS Business and Management degree (MH404).

After Graduation

- > This degree combines the best elements of the University's degrees in Business and in Law to ensure students graduate with the maximum range of career options, both in Law and in Business.
- > Graduates of the BCL will be eligible to take the Law Society's FE-1 entrance examinations (necessary to access training as a solicitor) and the entrance examinations for the King's Inns' Barrister-at-law degree programme (necessary to access training as a barrister).
- > Business graduates are consistently among the most employable in the Irish education system. This degree opens up a whole range of career options in the commercial world such as in general management, service, IT and management organisations, consulting, journalism, policy development, the NGO sector, and national and international public administration.
- > Both the School of Business and the School of Law and Criminology offer a range of postgraduate programmes for BCL (Law and Business) graduates.

- > Some students may choose to complete a work placement or study abroad year between 2nd and final year and graduate after the 4th year. Students who opt to spend a year studying abroad are awarded a BCL (International) degree. (**The University will support you in the search for a placement job; however, the process is competitive).
- > Students who successfully complete the 1st year of the programme have the option of transferring into the 2nd year of the LLB degree MH501 or 2nd year of the BBS Business and Management degree. An introductory accounting module must be taken in semester 1 of 2nd year (in the case of the latter degree).

Sample Modules

1st year

- > Core areas, like Business Models and Marketing, and Criminal Law
- > Critical skills modules like Legal Research Methods and Managing Innovation
- > Practical skills through participating in mock trials

2nd year

- > Core areas, like Company Law, EU Law, Management Information Systems, and Human Resource Management
- > Critical skills like analysing materials in tutorials and seminars
- > Range of optional modules from which to choose, including Commercial Law, Project Management, and International Business

Final year

- > Core areas, like Property Law, Equity, Strategic Management, and Human Resource Management
- > Critical skills, like analysing the philosophy of law
- > Optional modules, including Innovation Management, Media Law, Environmental Law, Contemporary Issues in Marketing, and Employment Law

BCL (Law and Criminology)

CAO Code: **MH502 LWC** | CAO Points 2025: **409****Places:** 200 (MH502)**Duration:** 3 years**Erasmus/Study Abroad Option:** Yes - subject to availability**Placement Option:** Yes – subject to availability****Mature Applicants:** See p. 156**QQI Link:** See p. 156**UK, EU & International Applicants:** See p. 159**Leaving Certificate:** 2H5 & 4O6/H7, Irish & English**OPC (Open Choice Option):**

Up to 4 weeks to decide on MH502 degree stream (entry requirements apply)

Degree Overview

- > **Law is taken jointly with Criminology for the three years of this degree which is accredited by the Honorable Society of King's Inns. We are one of the few universities in Ireland to offer the option of studying law with criminology as part of an accredited law degree. Faculty include leading international experts in the field with research interests in policing, restorative justice, gender, ethnicity, human trafficking, terrorism and mental health.**
- > **This is a unique interdisciplinary programme offering perspectives from sociology, psychology and anthropology, as well as law.**
- > **Students acquire a thorough grounding in the fundamental areas of legal study: including foundational legal principles; legal systems; and the role of Irish, European, and international law.**
- > **Through studying Criminology, students examine the causes of crime and society's reaction to criminality.**
- > **The BCL is a three-year degree in law combined with one other subject. While the BCL covers all the core modules of law, you cover less law than on the LLB (MH501), giving you more time to develop expertise in another subject. The main advantage is that it allows you to combine the study of law with the study of another discipline.**

After Graduation

- > **Graduates of the BCL will be eligible to take the Law Society's FE-1 entrance examinations (necessary to access training as a solicitor) and the entrance examinations for the King's Inns' Barrister-at-law degree programme (necessary to access training as a barrister).**

- > This programme allows students with an interest in law to broaden their career prospects into the criminal justice world, opening up potential careers in the Gardaí, security services, data analytics, probation, the prison service, the Non-Governmental Organisation (NGO) sector and research institutes.
- > The School of Law and Criminology also offers a range of postgraduate study options in related fields.

BCL (Law and Arts)

CAO Code: **MH502 LWD** | CAO Points 2025: **409****Places:** 200 (MH502)
Duration: 3 years**Erasmus/Study Abroad Option:** Yes - subject to availability**
Placement Option: Yes - subject to availability**
Mature Applicants: See p. 156
QQI Link: See p. 156
UK, EU & International Applicants: See p. 159**Leaving Certificate:** 2H5 & 4O6/H7, Irish & English
OPC (Open Choice Option):
Up to 4 weeks to decide on MH502 degree stream (entry requirements apply)

Degree Overview

- > This law degree is accredited by the Honorable Society of King's Inns. Students receive an excellent grounding in core law subjects, while also retaining the flexibility to customise their own academic path.
- > Law is taken jointly with one Arts subject for the final two years of the programme. Students can choose from a wide range of Arts subjects including languages and other areas within the humanities and social sciences.
- > The BCL is a three-year degree in law combined with one other subject. While the BCL covers all the core modules of law, you cover less law than on the LLB (MH501), giving you more time to develop expertise in another subject. The main advantage is that it allows you to combine the study of law with the study of another discipline.
- > Students may apply to complete a work placement year in a law firm (subject to availability) or a year studying abroad at one of our international partner institutions (subject to availability).
- > BCL students who successfully complete the first year of the programme have the option of transferring into the second year of the LLB programme (MH501).

After Graduation

- > Graduates of the BCL will be eligible to take the Law Society's FE-1 entrance examinations (necessary to access training as a solicitor) and the entrance examinations for the King's Inns' Barrister-at-law degree programme (necessary to access training as a barrister).

- > Studying law also opens up a whole range of career options in addition to being a lawyer such as careers in: journalism; policy development; business and finance; management consulting; the Non-Governmental Organisation (NGO) sector; and national and international public administration (such as at the EU or UN).
- > The School of Law and Criminology offers a wide range of postgraduate study options.

Course Structure

1st year

- > 30 credits of Law with up to two other subjects, one of which may be Critical Skills. See p. 29 for Subject Groups.

2nd year & Final year

- > Continue in 2nd and 3rd year with at least 30 credits of Law and 30 credits of your chosen subject from 1st year (excluding Critical Skills)
 - > You may apply to complete a work placement year, or a study abroad year, after 2nd year, and graduate after 4 years (subject to availability). Students who successfully complete the 1st year of the programme have the option of transferring into the 2nd year of the LLB programme (MH501)
 - > Students who opt to spend a year studying abroad are awarded a BCL (International) degree
- **The University will support you in the search for a placement job; however, the process is competitive.

Sample Modules

1st year

- > The nature of legal systems, and how laws are made nationally and internationally
- > The role of lawyers, judges, legislators, and other actors in the legal system
- > The laws relating to crime, negligence, and privacy

2nd year

- > The laws relating to evidence, and building a legal case
- > The laws relating to business and companies
- > EU and international law

Final year

- > The laws relating to the family, media, and property
- > International law and justice
- > The theory of laws and legal systems

BCL (Law and Languages)

CAO Code: **MH503** | CAO Points 2025: **410****Places:** 50
Duration: 4 years**Erasmus/Study Abroad Option:** Yes, integrated.
Placement Option: Yes – subject to availability**
Mature Applicants: See p. 156
QQI Link: See p. 156
UK, EU & International Applicants: See p. 159**Leaving Certificate:** 2H5 & 4O6/H7, Irish & English. Students who wish to take Irish as part of their degree must have at least a H4 in Irish.

Degree Overview

- > The BCL (Law and Languages) is a four-year degree in Law combined with French, German, Irish or Spanish, opening up a range of employment prospects within and beyond Ireland.
- > Students undertake all of the required modules needed for Law and a full suite of modules in their chosen European language.
- > There are additional opportunities to continue the study of other modern languages in first year and/or take up a new language as a beginner in second year.
- > Students receive an excellent grounding in core law subjects, while also developing their linguistic competence and intercultural awareness.
- > The degree includes modules in French, German and Spanish Law and specialised modules relating to law and the Irish language, as well as classes in legal translation and vocabulary.
- > Students will have an opportunity to gain international experience through an integrated study abroad programme at one of our European or international partner institutions.
- > Students taking Irish will be expected to combine a Gaeltacht placement or Irish-language work placement of one semester with an Erasmus study placement abroad of one semester in third year.
- > Students interested in gaining intersectoral experience will be supported to undertake a work placement in a country where their chosen language is spoken. Students are encouraged to source their own work placements, which are subject to approval and registration with the Careers and Employability Service.
- > Graduates of this programme will develop a strong capacity for analytical and critical thinking as well as strong linguistic skills and a keen sense of cultural awareness.

**The University will support you in the search for a placement job; however, the process is competitive.

After Graduation

- > Taking a degree in Law and Languages opens up career opportunities with multinational companies and law firms based in Ireland, with international agencies, companies and law firms based abroad, and the public service in Ireland and the EU.
- > Various EU institutions require the services of lawyer-linguists, i.e. European citizens with a degree in Law and excellent knowledge of several European languages.
- > The public and civil services in Ireland and the EU have a need for graduates with strong language skills and a deep understanding of legal procedures and practices to work as legal translators and legal interpreters.
- > Graduates from this programme will have a unique set of skills that will enable them to work between two legal jurisdictions and serve clients in both.
- > Graduates of the BCL will be eligible to take the Law Society's FE-1 entrance examinations (necessary to access training as a solicitor) and the entrance examinations for the King's Inns' Barrister-at-law degree programme (necessary to access training as a barrister).

Course Structure

1st year

- > 30 credits of Law
- > 30 credits of language study - students can choose from French, German, Irish or Spanish. French, German and Spanish can be taken at beginners' or post Leaving Certificate-level.

2nd year

- > Continue in 2nd year with at least 30 credits of Law and 30 credits of your chosen language.
- > Take advantage of the opportunity to continue studying a second European language or to begin a new language via the option of a 10 credit Elective.

3rd year

- > All students undertake a study abroad programme after 2nd year.
- > Students can opt to spend their year studying abroad or a combination of both study abroad and work placement in a country/region where the language they are studying is spoken (subject to approval).

4th year

- > After spending a year studying or on work placement abroad, and completing year 4, students qualify with a 4-year BCL (International) degree.

Sample Modules

1st year

- > The nature of legal systems, and how laws are made nationally and internationally
- > The laws relating to crime, negligence, and privacy
- > Introduction to Comparative Law

2nd year

- > EU and Company Law
- > Introduction to French/German/Spanish Law
- > Legal Language & Legal Translation
- > Irish Language and the Law

4th year

- > The laws relating to the family, media, and property
- > The theory of laws and legal systems
- > Legal Language & Legal Translation

BA Criminology

CAO Code: **MH504** | CAO Points 2025: **401****Places:** 25
Duration: 3 years**Erasmus/Study Abroad Option:** Yes - subject to availability
Placement Option: Yes – subject to availability**
Mature Applicants: See p. 156
QQI Link: See p. 156
UK, EU & International Applicants: See p. 159**Leaving Certificate:** 2H5 & 4O6/H7, Irish & English

Degree Overview

- > **Criminology can be described as the study of crime, criminal behaviour and society's reaction to it. This three-year degree programme allows students to study criminology in depth, equipping you with the skills to examine criminal behaviour and understand what drives it.**
- > **Maynooth University is one of only two universities in the Republic of Ireland offering the opportunity to study Criminology as a single major.**
- > **This is a unique interdisciplinary programme offering perspectives from sociology, psychology and anthropology, as well as law.**
- > **Faculty include leading international experts in the field with research interests in prisons, policing, restorative justice, gender, ethnicity, human trafficking, terrorism and mental health.**
- > **In first year, students acquire a thorough theoretical understanding of crime, both in an international and Irish context. This is built on in second and third year when students take core modules in subjects such as prisons and policing, as well as optional modules in line with their interests.**

- > The skills you will gain from studying Criminology, such as a focus on evidence and data-based inquiry, are also highly transferable to other areas, including: law, journalism, social research, social work, counselling, community work, policy analysis and public administration.
- > The School of Law and Criminology also offers a range of postgraduate study options in related fields including the MA in Comparative Criminology and Criminal Justice.

After Graduation

- > This programme allows students to explore career prospects in the criminal justice world, opening up potential careers in the Gardaí, security services, data analytics, probation, the prison service, the Non-Governmental Organisation (NGO) sector and research institutes.

Contact Us

Maynooth University School of Law and Criminology,
New House, South Campus📧 www.maynoothuniversity.ie/law✉ law@mu.ie

Course Structure

1st year

- > 30 credits of Criminology (group 2 and group 7)
- > Up to 2 other subjects (one of which may be Critical Skills) from the available groups - see p. 29

2nd year

- > At least 50 credits of Criminology
- > Optional 10 credit Elective
- > Optional work placement or study abroad after second year – subject to availability
- > Students who take at least 15 credits of Law in year 1 of MH504, and who pass 1st year, are eligible to transfer into year 2 of the MH502 BCL Law and Criminology degree or year 2 of the MH501 LLB degree.

3rd year

- > 60 credits of Criminology.

**The University will support you in the search for a placement job; however, the process is competitive.

Sample Modules

1st year

- > You concentrate on the study of Criminology through a wide range of criminological modules for each of the three years of the programme.
- > Core modules such as: Exploring Criminology, Introduction to Criminal Justice, Thinking Like a Social Scientist and Criminological Classics.

2nd year

- > Students take a number of core modules but can also tailor the degree to suit their interests through a wide range of optional modules.
- > Core modules such as Policing, Research Methods, Criminological Theory, and Crime and the Media.
- > A range of optional modules including perspectives from anthropology (Forensic Anthropology), sociology (Society and State) and Criminology (Mental Health and the Criminal Justice System; Gender, Crime and Criminal Justice; Ethnicity, Crime and Punishment)

3rd year

- > Core modules such as Punishment, Penal Policies and Prisons
- > A range of optional modules such as: Criminal Psychology; Victimology; the Psychology of Terrorism; the Politics of Mass Incarceration; Crime, Death and Forensic Anthropology.

“I would say I’m a ‘social scientist’ and this is an area I wanted to explore.

My current role as Director of Global Medical Affairs at Sarepta Therapeutics focuses on rare pediatric diseases across Europe, Africa, and Asia Pacific. Witnessing the positive impact on patients is incredibly fulfilling. In September, I enrolled in the University College London’s MBA Health programme to acquire the framework of skills to make an even greater contribution to the field of rare diseases.

In my undergraduate degree at MU we covered everything from cell biology to neuromuscular biology, medical mycology, biotechnology and immunology. A key lesson I learned was the importance of effective research communication. Your research is useless if you can’t communicate it to your audience. This comes down to storytelling and making concepts accessible.

At MU, there was a heavy emphasis on scientific writing and presentations which were put into practice through literature reviews, small group presentations, thesis writing and forums such as the thesis-in-three competition. To this day, I aim to present in a way that keeps my audience engaged to retain key messages. Maynooth embodies academic excellence, opportunity for all, and societal impact through its community. The environment creates people-focused leaders ready for the international stage. Anyone who spends some time at MU has incredibly positive memories of their experience, and I believe it’s the people that set it apart.”

Gerard Sheehan

BSc Biotechnology

CAO Code: **MH202** | CAO Points 2025: **430****Places:** 35
Duration: 4 years**Erasmus/Study Abroad Option:** No
Placement Option: Subject to availability
Mature Applicants: See p. 156
QQI Link: See p. 156
UK, EU & International Applicants: See p.159**Leaving Certificate:** 2H5 & 4O6/H7, Irish, English & a Science subject (i.e. Agricultural Science, Biology, Chemistry, Computer Science, Physics, or Physics with Chemistry) & O4/H7 Mathematics

Degree Overview

- > **Biotechnology is the use of biological molecules, cells and organisms for applications in various fields such as medicine, agriculture and industry.**
- > **While biotechnology is fundamentally the use of biology to solve problems and make useful products, it is a multidisciplinary field that combines biology, chemistry, genetics and other sciences. Students in this field study core disciplines such as genetics, molecular biology, immunology, microbiology, biochemistry, and cell biology as well as applied areas including genetic engineering, molecular diagnostics and bioprocessing of food and drugs.**
- > **Students reinforce theoretical studies with practical laboratory sessions, visits to industrial companies, and ideally a placement in a biotech company (subject to availability).**
- > **There is a potential transfer pathway from first year BSc MH201 to second year MH202 BSc Biotechnology. Places are limited and are based on 1st year results. See p. 67.**

After Graduation

- > Graduates typically work in the biopharmaceutical sector, manufacturing new drugs at the cutting edge of medical research (for example, antibodies used to treat cancers or immune disorders, or vaccines to prevent cervical cancer or hepatitis B), developing new diagnostic systems for human or animal health, or improving food production.
- > The Biology Department also offers a range of postgraduate courses.

Update Feb 2026: Course structure - 1st year new option to take Data Science as a subject

CAO Code: **MH203** | CAO Points 2025: **431**

Places: 35
Duration: 4 years

Erasmus/Study Abroad Option: Yes - subject to availability

Mature Applicants: See p. 156

QQI Link: See p. 156

UK, EU & International Applicants: See p. 159

Leaving Certificate: 2H5 & 4O6/H7, Irish, English & O4/H7 Mathematics & O6/H7 Science subject (one of Agricultural Science, Biology, Chemistry, Computer Science, Geography, Physics or Physics with Chemistry)

Degree Overview

- > **With Climate Change**, the global biosphere has entered a new and uncharted phase. To find solutions for this crisis, scientists need to better understand how organisms, ecosystems and the environment interact together. This course brings these disciplines together over an advanced 4-year programme. Students benefit from the international strengths of both the Biology and Geography Departments, and obtain integrated training in the applied areas of environmental data acquisition and experimental observation and analysis.
- > The core areas in Biology and Geography covered by the programme provide foundation knowledge across both disciplines, and explore in different ways how the dynamic planet Earth supports such a diversity of climates, landforms, ecosystems and species, and also how human activity is impacting on all of these from a local to a global scale.
- > Training covers advanced technical skills in both disciplines, including geographical information systems, climate analysis, animal and plant science, molecular biology, and field-based methods, as well as advanced statistical analysis and data science.
- > Students learn key transferable skills including independent thinking and analysis, advanced technical writing, presentation skills, group-working and leadership - all valuable in future careers.
- > The main strengths of this degree include the advanced technical competency and expertise available from staff at Maynooth, and the variety of module options for students, alongside supporting options in Physics, Chemistry, Data Science and Statistics that provide options such as the pursuit of a science teaching career.

After Graduation

- > Examples of careers for graduates of this degree include environmental consultancy, geographical information systems officer, town planning (following relevant postgraduate study), careers in science publishing and communication, as well as biology careers in research, healthcare and conservation.
- > Graduates can also continue their studies with a PME and become a second level teacher of Biology and Geography to HL Leaving Certificate and Junior Certificate Science.
- > Both the Department of Biology and the Department of Geography offer a range of postgraduate study options.

BSc Physics with Astrophysics

CAO Code: **MH204** | CAO Points 2025: **385**

Places: 35
Duration: 4 years

Erasmus/Study Abroad Option: Yes - subject to availability
Placement Option: No
Mature Applicants: See p. 156
QQI Link: No
UK, EU & International Applicants: See p.159

Leaving Certificate: 2H5 & 4O6/H7, Irish, English & a Science subject (i.e. Agricultural Science, Applied Mathematics, Biology, Chemistry, Computer Science, Physics, or Physics with Chemistry) & O4/H7 Mathematics

Degree Overview

- > This degree will appeal to students who are passionate about understanding astrophysical phenomena. It is based on the Single Major degree in Experimental Physics but with an increased emphasis on studying the physical principles needed to understand astronomical objects such as planets, stars and galaxies, as well as the dynamics of the Universe as a whole.
- > Study the latest telescopes, satellites, detector technology and data analysis techniques used to make the exquisitely sensitive observations needed in modern astrophysics. Facilities include state-of-the-art laboratories, an observatory with a computerised Meade telescope, an atmospheric physics facility, and radio and cosmic ray telescopes.
- > Students receive an excellent grounding in all the core areas of Experimental Physics, opening up all the career opportunities available to physicists. Field trips and scientific visits are organised to other facilities such as L'Observatoire d'Haute Provence (France), the European Space Agency (the Netherlands), Jodrell Bank (UK), St. Luke's Hospital and Armagh Observatory.
- > There is a potential transfer pathway from first year BSc MH201 to second year MH204 BSc Physics with Astrophysics. Places are limited and are based on first year results. See p. 67.

After Graduation

- > Physicists and astrophysicists find employment in high-tech fields and in areas where analytical and problem-solving skills are valued. Graduates have progressed to roles at Met Éireann, St. Luke's Hospital Dublin, the European Space Agency, NASA, Caltech, Intel, Hewlett Packard, and the Jet Propulsion Laboratory.
- > Astrophysicists can find challenging and rewarding careers in astrophysics and also in fields such as medical physics, computational physics, forensic science, meteorology, environmental and atmospheric physics.
- > The University has a long tradition of excellence in Physics and Astrophysics. Students who do sufficiently well are eligible to undertake research for an MSc or PhD degree under the supervision of one of the members of academic staff, who run active research programmes in these areas. This option is especially suitable for those wishing to pursue research careers, either in industry or academia.

BSc Biomedical Science

CAO Code: **MH205** | CAO Points 2025: **NEW in 2026**

Places: 70
Duration: 4 years

Erasmus/Study Abroad Option: Yes
Placement Option: No
Mature Applicants: See p. 156
QQI Link: See p. 156
UK, EU & International Applicants: See p. 159

Leaving Certificate: 2H5 & 4O6/H7, Irish, English & Science subject (one of Agricultural Science, Biology, Chemistry, Computer Science, Physics, or Physics with Chemistry) & O4/H7 in Mathematics

Degree Overview

- > **Biology is the study of life, from the fundamental building blocks of our genes to the largest animals that inhabit our planet; how living things work – how they interact with one another and their surroundings, and how they change and evolve; and it involves the application of biomedical science to clinical research. Biomedical science seeks to understand disease processes and how new therapies might be developed. It seeks to utilise fundamental biological knowledge to advance clinical research.**
- > **Students learn how to use analytical and technical procedures to monitor and improve human health and to investigate disease processes. The degree is broadly similar to the pre-clinical component of a medical degree.**
- > **Students also learn how to ask questions, make observations, and analyse evidence – in theory work and through practical laboratory sessions – and to present and communicate findings clearly while developing computer literacy and research skills.**
- > **The main strengths of the Department include, Bioinformatics, Cancer Biology, Cell Biology, Immunology, Medical Mycology, Microbiology and Molecular Genetics and staff have international reputations and expertise in these areas.**
- > **Students enjoy the opportunity to study a Bachelor of Arts subject in first year such as Economics, Spanish or Anthropology. Alternatively, students can choose a Bachelor of Science subject.**
- > **There is a potential transfer pathway from first year BSc MH201 to second year BSc Biomedical Science MH205. Places are limited and are based on first year results. See p. 67 for details.**

After Graduation

- > Upon graduation many students obtain employment in the Pharmaceutical or Life science industries. Students also enrol in taught Masters courses in a variety of areas such as Biotechnology, Molecular Medicine, Immunology or Microbiology. Students also pursue research degrees (MSc or PhD) in fundamental science or clinical research. The BSc in Biomedical Science does not provide the qualification required to work as a Medical Scientist in a hospital diagnostic laboratory.

BSc Theoretical Physics and Mathematics

CAO Code: **MH206** | CAO Points 2025: **520**

Places: 10
Duration: 3 years

Erasmus/Study Abroad Option: Yes - subject to availability
Placement Option: No
Mature Applicants: See p. 156
QQI Link: No
UK, EU & International Applicants: See p. 159

Leaving Certificate: 2H5 & 4O6/H7, Irish, English & a Science subject (i.e. Agricultural Science, Applied Mathematics, Biology, Chemistry, Computer Science, Physics, or Physics with Chemistry) & H2 Mathematics

Degree Overview

- > Study the entire physical world from the microscopic to the cosmic - topics such as black holes, the Big Bang, quantum computing, elementary particles and the fundamental forces of nature, superconductivity, neural networks, matter in extreme conditions, and simulation of physical and biological systems.
- > Students develop a deeper understanding of the various areas of modern mathematics, including analysis, algebra, geometry, and topology.
- > This accelerated three-year programme is designed for students with a very strong interest in theoretical physics and mathematics. Theoretical (Mathematical) Physics and Mathematics are studied throughout the three years of the programme.
- > Understand how mathematical science underpins key areas of human endeavour and industry, from engineering to construction to economics, software development to space travel.
- > Learn how to think hard and rigorously about mathematical questions and the fundamental theories of physics.

After Graduation

- > Theoretical physicists and mathematicians are suitable for a wide range of occupations, not only in high-tech fields, but also in areas where analytical and problem-solving skills are valued.
- > Graduates may consider careers in research and development, computing and software engineering, electronics, telecommunications, semiconductors, banking, finance, management and teaching, to name a few.

- > Graduates are prepared for research in Mathematics and Theoretical Physics and their applications in science and technology. Many of our graduates move on to postgraduate study and research at our university or major international universities.
- > The Maynooth University MSc in Theoretical Physics and Mathematics is a popular option.

BSc Computational Thinking p. 102

Mathematical Physics p. 74

BSc Mathematics (with Education) p. 144

BSc Physics with Astrophysics p. 138

Course Structure

- > Accelerated 3-year degree
- > Students enter directly into the 2nd year of the standard 4-year Mathematical Physics programme, and take a more challenging Mathematics programme beginning in first year
- > Students concentrate on Theoretical Physics and Mathematics for each of the 3 years of the degree
- > Given the accelerated nature of this programme, a H2 grade in Leaving Certificate Mathematics is required for entry. You require 50% in Maths (Pure) to proceed to 2nd year. You continue with Mathematical Studies in 2nd year if you attain less than 50%

Sample Modules

1st year

- > Relativity
- > Electromagnetism
- > Thermal physics
- > Analysis
- > Linear algebra
- > Multivariable calculus

2nd year

- > Quantum mechanics
- > Statistical mechanics
- > Computational physics
- > Real and complex analysis
- > Group theory
- > Rings and fields

Final year

- Students take 60 credits from modules in Theoretical Physics and Mathematics. The 60 credits can be divided between the two subjects with at least 20 credits in each subject.
- > Advanced electromagnetism
 - > General relativity
 - > Quantum information processing
 - > Topology
 - > Differential geometry
 - > Number theory

BSc Data Science

CAO Code: **MH207** | CAO Points 2025: **425**

Places: 10
Duration: 4 years

Erasmus/Study Abroad Option: No
Mature Applicants: See p. 156
QQI Link: No
UK, EU & International Applicants: See p. 159

Leaving Certificate: 2H5 & 4O6/H7, Irish, English & a Science subject (one of Agricultural Science, Applied Mathematics, Biology, Chemistry, Computer Science, Physics, or Physics with Chemistry) & O1/H5 Mathematics

Degree Overview

- > **Data Science is the science of collating, managing, analysing, visualising and understanding data. It is key to unlocking the hidden wisdom that is stored in the vast amounts of data available in today's world.**
- > **Data Science students take Statistics, Computer Science and Mathematics and crucially will learn to appreciate the overlap between eliciting valuable information from data through statistical reasoning and managing databases via complex manipulations.**
- > **If you want to play a central role in solving the world's critical problems through data, or play an influential role in developing the next generation of Artificial Intelligence, then this degree programme is for you.**
- > **By choosing this degree students become equipped with tools to collect and manage large volumes of raw data, to develop statistical models and understand their mathematical underpinnings, and to unlock valuable information stored within local, national and global datasets. In other words, they become exceedingly data literate!**
- > **There is a potential transfer pathway from first year BSc MH201 to second year MH207 BSc Data Science. Places are limited and are based on first year results. See p. 67.**

After Graduation

- > Data literacy is one of the most highly sought after skills by employers in today's data driven world, be it in business, science, health or social sciences and as such, graduates with data science skills are in high demand and are extremely attractive to employers.

- > Graduates have the power to make the world a better place through channelling their analytical skills to solving global problems such as climate change, developing new drugs or eliminating world hunger.
- > Employment opportunities across a wide range of fields (science, health, business etc.) are abundant for graduates of this degree programme.
- > The Department offers a range of postgraduate study options.

BSc Psychology (through Science)

CAO Code: **MH209** | CAO Points 2025: **488**

Places: 23

Duration: 4 years

Erasmus/Study Abroad Option: Yes - subject to availability

Placement Option: Yes – research internship & work placement (subject to availability)

Mature Applicants: See p. 156

QQI Link: See p. 156

UK, EU & International Applicants: See p. 159

Leaving Certificate: 2H5 & 4O6/H7, Irish, English & Science subject (one of Agricultural Science, Biology, Chemistry, Computer Science, Physics, or Physics with Chemistry) & O4/H7 in Mathematics

Degree Overview

- > This degree is accredited by the Psychological Society of Ireland (PSI).
- > Psychology is the scientific study of mental life and behaviour. It involves topics such as Brain and Behaviour, Social Psychology, Cognitive Psychology, Developmental Psychology and Psychological Research Methods.
- > In third year, students spend one semester on a research internship, and have the option of spending one semester on work placement or studying abroad (all subject to availability).
- > This degree is for students who are interested in studying the human mind and behaviours with the rigours of scientific testing.
- > Students use research methods including observation, measurement, hypothesis testing, experimentation, logical inference and statistical analysis.
- > For those who wish to pursue a career as a professional psychologist, this PSI-accredited degree opens up a variety of further study options and career paths.

After Graduation

- > A variety of career paths are available, both within and outside psychology: for students who aim to pursue a career as a professional psychologist, an undergraduate degree is the first stage in professional training that will require an additional two to six years of study and supervised experience.
- > Examples of professional psychologists include:

- Clinical Psychologists who provide comprehensive mental and behavioural health care across the lifespan.
- Educational Psychologists who promote better understanding of children's and young people's strengths and needs, and support and enhance school's systems.
- Organisational Psychologists who identify solutions to problems that improve the well-being and performance of organisations and their employees.
- > A variety of career paths outside of psychology are also open to graduates. Some graduates choose to pursue postgraduate conversion courses in different fields of interest.

BSc Pharmaceutical and Biomedical Chemistry

CAO Code: **MH210** | CAO Points 2025: **441**

Places: 24
Duration: 4 years

Erasmus/Study Abroad Option: Yes - subject to availability
Placement Option: Yes - subject to availability
Mature Applicants: See p. 156
QQI Link: See p. 156
UK, EU & International Applicants: See p. 159

Leaving Certificate: 2H5 & 4O6/H7, Irish, English & Science subject (one of Agricultural Science, Biology, Chemistry, Computer Science, Physics, or Physics with Chemistry) & O4/H7 in Mathematics

Degree Overview

- > In this programme you will receive an excellent education in a range of different aspects of Chemistry, with a focus on Pharmaceutical and Biomedical Chemistry and Biology.
- > Chemistry is taken with: Mathematics, Biology and one other Science subject in first year, with Biology and Mathematics or an Elective in second year and with Pharmaceutical and Biomedical Chemistry and Biology in third year.
- > In fourth year you will have the opportunity to undertake a six-month work placement/internship (subject to availability). This provides an insight into the working environment of a professional chemist and helps graduate career prospects.
- > This innovative programme develops skills in problem-solving, communication, scientific writing and presentation – all highly valued in the workforce. These transferable skills help provide employment opportunities in chemistry and non-chemistry based careers.
- > If you are interested in the areas of chemistry that are important for the pharmaceutical and biomedical industries, then this is the degree for you.
- > There is a potential transfer pathway from first year BSc MH201 to second year MH210 BSc Pharmaceutical and Biomedical Chemistry. Places are limited and are based on first year results. See p. 67.

After Graduation

- > The pharma-chemical industry in Ireland employs more than 26,000 people and produces over €100bn in annual exports. Chemists work in a wide range of companies, from pharmaceutical and biotechnology companies to cosmetics and medical devices firms, as well as in the agricultural, food and drinks sector. Their roles include laboratory-based quality control, research and development, manufacture support or regulatory positions.
- > Postgraduate study options include: Research MSc and PhD in Chemistry.

BSc Science or BSc Mathematics and Computer Science or BSc Mathematics (with Education)

CAO Code: **MH212 SED or MCS or MED** | CAO Points 2025: **420**

Places: 65 (MH212)

Duration: 4 years + 1 year postgraduate study

Erasmus/Study Abroad Option: No

Placement Option: Placement is required

Mature Applicants: See p. 156

QQI Link: No

UK, EU & International Applicants: See p. 159

Leaving Certificate: 2H5 & 4O6/H7, Irish, English & Science subject (one of Agricultural Science, Applied Mathematics, Biology, Chemistry, Computer Science, Physics, or Physics with Chemistry) & O4/H7 Mathematics*

OPC (Open Choice Option):

Up to 4 weeks to decide on MH212 degree stream (entry requirements apply)

*Students admitted to MH212 are required to have H4 Mathematics to register for MCS or MED.

Note: An offer of a place on this course is subject to a satisfactory background check by the National Vetting Bureau.

Degree Overview

There are three MH212 streams – students choose one stream and have up to four weeks following registration to decide.

> **MH212 SED:** If you are interested in a career as a second-level science and/or mathematics teacher, this may be the degree for you.

> **MH212 MCS:** If you are interested in a career as a second-level mathematics and computer science teacher, this may be the degree for you.

> **MH212 MED:** If you are interested in a career as a second-level mathematics and applied mathematics teacher, this may be the degree for you.

> **Students take a five year route to second-level teaching studying a four-year Science/Mathematics/Computer Science degree, while also completing 60 credits in Education.**

> **After four years, students are awarded a BSc Science (with Education) or BSc Mathematics and Computer Science (with Education) or BSc Mathematics (with Education) degree – a level 8 honours degree. Students now have two pathways open to them:**

1. Students can choose to exit their studies with their level 8 qualification and take a different path in their education or career.

OR

2. Students can continue with their studies to become a fully qualified teacher. This means they complete one further year of study at postgraduate level - necessary to meet the Teaching Council requirements to be registered as a Newly Qualified Teacher (NQT) in two subjects. Having graduated with their level 8 degree, students are guaranteed their place in this postgraduate year.

> **At the end of year five of your studies, you will have achieved, in addition to your level 8 higher degree, a level 9 professional masters qualification:**

- **MH212 SED:** You will be a fully qualified second-level science or science and mathematics teacher, recognised by the Teaching Council to teach up to Leaving Certificate level.

- **MH212 MCS:** You will be a fully qualified second-level mathematics and computer science teacher, recognised by the Teaching Council to teach up to Leaving Certificate level.

- **MH212 MED:** You will be a fully qualified second-level mathematics and applied mathematics teacher, recognised by the Teaching Council to teach up to Leaving Certificate level.

- **Through this pathway students are fully qualified after five years rather than taking the six year route (details of the six-year route are outlined in the next bullet point below).**

> **An alternative six-year route to second-level teaching is available. Students can take the BSc Bachelor of Science degree (MH201) for four years and then apply for a place on the Level 9 Professional Master of Education degree. The PME is a two-year, full-time programme designed to qualify graduates to teach at second level. Entry to the PME is competitive and is not guaranteed to graduates of the BSc Bachelor of Science degree.**

After Graduation

> **MH212 SED:** depending on the subjects chosen during the course of the degree, graduates will be in a position to teach any two of the following subjects to senior cycle level (HL): mathematics, biology, chemistry, physics.

> **MH212 MCS:** fully qualified second-level computer science and mathematics teacher up to Leaving Certificate level.

> **MH212 MED:** fully qualified second-level mathematics and applied mathematics teacher up to Leaving Certificate level.

> Graduates apply to the Teaching Council of Ireland for registration.

BSc Sport Science and Health

CAO Code: **MH221** | CAO Points 2025: **476**

Places: 35
Duration: 4 years

Erasmus/Study Abroad Option: No
Placement Option: Yes (subject to availability)
Mature Applicants: See p. 156
QQI Link: See p. 156
UK, EU & International Applicants: See p. 159

Leaving Certificate: 2H5 & 4O6/H7, Irish, English & O4/H7 Mathematics & O6/H7 Science subject (one of Agricultural Science, Biology, Chemistry, Computer Science, Physics or Physics with Chemistry)

Note: An offer of a place on this course is subject to a satisfactory background check by the National Vetting Bureau.

Degree Overview

- > **The BSc Sport Science and Health is based on the core scientific disciplines of sport and exercise science including physiology, psychology, biomechanics, coaching and strength and conditioning. It considers three core questions; how do we respond to the different types of exercise, how can we maximise the effects of training, and how can physical activity and exercise reduce and prevent disease and injury?**
- > **This programme focusses on the value of exercise and sport for the enhancement of health, for the high performing athlete and in the case of the general population, to help with specific health concerns for the ill, the aging, or those recovering from injury. With the future of exercise as a clinical intervention, this programme provides a strong scientific foundation for career development in this area.**
- > **Students will develop a strong scientific basis in the area of the life sciences, nutrition, and the sport and health sciences specifically. Students will also learn the scientific basis of sport performance and how the body reacts and adapts to exercise and physical activity. This will provide students with graduate opportunities in both the sport science sector and in the broader health and life science sector.**
- > **Data is increasingly being used in sport science, enabling personalised exercise interventions to improve health and performance. This programme provides a strong data science component, including data analytic techniques, to equip our students with the skills needed to use data fully for group training and personalised exercise interventions.**
- > **Work placement: The opportunity to undertake a 6-month work placement (subject to availability), in Ireland or abroad. As an integral part of the degree, this gives students the opportunity to put learning into practice in a professional setting and significantly improves graduate employability.**

After Graduation

- > The sports, exercise and well-being sectors are some of the largest service industries in Ireland and globally - ranging from small to large enterprises. In addition, professional and amateur sporting bodies are some of the largest community-based activities in any region. Each of these activities benefit from professionals who understand the science of sport, exercise, and physical activity to improve health and performance, and develop new products and services to support athletes and the general population.
- > Graduates will be suitably qualified to gain employment in the sports, exercise, health, and well-being sectors, which may include:
 - High performance coach
 - Health promotion
 - Product and service development in sports and exercise
 - Community health and fitness professional
 - Sports coach with a club or within the community
- > Sport Science and Health graduates may also be interested in further study in the area of healthcare, such as physiotherapy and sports psychology.
- > With the strong scientific foundation, students will also be highly employable in other careers in the life sciences and health sector.
- > Careers in research are also possible for Sport Science graduates who may pursue research opportunities at Masters and PhD level.

BSc Food Science and Human Nutrition

CAO Code: **MH222** | CAO Points 2025: **442**

Places: 25
Duration: 4 years

Erasmus/Study Abroad Option: No
Placement Option: Yes (subject to availability)
Mature Applicants: See p. 156
QQI Link: See p. 156
UK, EU & International Applicants: See p. 159

Leaving Certificate: 2H5 & 4O6/H7, Irish, English & O4/H7 Mathematics & O6/H7 Science subject (one of Agricultural Science, Biology, Chemistry, Computer Science, Physics or Physics with Chemistry).

Degree Overview

- > The BSc Food Science and Human Nutrition degree provides students with a broad science-based education, with specialist content on the future of food development and production, safety and quality assurance, food chemistry, human nutrition, the role of food and healthy living, the science of sensory perception and how we experience food, the future of food in a diverse society and the social and global challenges around food security.
- > In third year students have an opportunity to undertake a work placement (subject to availability), in Ireland or abroad, putting learning into practice. Given the diversity of businesses in this sector, ranging from food production to assurance to development, there are opportunities to apply learning in areas to suit all interests. As an integral part of the degree, this work placement opportunity significantly improves graduate employability.
- > The degree programme explores the future of food, from superfoods that address particular health concerns, to the challenges around obesity, allergies, food security and sustainability. This will give a unique perspective to anyone interested in future food product development.

After Graduation

- > The food sector is Ireland's largest industry with a turnover exceeding €25 billion, sustaining over 230,000 jobs. It consists of a range of companies from major multinationals to niche food suppliers, with a reputation internationally for quality, sustainability, and innovation.
- > The global food industry is currently facing unprecedented challenges – with changing dietary habits, food security with dispersed supply chains, demands for low-carbon production, as well as functional foods. In Ireland, the focus is shifting from raw ingredients to value-added product development, increasing demand for a skilled workforce across production, handling, and food innovation.

- > This programme is designed to support careers in both large multinational companies and small custom businesses, as well as exploring the social policy aspects. It will support roles as diverse as product development, public health, food quality assurance and safety. As one of Ireland's largest sectors, graduates are in high demand in all of these areas.
- > Graduates of this programme will be able to take up roles in production management, nutrition, food quality and safety, new product development and research, sales and marketing. There are also opportunities for employment in the public sector such as in the Department of Agriculture, Food and the Marine, and Teagasc or in health-focused charities.
- > The programme is an excellent preparation for progression to accredited postgraduate programmes in the area of Dietetics, as well as other postgraduate opportunities in the area of public health and social policy.
- > There are opportunities for students to undertake research degrees, at Masters and PhD level in a variety of topics in the area of food science and nutrition.

Course Structure

1st year

> Food & Nutrition, Biology, Chemistry, and Mathematics

2nd year

> Concentrate on Food & Nutrition, Biology and Chemistry
> Optional 10 credit Elective (see p. 14 for details)

3rd year

> Focus mainly on Food Science and Nutrition
> Second semester includes work placement (subject to availability) or other forms of experiential learning

Final year

> Concentrate on advanced topics in Food Science & Nutrition
> A capstone project

Sample Modules

1st year

> Food, Diet and Health
> Food, Physiology & Exercise
> From Cell to Organism
> Biological Function & Diversity
> General Chemistry

2nd year

> Introduction to Human Nutrition
> Energy & Metabolism
> Food Chemistry and Analysis
> Food – Trends, Challenges and Opportunities
> Biochemistry
> Molecular Biology of the Cell
> Organic Chemistry
> Physical Chemistry

3rd year

> Food Production Systems
> Food Choice - Taste and Flavour Perceptions
> Food Rheology, Texture and Structure of Food
> Food Microbiology
> Nutrition Across the Lifespan
> Nutrition for Health and Performance

Final year

> Nutrition & Global Health
> Personalised Nutrition
> Food Safety and Authenticity
> Food Marketing and Product Development
> Food Analysis and Quality Assurance
> Sports Nutrition and Pharmacology
> Functional and Sustainable Foods

BSc/BBA Business with Sport Science

CAO Code: **MH412** | CAO Points 2025: **455**

Places: 35

Duration: 3 years (4 years with optional placement or Erasmus/Stuay Abroad)

Erasmus/Stuay Abroad Option: Yes - subject to availability

Placement Option: Yes* - see Course Structure for details

Mature Applicants: See p. 156

QQI Link: See p. 156

UK, EU & International Applicants: See p. 159

Leaving Certificate: 2H5 & 4O6/H7, Irish, English & O4/H7 Mathematics

Degree Overview

- > **Maynooth University offers the only programme that allows students to combine a full business with sports science. This programme is for students who have a desire to work in the growing and diverse range of businesses in the area of sports, exercise and well-being.**
- > **The sports, exercise and well-being sector is one of the largest service industries in Ireland and globally. Ranging from small to large enterprises, many are run by sports-professionals. These businesses need graduates who can understand both the science and practicalities of the sports and exercise sector, and the fundamentals of how to create value and make a profit - via services and solutions that meet a variety of customers.**
- > **MH412 provides students with the unique option of combining Business with sports related content - from practical exercise skills to the science behind human performance and well-being.**
- > **In third year, students have an opportunity to undertake an accredited work placement (subject to availability), in Ireland or abroad, which gives students a chance to put learning into practice and which significantly improves employability upon graduation. Given the diversity of businesses in this sector, many run by those without formal business training, people with both business and sports science knowledge are highly attractive with many opportunities.**

- > Many enjoy sporting activities but sports and exercise are well known to have mental and physiological benefits. In combination with the business modules, this programme will allow students to understand how sports and exercise can impact on health, allowing graduates to explore how this can be translated to new services and solutions.
- > Graduates typically join large multinational employers in graduate programmes, public service, or in small and medium sized organisations where you are able to work on contributing to the businesses, domestically and globally. The addition of sports science will allow graduates to access opportunities in the sports and exercise market. That could be from small local enterprises to large companies that operate sporting enterprises or that supply services to the sports, exercise and health sectors.
- > Many of our students continue to further postgraduate study in a very wide range of Business subjects at Maynooth University.

After Graduation

- > This is a rapidly growing sector, with a deep demand for graduates that bridge the fields of business and sports - employees that have both a deep insight into how to create value for businesses (through business skills) and the science of sports exercise.

✉ business@mu.ie

Course Structure

1st year

You will take 30 credits of Business. This will provide you with foundational knowledge of your business subject. You will also take 15 credits of the sports science programme, and 15 credits of another first year subject (Groups 1, 3 or 4 - see p. 29).

2nd year

For business, second year is about learning the functional capabilities of your subject, including some optional choices. In addition you will take 20 credits of sports science modules.

Optional additional year

Work placement or study abroad year between 2nd and final year and graduate after the 4th year. (*The University will support you in the search for a placement job; however, the process is competitive. Students who choose to take the year 3 placement option will be required to undergo background check by the National Vetting Bureau in advance of this placement.)

Final year

In your business subject this is the year in which you will develop your understanding of the strategic aspects of running a business or service, as well as advanced skills in your chosen subject. This will be complemented by 20 credits of content from sports science.

Sample Modules

1st year

- > Business Models and Marketing
- > Organisational Behaviour and Management
- > Coaching Science and Performance 1
- > Introduction to Anatomy and Biomechanics

2nd year

- > Human Resource Management
- > Data Management Skills for Business
- > Physiological Measurement and Exercise Testing
- > Sports Injuries

Final year

- > Strategic Management
- > Social Media
- > Nutrition for Health and Performance
- > Exercise for Health

“The School of Nursing’s mission will be to cultivate compassionate, caring, competent, and innovative nurses who will shape the future of healthcare. This will be achieved by implementing a cutting-edge curriculum that actively promotes caring and compassion, combines scientific rigor with empathy, fosters inclusive pathways for diverse learners, promotes clinical excellence through community-based placements and research-driven practice, and supports staff development to inspire the next generation of nursing professionals.

The School will embrace interdisciplinary collaboration, digital health integration, and have a strong commitment to equity and inclusivity. Through this, it will have a transformative impact on healthcare delivery, research, and education, while also contributing to the growth and success of Maynooth University and the broader community.”

Professor Fintan Sheerin
Founding Head, School of Nursing
Maynooth University

MH701	BSc General Nursing	150
--------------	---------------------	-----

BSc General Nursing

CAO Code: MH701 | CAO Points 2025: New Course

Places: 50
Duration: 4 years

Erasmus/Study Abroad Option: No
Placement Option: Yes – required*
Mature Applicants: See p. 156
QQI Link: Yes – see p. 156
UK, EU & International Applicants: See p. 159

Leaving Certificate Applicants: 2H5 & 4O6/H7, Irish, English, Mathematics, Science subject (one of Agricultural Science, Biology, Chemistry, Physics, or Physics with Chemistry)

* The programme comprises of 50% theory and 50% placement in community and hospital settings. Applicants should be aware that the range and geographical spread of placement sites will require them to travel for practice placements at all stages of the programme.

Note: All applicants offered a place will be required to have medical screening at different points in the programme. This will include medical assessment, screening and, if necessary, vaccination prior to the first clinical placement. All applicants offered a place will require a background check by the National Vetting Bureau, and must meet the Garda vetting requirements of MU. Applicants may also be required to provide an enhanced disclosure through the completion of an affidavit at the time of registration. Entry to this programme is subject to the MU Fitness to Study/Practise policy. Fitness to practise means having the necessary skills, knowledge, health and character to undertake and complete the programme, safely and effectively. The academic year for this programme extends into June. Practice placement will normally finish in the last week of June.

Degree Overview

Our innovative programme integrates theory, skills practise and practice placements. It aims to prepare competent graduates who are confident in their ability to deliver person centred, safe, compassionate, evidence-based, effective and high-quality care across diverse healthcare settings. Our School's goal is that on completion of the programme our nursing graduates are flexible and adaptable, capable of working in rapidly changing healthcare contexts and settings, critical thinkers and future leaders with capacity to effect change to positively benefit patient care and health care.

MU nursing students will:

- > Complete a cutting-edge programme designed to meet Ireland's growing population and changing healthcare requirements.
- > Be taught by experienced educators and health professionals who work across a variety of healthcare disciplines, settings and research fields.
- > Take a programme that actively promotes person-centredness and prioritises clinical excellence using innovative learning and teaching approaches.
- > Gain hands-on practice experience across a diverse range of community and hospital clinical settings.

> Learn in a state-of-the-art learning environment with access to a comprehensive range of academic and personal resources to support their learning.

> Complete a degree that will prepare them to work in a variety of practice settings, including hospital and integrated care settings.

After Graduation

Successful completion of the degree programme leads to eligibility to register as a general nurse with the Nursing and Midwifery Board of Ireland. Registered General Nurses have wide-ranging employment opportunities in Ireland, across the EU and beyond. Most graduates opt to consolidate their learning by working as a staff nurse in a hospital or community setting. Many go on to complete further studies in their chosen specialism, for example, community, emergency or palliative care nursing. There are also opportunities to work in different care settings within and outside the HSE, including charities such as Enable Ireland, Simon and many others. With experience and further study, opportunities for advancement include advanced nurse practitioner, clinical nurse specialist, nursing management or nursing education.

Contact Us

Maynooth University School of Nursing, Eolas Building

🖱 www.maynoothuniversity.ie/nursing

✉ nursing@mu.ie

Course Structure

1st year	2nd year	3rd year	4th year
Year 1 begins with a focus on health, the social determinants of health, normal anatomy and physiology, normal ageing, health and social care in community and older persons care settings and the role of the general nurse in these contexts. Most credits (37.5) are allocated to nursing theory and practice modules. The balance (22.5 credits) is allocated to modules (e.g. health psychology, sociology, geography) which broaden students' understanding of health and how people's environments impact their health. Practice placements will be in older persons and community settings.	The nursing management of acutely and chronically ill individuals is the major focus in Year 2, in tandem with a focus on health promotion. Placements echo this focus with clinical placements in medical, surgical, emergency and theatre settings. Students will also complete specialist placements in maternity and childcare this year. Again, most credits (45) are allocated to nursing theory and practice modules. The balance (15 credits) is allocated to modules (e.g. anatomy, pharmacology, health psychology) focused on broadening students' understanding of people's responses to, and ways of coping with ill-health.	The goal for Year 3 is to facilitate students to integrate and further develop their knowledge and skills. Nursing theoretical content (35 credits) addresses areas such as enhanced person-centred assessment and care planning, recognising and responding to patient clinical deterioration, clinical decision making, managing a caseload, and leadership and management. The balance (25 credits) is focused on modules supporting this learning, including modules on ethics, legal issues, leadership, social policy and pharmacology. Practice placements this year are in medical, surgical and mental health settings.	In their final year (Year 4) students will complete 36 weeks of internship (45 credits). Internship will afford students the opportunity to build their confidence and consolidate their knowledge and skills for caring across the health spectrum and in diverse settings. Students will take a module focused on supporting their transition to practitioner and complete a clinical research project with the support of a lecturer (15 credits).

Sample Modules

1st year	2nd year	3rd year	4th year
> Essential Knowledge and Skills for Nursing Practice 1 > Developing Nursing Practice: Working in Community Settings > An Introduction to Health Psychology for Nursing > Geography of Health > Blended Simulated Practice Experience > Practice Learning Placement 1: Older Persons > Practice Learning Placement 2: Community	> Developing Nursing Practice: Supporting Patients through Acute Illness > The Human Body in Health and Illness 2 > Social Practices of Health and Illness > Practice Learning Placement 3: Medical + Emergency Department > Practice Learning Placement 4: Surgical + Theatre > Practice Learning Placement 5: Maternity + Childcare and Paediatrics	> Essential Knowledge and Skills for Nursing Practice 3 > Ethics in Nursing Practice: Navigating Principles, Dilemmas, and Decision-Making > Legal Issues for Professional Practice > Nursing Management and Leadership > Practice Learning Placement 6: Medical > Practice Learning Placement 7: Surgical > Practice Learning Placement 8: Mental Health	> Transition to Practitioner > Clinical Research Project > Internship (36 weeks)

LEAVING CERTIFICATE APPLICANTS

APPLYING THROUGH THE CENTRAL APPLICATIONS OFFICE (CAO)

If you are under 23, and sitting the Leaving Certificate in 2026, you must apply for your choice of level 8 bachelor's degree through the Central Applications Office (CAO). All applicants (except EU occasional and non-EU students) must apply through the Central Applications Office.

Apply online at www.cao.ie or request details from:

Central Applications Office, Tower House, Eglinton Street, Galway
☎ + 353 91 509800

The main deadline for submission of applications is 1st February 2026, and you may apply from early November 2025. A standard fee applies (apply by January 20th for a reduced fee). Late applications are accepted up to 1st May 2026, on payment of an additional fee, however certain degree courses are no longer available for application at this stage. See restricted-application courses opposite for more details. A change of mind facility is available up to 1st July 2026.

On your CAO application you are invited to enter your choice of courses in 'order of preference'. It is essential that you list your selected courses in order of choice. Put your first choice in the number one position, followed by your second and third choice, and so on. The University offers places to applicants in order of merit, once they meet the minimum entry requirements (see page 5-7 for details). The order of merit is calculated based on a points system. Places are allocated to applicants with the required points according to their list of CAO preferences, with applicants who meet the points requirements being offered their course in order of preference. For this reason it is essential that you list your CAO course choices in your genuine order of preference. The University distinguishes between applicants who have equal points by appending a randomly generated number to each score. The combined score/random number is the final determinant of position in the order of merit (this is called Random Selection).

AGE RESTRICTIONS

In general, students must be 17 years or older by 15th January in the year after entry to the University. If you are younger, you must make a special application to the University's President. A mature student is someone who is 23 years or older by 1st January in the year of entry to the University. For part-time degrees the mature age is 21 by the 1st January in the year of entry. For more information on applying as a mature student see page 156.

LEAVING CERTIFICATE VOCATIONAL PROGRAMME (LCVP) LINK MODULES

Points are awarded as follows:

Distinction	Merit	Pass
66	46	28

Applicants can use their points allocation for the Link Modules as one of their best six subjects for the purpose of calculating points, but the Link Modules do not qualify as a subject for minimum entry requirement purposes.

CAO POINTS SYSTEM

Irish Leaving Certificate subjects – scan QR code for grades and points awarded at higher and ordinary level.

All Leaving Certificate subjects carry equal points with the exception of *Mathematics (details below). Points are awarded for your six best subjects in any one year. These do not have to include subjects needed to meet general minimum entry requirements. Minimum entry requirements and course requirements may be satisfied by an accumulation of subjects over more than one year. As well as achieving the required points, you must have a minimum of six subjects in your Leaving Certificate, with two Higher Level subjects at grade H5 and four Ordinary or Higher Level subjects at grade O6/H7.

The requirements for each course are shown in the table on pages 5-7.

* 25 bonus points are added to the points score for a Leaving Certificate Higher Level Mathematics grade H6 or higher. The bonus points are included in the overall points calculation only when Mathematics is one of the applicant's best six subjects following the addition of the bonus.

NUI LANGUAGE EXEMPTIONS

Maynooth University, along with many other universities, have language general entry/matriculation requirements. Before applying for any course it is important to check the minimum entry requirements on the website and also set out on page 5-7 of this prospectus. If you do not meet these requirements and you believe you may be entitled to an exemption, you should make an application to the NUI (National University of Ireland) without delay.

Typically, it takes 2-3 weeks (approximately) for Exemption Application Forms to be processed by NUI, but it may be longer. Applicants should review their CAO account to ensure it accurately reflects the exemptions required.

Please note that this refers to an exemption from minimum entry requirements only. Where a course has a specific requirement for a certain grade in Irish, for example, MH001 BEd Bachelor of Education - Froebel Primary Teaching, an NUI exemption will not meet this requirement. **Visit www.nui.ie for all the most up-to-date information about exemptions.**

CAO RESTRICTED-APPLICATION COURSES 2026

MH103 and MH116 are restricted-application courses at Maynooth University and have assessment procedures which may commence as early as February 2026. Selection for these restricted-application courses is on the basis of one, or a combination of, a written exercise/interview/online video audition, as well as meeting any matriculation requirements. Please see degree course pages for details.

An application for a restricted-application course will not be considered unless it has been included among your original course choices by 1st February (in some cases a restricted-application course can be added up to 1st March - see www.cao.ie for details). Restricted-application courses which are included in Late Applications are invalid choices and will not be considered.

If you have a disability or specific learning difficulty (e.g. dyslexia), and require support for any written assessments, you must complete the online request form and submit supporting documentation by 15 March 2026. Applications for alternative examination accommodation cannot be considered after this deadline.

Contact Maynooth Access Programme for more details.
www.maynoothuniversity.ie/access-office

WIDENING PARTICIPATION

ENTRY 2026

The Maynooth Access Programme (MAP) actively promotes access to higher education, and provides a number of initiatives to remove barriers, and to create realistic expectations for educational progression among schools, parents, adult learners and communities who are historically furthest away from higher education.

Under-represented groups include students from socio-economically disadvantaged backgrounds, mature students and students with disabilities. MAP provides information on access routes to higher education and a range of personal, academic and financial supports that enable students to become independent learners, thereby easing the transition from school to university, and from university to career.

The supports for all MAP students include a MAP Academic Advisor in every Department, an extended orientation throughout the first semester (MAP My Way), and technology training to introduce useful educational apps and tools.

Visit the Access Office online to find out about the entry routes and the supports available through MAP at www.maynoothuniversity.ie/access-office

TACKLING EDUCATIONAL DISADVANTAGE

School leavers, from long-term socio-economically disadvantaged backgrounds, who are resident in the Republic of Ireland, can apply through the CAO to the Higher Education Access Route (HEAR), which offers places on reduced points at Maynooth University. HEAR entrants receive extra college support through MAP (the Maynooth Access Programme) that is personal, academic and financial in nature, and designed to promote confidence and independence, as well as opening up employment prospects. HEAR supports include a dedicated MAP Student Advisor and financial and technology supports.

For more information on HEAR, please visit www.accesscollege.ie/hear.

Maynooth University strives to create an inclusive campus community where all students have the same opportunities to learn, socialise, participate and progress.

MATURE STUDENTS

Maynooth University is the leading institution in the country for welcoming and encouraging mature applicants, and in providing a learning environment that is supportive and inclusive of mature students. A mature student is a person who is at least 23 years of age on January 1 of their year of entry, and there is no upper age limit. Maynooth University greatly values the particular contribution of mature students to the academic and social environment of the University, and reserves up to 10% of places on all undergraduate programmes for mature students. Currently up to 200 mature students begin their studies here each year.

Supports for mature students include summer academic skills courses, preparatory courses with guaranteed progression to degrees, advice and guidance on the application/selection process, MAP Academic Advisors and MAP Student Advisors. For more information on the mature entry route, see page 156 and contact the Mature Student Office at www.maynoothuniversity.ie/mature.

STUDENTS WITH DISABILITIES

MAP offers a range of supports to students with disabilities who comprise 8% of the student body at Maynooth, one of the highest participation rates in the country. Supports include a dedicated MAP Student Advisor, examination accommodations, Educational Support Workers (e.g. academic personal assistant, note taker or sign language interpreter), Student Central academic support programme, work placement supports and technological supports. Students can apply for disability support under any of following disability categories: autism spectrum disorders, ADD/ADHD, blind or low vision, Deaf or hard of hearing, DCD/dyspraxia, mental health conditions, neurological conditions including brain injury and speech and language disabilities, significant ongoing illnesses, physical disability and specific learning difficulties including dyslexia and dyscalculia.

School leavers with a disability, who are resident in the Republic of Ireland, can apply through the CAO to the Disability Access Route to Education (DARE), which offers places on reduced points at Maynooth University. For more information on DARE, please visit www.accesscollege.ie/dare.

A Maynooth University student with a disability can apply for disability support at any time regardless of their entry route, but early registration is strongly recommended. Visit the Disability section for information on applying for support, the documentation required, the consultants/specialists that can verify a disability and the age limits on reports at www.maynoothuniversity.ie/disability.

Those applying for HEAR and/or DARE must be under the age of 23 as of 1 January 2026. There are other admissions routes for mature and QQI applicants. See p. 156 for more about these application routes.

APPLICANT WITH A DISABILITY: EXAMINATION SUPPORTS

If you have a disability or specific learning difficulty (e.g. dyslexia), and require support for any required written exercise/interview/online video audition which may form part of your application assessment (the relevant courses/applicant groups are listed below), you must complete an online request form and submit supporting documentation by 15 March 2026. Applications for alternative examination accommodation cannot be considered after this deadline.

- > **Restricted-application courses:** these courses (MH103 BMus and MH116 BSocSc Community and Youth Work) have early assessment procedures which apply to all categories of applicant (e.g. school-leavers, mature students).
- > **Mature students:** a written exercise/interview/online video audition may form part of the mature student application procedure.

For information see www.maynoothuniversity.ie/disability and www.maynoothuniversity.ie/matureapplicants

STEM PASSPORT FOR INCLUSION

The All-Ireland STEM Passport for Inclusion programme is a joint initiative by Maynooth University, Microsoft Ireland, Research Ireland, and the Department of Education that addresses inequalities with access to STEM careers among secondary school students in socially disadvantaged communities. The programme's innovative approach, which combines an educational qualification (level 6 NFQ), education supports, and mentoring from industry role models, provides a unique pathway for approximately 5,000 students to progress to 3rd level education and achieve a STEM qualification (having completed the STEM Passport for Inclusion).

Holders of Level 6 STEM Passport awards will be eligible to apply for concessions of up to 60 points for MH304, MH601 and MH602 Engineering and Computer Science degrees. Places will be awarded on a competitive basis. There is a quota of places in each degree and the places are awarded based on merit (i.e. points attained). Further details on the initiative and application process are available on the website.

www.maynoothuniversity.ie/all-institute/all-projects/stem-passport-inclusion

THINK ABOUT TEACHING FOUNDATION CERTIFICATE

The Think About Teaching Foundation Certificate is a one year, level 6 university preparation or access course for people who have an interest in primary teaching as a career path.

The course is run by Turn to Teaching staff from the Department of Adult and Community Education in partnership with the Froebel Department of Primary and Early Childhood Education, the Department of Education (secondary), Maynooth Access Office (MAP), and the MU Admissions and Student Recruitment Office.

The purpose of the Foundation Certificate course is to support students to critically reflect on their own educational stories both individually and collectively as they work through educational and career pathways. The course also prepares students for the academic, social and cultural opportunities and challenges of university study.

If you would like to receive updates on the developments for September 2026, please email the Turn to Teaching team on turn2teaching@mu.ie.

MATURE STUDENT APPLICANTS

MATURE STUDENT OFFICE

Maynooth University greatly values the particular contribution of mature students to the academic and social environment of the University. A mature student is 23 years or older by 1st January in the year of entry to the University. For part-time degrees the mature age is 21. There is no upper age limit; we currently have students who range in age from 23 to over 70. Up to 200 mature students begin their studies here each year. Many of our mature entrants undertake preparatory studies in advance of gaining admission.

The Mature Student Office is committed to supporting the learning experience of our mature students. A certain number of places are reserved for mature students on all undergraduate courses. We offer a range of supports for mature students including an advisory service, tailored information sessions during Orientation/Welcome Week, academic advisors, the Student Budgeting Advice Service and a technology skills programme. There is also a Mature Student Society on campus providing a continuation of peer support, both academic and social, to incoming mature students.

Call, email or drop in to meet us in MAP Lodge on the North Campus or to request a mature student information pack. If the opportunity to return to education has presented itself to you, we hope you'll choose Maynooth University.

Emer Sheerin, Mature Student Officer

☎ + 353 1 708 3307

✉ emer.sheerin@mu.ie

HOW TO APPLY

Mature applicants must apply through the Central Applications Office (CAO) before 1st February. Late applications for certain degree programmes from mature students may be accepted after this date. Visit the mature applicant section of the HOW TO APPLY webpages for information about the application process.

MH103 BMus & MH116 BSocSc COMMUNITY AND YOUTH WORK

Applicants who wish to apply to the following restricted-application courses BMus Bachelor of Music (MH103) or BSocSc Community and Youth Work (MH116) MUST apply before 1st February in order to be included in the written exercise/interview/online video audition. See page 153 for more about restricted-application courses and assessment supports. Please see degree course webpages for details about specific application procedures.

MH001/MH002 BACHELOR OF EDUCATION - FROEBEL PRIMARY TEACHING

Application must be made to the CAO prior to February 1st 2026. Candidates meeting the eligibility criteria will receive a supplementary application form from Maynooth University.

MH701 BSC GENERAL NURSING

Mature applicants must be 23 years or older by 1st January in the year of entry to the University. Applicants must apply to the CAO (www.cao.ie) by February 1st and satisfy the Nursing and Midwifery Board of Ireland (NMBI) as to their suitability based on assessment tests. Further information on the process and assessment tests is published on the NMBI website.

Visit our **HOW TO APPLY** webpages for more **Mature** and **QQI** applicant information.
www.maynoothuniversity.ie/howtoapply

QQI APPLICANTS

HOW TO APPLY - QQI APPLICANTS

If you have a relevant QQI or BTEC qualification, you can use this to apply to a full-time, undergraduate degree programme at Maynooth University.

Any QQI major award, with a minimum of five distinctions, fulfils the minimum entry requirements for admission to the University; however, due to the high demand for our courses, a higher number of distinctions is required for entry in many instances.

Some of our degrees and some of the subjects available in our degrees have additional minimum entry requirements or grade recommendations (required or recommended grade depends on the degree/subject). All details are set out on the HOW TO APPLY webpages www.maynoothuniversity.ie/howtoapply

A major award must be achieved. Component certificates do not suffice. While the major award may be achieved over a number of sittings, for scoring purposes, results achieved in a SINGLE SITTING are counted, i.e. between 1st August – 31st July.

Application is made through the Central Applications Office (CAO).

Apply online via www.cao.ie or by contacting:
Central Applications Office, Tower House, Eglinton Street, Galway.
☎ + 353 91 509800

There is a normal fee for applications received on or before 17:00, 1st February 2026 (apply by January 20th for a reduced fee). Late applications are accepted up to and including 1st May 2026 on payment of an additional fee. Applicants who wish to study restricted-application courses BSocSc Community and Youth Work (MH116) or BMus Bachelor of Music (MH103) must apply before the 1st February 2026.

All information regarding awards, scoring and any additional entry requirements for specific degrees is outlined on the HOW TO APPLY webpages.

We are currently reviewing QQI/FET entry requirements for all courses. These entry requirements are subject to change for entry 2026.

Please note that QQI/FET courses 5M21473 and 6M21471 will only be eligible for entry to MU degree courses MH003 and MH004 from 2026 entry.

**Note - New QQI link added for 2026 application:

BTEC

HIGHER NATIONAL DIPLOMA APPLICANTS

Holders of a BTEC Higher National Diploma, Extended National Diploma Award (180 credits) or OCR Level 3 Cambridge Technical Extended Diploma Award (180 credits) with Merit/Distinction Grade in any discipline, will be considered for admission to the first year of the MH101 Bachelor of Arts degree.

Applicants wishing to pursue any of the following honours bachelor's degree courses must present the appropriate award (these linked courses are listed under the various degrees below).

- > **MH107 BSocSc Bachelor of Social Science**
- > **MH109 BA Media Studies**
- > **MH201 BSc Bachelor of Science**
- > **MH403 BA Accounting and Finance**
- > **MH404 BBS/BBA Business and Management/International Business/Marketing/Business and Global Cultures**
- > **MH407 BBS/BBA Business and Accounting**
- > **MH409 BBA Business and Languages**
- > **MH410 BBS/BBA Finance (NEW)**
- > **MH411 BBS/BBA Entrepreneurship**
- > **MH412 BSc/BBA Business with Sport Science**
- > **MH416 BA International Economics**
- > **MH601 CSA BSc Computer Science and Software Engineering (through Arts)**
- > **MH601 MWA BSc Multimedia, Mobile and Web Development (through Arts)**
- > **MH602 CSS BSc Computer Science and Software Engineering (through Science)**
- > **MH602 MWS BSc Multimedia, Mobile and Web Development (through Science)**

Applicants will be graded on the best 6 modules in the second year.

For degrees that have a specific maths requirement, applicants must present Mathematics at Leaving Certificate level with a minimum grade of O4/H7 or must have a Distinction in a Mathematics or Statistics module or GCSE Grade B in Mathematics.

Application is made through the Central Applications Office (CAO). Please email BTEC results when received to ugadmissions@mu.ie, clearly stating the CAO application number.

MH101

- > BTEC Higher National Diploma
- > BTEC Extended National Diploma Award (180 credits)
- > OCR Level 3 Cambridge Technical Extended Diploma Award (180 credits)

Entry to the first year of the Bachelor of Arts Degree will be considered for holders of the above awards in all disciplines with Merit/Distinction Grade.

MH107

BTEC/OCR Awards

- > BTEC Higher National Diploma in Applied Social Studies/Social Care
- > BTEC Extended National Diploma Award in Applied Social Studies/Social Care (180 credits)
- > OCR Level 3 Cambridge Technical Extended Diploma Award in Applied Social Studies/Social Care (180 credits)

Entry to the first year of the Bachelor of Social Science degree will be considered for any of the above. Selection will be based on results.

MH109

BTEC/OCR Awards

- > BTEC Higher National Diploma in Media Studies/Media Production
- > BTEC Extended National Diploma Award in Media Studies/Media Production (180 credits)
- > OCR Level 3 Cambridge Technical Extended Diploma Award in Media Studies (180 credits)

Entry to the first year of the Bachelor of Media Studies degree will be considered for any of the above. Selection will be based on results.

MH201 SCIENCE

BTEC

- > BTEC Level 3 Extended Diploma in Applied Science

Entry to the first year of the Bachelor of Science Honours degree (MH201) will be considered for any of the above. Selection will be based on results. For degrees which have a specific maths requirement, applicants who do not have Mathematics at Leaving Certificate level with a minimum grade of O4/H7 must have a Distinction in a Mathematics or Statistics module or GCSE Grade B in Mathematics.

MH403 / MH404 / MH407 / MH409 / MH410 (NEW) / MH411 / MH412 / MH416

BTEC/OCR Awards

- > BTEC Higher National Diploma in Business (Mathematics required at Leaving Certificate level O4/H7 or distinction at minimum level 5)
- > BTEC Extended National Diploma Award in Business (180 credits)
- > OCR Level 3 Cambridge Technical Extended Diploma Award in Business (180 credits)

Entry to the first year of the listed Business degrees will be considered for any of the above. Selection will be based on results.

For degrees which have a specific maths requirement, applicants who do not have Mathematics at Leaving Certificate level with a minimum grade of O4/H7 must have a Distinction in a Mathematics or Statistics module or GCSE Grade B in Mathematics.

MH601 / MH602

BTEC

- > BTEC Higher National Diploma in Computer Science (Mathematics required at Leaving Certificate level O3/H7 or distinction at minimum level 5)
- > BTEC Extended National Diploma Award in Computing (180 credits)

Entry to the first year of the Bachelor of Computer Science & Software Engineering degree will be considered for any of the above. Selection will be based on results.

For degrees which have a specific maths requirement, applicants who do not have Mathematics at Leaving Certificate level with a minimum grade of O3/H7 must have a Distinction in a Mathematics or Statistics module or GCSE Grade B in Mathematics.

UK, EU & INTERNATIONAL APPLICANTS

APPLYING AS AN A-LEVEL STUDENT

You must apply through the Central Applications Office (CAO) if you are presenting A-levels. For more information on applying to the CAO see page 153.

MINIMUM ENTRY REQUIREMENTS

Before CAO points can be calculated for any degree, the applicant must first satisfy the minimum entry requirements for entry to Maynooth University. **These are outlined below:**

A pass in 6 distinct recognised subjects which must include: 2 subjects at GCE A-level grade C and a pass grade in 4 other subjects (pass grade is a minimum of E at A-level, D at AS or 4/C at GCSE).

Applicants must achieve a minimum of grade 4/C in English at GCSE level, or E at A-level, or D at AS.

Since applicants from outside the Republic of Ireland are automatically entitled to an exemption from Irish, those presenting a grade C or grade 4 in Irish and English at GCSE satisfy the third language requirement for entry to programmes in which a third language is a requirement. For candidates intending to use Irish for this purpose, it is essential to contact NUI (at nui.ie) so that their status in terms of fulfilling language requirements may be recorded.

SPECIFIC COURSE REQUIREMENTS

In addition to the above, some degree programmes require certain subjects at either GCSE or A-level. For instance, science degrees will require grade C/4 in a science subject and grade B/6 Mathematics at a minimum of GCSE level. Any such extra subject requirement(s) are listed under the individual degrees in this prospectus.

For some degrees, students must achieve a minimum of grade C/4 in another language at GCSE level.

When all of the above has been met, the points are calculated on the basis of:

- (i) A maximum of four different recognised subjects (A-level and AS), will be counted. Only one subject from each subject grouping outlined in the document on the NUI website will be considered.

➔ www.nui.ie/college/entry-requirements.asp

- (ii) If 4 A-levels are presented, the lowest grade is scored as an AS.
- (iii) Applicants can be scored on:
 - Their 4 best A-levels from a single sitting
 - Their 3 best A-levels from a single sitting
 - Their 3 best A-levels from a single sitting and 1 AS or extended project from the same or previous year
 - Their 2 best A-levels from a single sitting and 2 AS and/or extended project from the same or previous year

CAO POINTS SYSTEM

GCE / A-LEVEL EXAMINATIONS

The model for converting A-level grades to Leaving Certificate Points for the purposes of university entry is:

Grade	Best 3 A-Levels	4th A-Level	AS level / EPQ
A*	192	24	24
A	165	24	24
B	142	20	20
C	120	18	18
D	100	16	16
E	67	14	14

Please note that the final points awarded for each grade may be subject to adjustment.

Applicants presenting Grade E or above in one of A-level Mathematics, Further Mathematics or Pure Mathematics will have 25 points added to their score for that subject. The bonus points will only be relevant where that subject is scored as one of the applicant's best four A-level subjects for points purposes. This gives a maximum possible score of 625.

Maths bonus will only apply to A-level grades and will apply even if the maths grade is scored as an AS. Only one bonus is awarded if applicants present more than one Maths subject. A-level AS/EP Score (a 4th A-level can be scored as an AS).

EU STUDENTS APPLYING FOR A-LEVEL 8 DEGREE (BACHELOR)

Undergraduate applicants presenting EU qualifications must apply to the Central Applications Office at www.cao.ie. For more information on applying to the CAO see page 153.

Details of minimum entry requirements and English Language proficiency requirements are available online at www.nui.ie/college/entry-requirements.asp or under the Student Resources section of the CAO website www.cao.ie

NON-EU STUDENTS APPLYING FOR A LEVEL 8 DEGREE (BACHELOR)

Undergraduate applicants presenting Non-EU qualifications must apply directly to Maynooth University via the online application portal at www.maynoothuniversity.ie/study-maynooth. Applications must be received by 30th June 2026.

DEFERRING, TRANSFERRING & OCCASIONAL STUDENT APPLICANTS

DEFERRING

An application can be made to defer your place for one year. Deferral requests must be granted by the Admissions and Student Recruitment Office.

When you receive your CAO offer, please see the Deferral section of the website for details about how to proceed.

✉ caodeferrals@mu.ie

🖱 www.maynoothuniversity.ie/howtoapply

TRANSFERRING

Students from other universities and third-level institutes may apply to transfer to 2nd year of a degree course at Maynooth University if they have obtained relevant awards, e.g. QQI Higher Certificate, two years of an Ordinary Degree or one year of an Honours Degree. Preference is normally given to candidates who have attained merit or distinction grades.

In some cases, transfer into third year is possible for applicants with a level 7 degree in a related discipline or who have 2 years of a level 8 degree in a related discipline.

Transfer application deadline is July 1st.

✉ transfers@mu.ie

🖱 www.maynoothuniversity.ie/howtoapply

NON-EU/INTERNATIONAL APPLICANTS

- > Non-EU international students wishing to transfer from another university or third-level institute should contact the International Office.
- > Students who are part of an institutional exchange programme e.g. Erasmus, should apply through the International Office.

✉ international@mu.ie

🖱 www.maynoothuniversity.ie/international

OCCASIONAL STUDENT APPLICANTS

An Occasional Student Applicant is someone who wishes to study specific modules for a semester or for one academic year and is therefore liable for fees. Occasional Students do not receive a Maynooth University qualification but will receive a transcript of results if they take assessments.

Contact the Admissions and Student Recruitment Office for more details. There is an online application form.

✉ admissions.occasionals@mu.ie

🖱 www.maynoothuniversity.ie/howtoapply

For queries on Occasional applicant fees, please contact the Fees Office at fees.office@mu.ie

APPLICANTS WITH A CRIMINAL CONVICTION

All applicants are required to disclose to the University any previous serious criminal convictions when applying for admission. Having a criminal conviction will not necessarily prevent an applicant from gaining admission to the University. However, the University will take any criminal convictions of a prospective applicant into account when considering applications for admission, and reserves the right to refuse to admit an applicant where her/his previous criminal conviction makes it inappropriate for her/him to be admitted.

Examples of serious convictions include (and without limitation) convictions for offences against the person, whether of a violent or sexual nature, and convictions for offences involving unlawfully supplying controlled drugs or substances where the conviction concerns commercial drug dealing or trafficking.

Any applicant with a criminal conviction intending to apply for admission to the University should view the University's Policy on Applicants with Criminal Convictions at www.maynoothuniversity.ie/university-policies/academic-policies-procedures

Any general queries that an applicant may have concerning the University's Policy on Applicants with Criminal Convictions may be addressed, in the first instance, for the attention of the Deputy Admissions Officer.

☎ +353 1 708 3822

✉ ugadmissions@mu.ie

Visit our **HOW TO APPLY** webpages for more information.
www.maynoothuniversity.ie/howtoapply

EMAIL ADDRESS DISCONTINUED AND REPLACED

Note, as per Prospectus 2026 and MU website, please email ugadmissions@mu.ie with queries. admissions@mu.ie is no longer operational and is replaced with ugadmissions@mu.ie – emails sent to admissions@mu.ie will not be received.

STRUCTURAL CHANGES TO MU UNDERGRADUATE DEGREES – FROM SEPTEMBER 2026

Programme: MH101 Bachelor of Arts Subject: Nua Ghaeilge Modification: To offer an additional 15 ECTS in Nua-Ghaeilge in 1st year, (as a double subject). Clár: MH101 Baitsiléir Ealaíon Ábhar: Nua-Ghaeilge Leasú: 15 ECTS sa bhreis sa Nua-Ghaeilge sa chéad bhliain (ábhar dúbailte)
Programme: MH101 Bachelor of Arts Subject: Politics Correction: The MU Prospectus 2026 incorrectly states that Politics is available as a Major from second year. Politics is available as a Double Major or as a Minor from second year.
Programme: BA Creative Writing and English Modification: To enable an internal transfer mechanism, with conditions, for students taking English in MH101 at the end of First Year to Year 2 MH111.
Programme: BSc Biotechnology MH202 [M14] Modification: Year 1, inclusion of Data Science as an optional subject. Year 4, increase the placement module BI430 from 15 to 25 credits and remove BI423 (10 credits).
Programme: MH804 BA Adult, Community, Further Education (flexible part-time) Modification: Modification to meet Teaching Council requirements – course length changed from 4.5 years to 6 years. (Note: the course length of the other two strands within MH804 remain at 4.5 years)

NEW DEGREES

MH205 BSc Biomedical Science

MH410 BBS/BBA Finance
MH804 BA - part-time, flexible learning (mature only)

Scan for degree course information on MU website.

NEW QQI LINKS

The following degrees have QQI links:

- > MH111 BA Creative Writing and English
- > MH205 BSc Biomedical Science
- > MH410 BBS/BBA Finance
- > *MH701 BSc General Nursing

*MH701 BSc General Nursing - QQI FET Entry Route

Applicants must present the FULL major award, taken in a single sitting, of any one of the following QQI-FET Level 5 major awards with a minimum credit value of 120 and distinctions (80% or better) in a minimum of five modules:

- Nursing Studies (5M4349) Level 5
- Healthcare Support (5M4339) Level 5
- Community and Health Services (5M4468) Level 5
- Health Service Skills (5M3782) Level 5

The following modules must be included as distinctions:

Anatomy and Physiology (5N0749) and Nursing Theory and Practice (5N4325) or Care Support (5N0758).

Meeting the eligibility requirements does not guarantee an offer of a place.

We are currently reviewing QQI/FET entry requirements for all courses. These entry requirements are subject to change. Please note that QQI/FET courses 5M21473 and 6M21471 will only be eligible for entry to MU degree courses MH003 and MH004 from 2026 entry.

Scan for QQI information on MU website.

NEW €19 MILLION SPORT SCIENCE CENTRE

The University began construction in summer 2025 of a three-storey extension to the Phoenix Sports and Restaurant Building. The new extension will include:

- a state-of-the-art student gym
- a sports / multi-purpose hall
- changing facilities

MU hopes that the provision of these extensive modern gym facilities will encourage students to visit the gym regularly, improving their physical fitness, reducing stress levels and promoting mental wellbeing.

INVITE MAYNOOTH UNIVERSITY TO YOUR SCHOOL: INSPIRING FUTURE PATHWAYS

The Maynooth University Schools Liaison Team is excited to offer engaging, informative talks directly to your students, either in-person or virtually. Our presentations cover a broad range of Maynooth University programmes and provide valuable insights into the CAO process and college life, helping to supplement the information students receive online and in print.

To request a talk or presentation, or attendance at a Career Fair or Exhibition, please reach out to our Schools Liaison Team with the following details:

- Preferred date and time
- School name and address
- Contact name and email address
- Contact phone or mobile number (optional)

Contact us: schoolsliaison@mu.ie

We look forward to inspiring your students and helping them explore the exciting opportunities that await at Maynooth University.

DATES FOR YOUR DIARY

FEES & GRANTS

FEES & GRANTS

The Fees & Grants Office is a unit within the Bursar's Office, located in the Bursar's Office, Rye Extension, North Campus, who communicate and engage with incoming, current and continuing students, all University Departments and various external stakeholders.

The Fees & Grants team provide guidance, support and a positive solution focused approach to ensure the delivery of a highly flexible, responsive and effective service to all stakeholders.

We are responsible for ensuring that all elements of a student's finance lifecycle are carried out efficiently and on time i.e. Invoicing and collection of fee liability from various sources; Exchequer Free Fees scheme; SUSI; 3rd party payments; Rebates; Distribution and payment of awards/scholarships/stipends/access funds; Research funding; US and other International funding; etc.

The Fees & Grants Office hold regular information sessions and webinars throughout the academic year for any queries you may have. You can find details about the information sessions along with fees and grants updates on the website:

👉 www.maynoothuniversity.ie/student-fees-grants

CONTACT INFORMATION:

Why not email us:

Fee Receipts: receipts.fees@mu.ie

Fee Status Assessment: Feestatus@mu.ie

Third Party Invoicing: FeeInv@mu.ie

Fees MU Apply Queries: fees.crm@mu.ie

 on webchat

FEES FOR IRISH/ EU/ EEA/ SWISS/ UK NATIONALS:

Undergraduate EU Fees consist of three parts:

- > Student Levy Fee,
- > Student Contribution Fee, and
- > **Tuition Fees** which vary depending on your course.

The **Tuition Fees** can be covered by the Higher Education Authority under the Exchequer Free Fees Initiative for eligible students; in most cases eligible students do not need to apply for the Exchequer Free Fees Initiative, the University will allocate this based on your eligibility. Please visit the Fees & Grants Office website for more information:

👉 www.maynoothuniversity.ie/student-fees-grants

The Student Contribution Fee can be covered in part or in full by SUSI. All fees are yearly fees, and all fees are subject to change each academic year. This is subject to change depending on Government regulations.

SUSI

The grant-awarding authority is Student Universal Support Ireland (SUSI).

All students of approved full-time undergraduate courses of at least two years in duration, and students of full-time postgraduate courses, may apply for a SUSI grant.

To qualify for the SUSI, you must meet certain criteria, including in relation to academic achievement, and undergo a means test.

Depending on the rate of grant awarded, SUSI may not cover the full Student Contribution / Tuition Fees. Please refer to your SUSI award letter for details on your award rate.

SUSI processes all grant applications through:

👉 www.susi.ie.

FEES FOR INTERNATIONAL STUDENTS

All International Fees must be paid in full prior to the completion of registration.

Once a student receives their offer, payment details are forwarded.

Payments for new incoming international students can be made via TransferMate:

👉 mu.transfermateeducation.com

POSTGRADUATE STUDY

At Maynooth University, it is the individual that matters, and for your postgraduate studies, our small class sizes and one-to-one guidance from senior lecturers and global researchers will challenge and inspire you. Our Taught Masters Programmes are designed to foster and deepen our students' knowledge and skills in a specific subject area at postgraduate level. Our programmes offer students the opportunity to specialise in an area of interest closely aligned to their undergraduate degree or current career path, or to expand their skills and knowledge to develop their career path in a new direction.

We offer a wide range of taught masters qualifications including Master of Arts, Master of Science, Master of Social Science, LLM, Master of Education and Professional Master of Education.

We also offer a range of HDip, PGDip, PCert at postgraduate level.

SOME OF OUR NEW POSTGRADUATE PROGRAMMES INCLUDE:

- > Master of Business Administration (MBA)
- > MSc in Consumer Insights and Branding Strategy
- > MA in Contemporary Music Practices
- > MSc in Supply Chain Management

CONVERSION COURSES AT MAYNOOTH UNIVERSITY

Maynooth University offers a range of Conversion Courses for students who want to move into a new area where they do not have previous experience.

RESEARCH AT MAYNOOTH UNIVERSITY

Since the 18th century, researchers and scholars at Maynooth have fostered a spirit of inquiry and scholarship rooted in the classical European tradition.

Our research spans the Natural Sciences, Social Sciences, Arts and Humanities, Business and Law, Computer Science and Engineering. Our diversity and scale allow us to work across traditional boundaries to focus on major societal challenges of the 21st century.

OUR RESEARCH BEACONS

DATA SCIENCE AND DIGITAL TRANSFORMATION

We focus on the analysis and advancement of computer science, data science, and digital transformation – and explore the synergistic developments between those innovations and wider society. This beacon serves as a focus for researchers, developers, and policymakers seeking to navigate complex data landscapes and transform the productivity of the public and private sectors. Our research optimises and iterates your business processes, driving the emergence of new methods and business models for tomorrow's challenges – enabled by mathematical science, machine learning, and large-scale data analytics.

HEALTH & WELLBEING

Our expert researchers investigate the underlying mechanisms, prevention, and treatment of disease, developing healthcare innovations, mental health promotion, and broader well-being. We collaborate with international academics, healthcare providers, and industry to explore unique aspects of human health at the molecular, cellular, and whole-body levels. Beyond biochemistry, we work to understand the complex social and environmental factors that influence health at a personal, community, and population level: developing strategies and interventions that positively impact people's quality of life.

HERITAGE, CULTURE AND LANGUAGES

Human creativity, informed critique, and a steadfast commitment to addressing social challenges fuse together under the aegis of the **Heritage, Culture and Languages Beacon** to imagine and build better and more humane futures for all. Our research creates new cultural resources and shares their transformative potential with society, inspiring future generations of culturally empowered and scientifically confident citizens.

SOCIETY AND PUBLIC POLICY

This work represents a core, multidisciplinary research focus of Maynooth University, centred upon the intricate relationships between societal transformation and the development, implementation, and evaluation of public policies. We seek to understand the complex challenges faced by contemporary societies and to generate evidence-based insights that inform the formulation and assessment of public policies. We work collaboratively with government agencies, advocacy groups, think tanks, and international organisations to develop recommendations and solutions that improve public policies, enhance the well-being of individuals and communities, and address pressing societal issues. The "Society and Public Policy" research beacon recognises the profound impact of policy decisions on people's lives and seeks to foster a more informed and responsive approach to addressing the evolving needs of societies in an ever-changing world.

SUSTAINABILITY AND CLIMATE CHANGE

Our work in this area focusses on understanding, mitigating, and adapting to the challenges posed by climate change and resource scarcity in a growing world. We develop solutions and strategies that promote environmentally sustainable development, reducing the impact of human activities on the planet, and fostering resilience in the face of climate-related challenges. Researchers within this beacon collaborate with stakeholders worldwide, including national governments, non-governmental organisations, and major industries to address critical issues related to sustainability and climate change. Our work aligns research efforts with the United Nations Sustainable Development Goals to address global challenges related to poverty, inequality, climate action, and environmental conservation: we work to address the disproportionate impacts of environmental degradation and climate change on marginalised communities, and advocate for equitable and just solutions.

For more details visit: www.maynoothuniversity.ie/research

GRADUATE RESEARCH ACADEMY

The Graduate Research Academy (GRA) is Maynooth University's central support structure for postgraduate research students and their supervisors. All research postgraduates are GRA members, alongside their academic departments. Acting as a hub for this community, the GRA provides advice, training, development, and mentorship tailored to each student's research journey. It also manages research training supports and scholarship programmes.

The GRA promotes a holistic student experience throughout the research lifecycle. It ensures quality assurance and helps shape policies for admission, progression, and examination. Working closely with the postgraduate community, the GRA enhances the research experience and celebrates its members' achievements.

To find out more about the Graduate Research Academy please visit: www.maynoothuniversity.ie/graduate-research-academy

TRAVELLING TO MAYNOOTH

Maynooth University is located in the heart of Ireland's oldest university town. We are 25km from the centre of Dublin and our beautiful campus (divided into the North and South Campus by the Kilcock Road) is closely integrated with the historic town of Maynooth - easily accessible by road, rail and canal towpath.

BUS LINKS	> Approximately 2,000 parking spaces on campus
TRAIN LINKS	> Lots of public and private transport options to Maynooth
DUBLIN TO GALWAY CYCLEWAY	> Cycling is a popular way of commuting to the University
	www.maynoothuniversity.ie/location

TRAIN SERVICES

Maynooth lies on the Western Commuter Line, which serves the four Dublin city centre stations: Pearse Street Station, Tara Street, Connolly Station and Docklands. It also serves thirteen other suburban stations: Drumcondra, Broombridge, Pelletstown, Ashtown, Navan Road Parkway, Castleknock, Coolmine, Clonsilla, Hansfield, Dunboyne, M3 Parkway, Leixlip Confey and Leixlip Louisa Bridge. The Luas Broombridge Interconnector links Maynooth to the Red and Green Luas Lines.

The Sligo train line passes through Maynooth to Dublin via Collooney, Ballymote, Boyle, Carrick-on-Shannon, Dromod, Longford, Edgeworthstown, Mullingar, Enfield and Kilcock.

DIRECT BUS LINKS TO THE CAMPUS

Maynooth is well served by the Dublin Bus C-Spine route network. Buses depart from the city centre and run frequent services to Maynooth.

A range of bus operators organise daily and weekly coach services to the campus – timed to fit in with lectures. The map below indicates the locations which have direct transport links to and from the campus. See the transport information on the website.
